ISACA Certified Information Security Manager Sample Questions (Q311-Q316):

NEW QUESTION # 311

Which of the following would be MOST useful in a report to senior management for evaluating changes in the organization's information security risk position?

- A. Trend analysis
- B. Industry benchmarks
- C. Management action plan
- D. Risk register

Answer: D

NEW QUESTION # 312

When an organization is setting up a relationship with a third-party IT service provider, which of the following is one of the MOST important topics to include in the contract from a security standpoint?

- A. Existence of an alternate hot site in case of business disruption.
- B. Compliance with international security standards.
- C. Use of a two-factor authentication system.
- D. Compliance with the organization's information security requirements.

Answer: D

Explanation:

From a security standpoint, compliance with the organization's information security requirements is one of the most important topics that should be included in the contract with third-party service provider. The scope of implemented controls in any ISO 27001-compliant organization depends on the security requirements established by each organization. Requiring compliance only with this security standard does not guarantee that a service provider complies with the organization's security requirements. The requirement to use a specific kind of control methodology is not usually stated in the contract with third-party service providers.

The Certified Information Security Manager (CISM) certification is a globally recognized credential for information security managers who are responsible for developing and managing information security programs. The CISM certification is offered by the Information Systems Audit and Control Association (ISACA), a global association of information security, assurance, governance, and risk professionals.

Passing the CISM certification exam demonstrates that an individual has the knowledge and skills required to manage and oversee information security programs. It also demonstrates a commitment to professional development and a dedication to the information security field. The CISM Certification is recognized globally and is highly respected by employers, making it a valuable credential for information security professionals looking to advance their careers.

ISACA Certified Information Security Manager Sample Questions (Q98-Q103):

NEW QUESTION # 98

Which of the following is the MOST important information to include in a strategic plan for information security?

- A. IT capital investment requirements
- B. information security mission statement
- **C. Current state and desired future state**
- D. Information security staffing requirements

Answer: C

Explanation:

It is most important to paint a vision for the future and then draw a road map from the stalling point to the desired future state. Staffing, capital investment and the mission all stem from this foundation.
