## ISACA Certified in the Governance of Enterprise IT Exam Sample Questions (Q187-Q192):

### NEW QUESTION # 187

To reduce the risk of reputational damage through inappropriate use of social media by employees outside of the workplace, the enterprise approach regarding social media should PRIMARILY focus on;

- A. developing policies on social media.
- B. ensuring each use of social media is approved by management.
- C. implementing preventative controls.
- D. implementing a review of processes utilizing social media.

**Answer: A**

Explanation:

Developing policies on social media is the primary focus of the enterprise approach to reduce the risk of reputational damage by employees outside of the workplace. Policies can define the acceptable and unacceptable use of social media, the roles and responsibilities of employees, and the consequences of policy violations. Policies can also provide guidance and awareness to employees on how to use social media responsibly and ethically. Reference: CGEIT Domain 1: Framework for the Governance of Enterprise IT

### NEW QUESTION # 191

A CEO wants to establish a governance framework to facilitate the alignment of IT and business strategies.

Which of the following should be a KEY requirement of this framework?

- A. Defined resourcing levels
- B. **A defined enterprise architecture (EA)**
- C. A service delivery Strategy
- D. An outsourcing strategy

**Answer: B**

Explanation:

A defined enterprise architecture (EA) is a key requirement of a governance framework to facilitate the alignment of IT and business strategies. An EA is a blueprint that describes the current and future state of the organization's structure, processes, information, and technology, as well as the principles and standards that guide their design and evolution. An EA helps to align IT and business strategies by providing a common vision, language, and framework for the organization, and by ensuring that the IT investments and initiatives support the business goals and objectives. An EA also helps to optimize the performance, efficiency, and effectiveness of the IT function and its services, and to manage the risks and changes associated with IT. An EA can be developed and maintained using various methodologies and frameworks, such as TOGAF, Zachman, or FEAF.
