## Salesforce Certified MuleSoft Platform Integration Architect Sample Questions (Q65-Q70):

### NEW QUESTION # 65

When configuring logging for Mule applications, what practice enhances security and compliance in production environments?

- A. Logging all user inputs and outputs without filtration.
- B. Using the highest verbosity level for all logs.
- **C. Masking sensitive data before it is logged.**
- D. Storing logs in the same database as application data.

**Answer: C**

**NEW QUESTION # 66**

An organization is automating its deployment process to increase the reliability of its builds and general development process by automating the running of tests during its builds.

Which tool is responsible for automating its test execution?

- A. Anypoint CLI
- B. MUnit
- C. Mule Maven plugin
- D. **MUnit Maven plugin**

**Answer: D**

**NEW QUESTION # 67**

What should be considered when designing CI/CD pipelines for Mule applications to ensure smooth transitions between development, test, and production environments?

- A. Restrict pipeline visibility to developers only.
- B. Avoid using any automated tools to minimize complexity.
- C. Use the same configuration settings across all environments.
- D. **Ensure that the pipeline includes stages for build, test, and deployment automation.**

**Answer: D**

**NEW QUESTION # 68**

A developer is developing an MUnit test suite for a Mule application. This application must access third-party vendor SOAP services. In the CI/CD pipeline, access to third-party vendor services is restricted. Without MUnits, a successful run and coverage report score is less than the threshold, and builds will fail.

Which solution can be implemented to execute MUnits successfully?

- A. **In MUnits, mock a SOAP service invocation and provide a mock response for those calls**
- B. In the CI/CD pipeline, create and deploy mock SOAP services
- C. For the CI/CD pipeline, add a skip clause in the flow for invoking SOAP services
- D. In MUnits, invoke a dummy SOAP service to send a mock response for those calls

**Answer: A**

**NEW QUESTION # 69**

Which of these practices should be avoided to maintain secure edge access in Mule applications using Anypoint Security (Choose Two)

- A. Using multifactor authentication for device and user verification.
- B. **Implementing generic security policies that are not tailored to specific business needs.**
- C. Enforcing encryption at the edge before data enters the network.
- D. **Relaxing firewall rules to ensure uninterrupted service availability.**

**Answer: B,D**

**NEW QUESTION # 70**
