NEW QUESTION # 324

您詢問 IT 經理，為什麼組織仍在使用行動應用程序，而個人資料加密和假名化測試卻失敗了。此外，服務經理是否有權批准測試。

IT 經理解釋說，根據軟體安全管理程序，測試結果應由他批准。加密和假名功能失敗的原因是這些功能嚴重降低了系統和服務效能。需要額外 150% 的資源來滿足這一點。服務經理同意存取控制足夠好並且可以接受。這就是服務經理簽署批准書的原因。

您正在準備審計結果。選擇正確的選項。

- A. 存在不合格項 (NC)。組織和開發人員執行的安全測試失敗。
(與第 8.1 條相關，控制措施 A.8.29)
- B. 存在不合格項 (NC)。服務管理員不遵守軟體安全管理程序。(與第 8.1 條相關，控制措施 A.8.30)
- C. 不存在不合格項 (NC)。服務經理做出了繼續提供服務的正確決定。
(與第 8.1 條相關，控制措施 A.8.30)
- D. 存在不合格項 (NC)。組織和開發人員不執行驗收測試。

(與第 8.1 條相關，控制措施 A.8.29)

Answer: B

Explanation:

According to ISO 27001:2022 Annex A Control 8.30, the organisation shall ensure that externally provided processes, products or services that are relevant to the information security management system are controlled. This includes developing and entering into licensing agreements that cover code ownership and intellectual property rights, and implementing appropriate contractual requirements related to secure design and coding in accordance with Annex A 8.25 and 8.29.12. In this case, the organisation and the developer have performed security tests that failed, which indicates that the secure design and coding requirements of Annex A 8.29 were not met. The IT Manager explains that the encryption and pseudonymisation functions failed because they slowed down the system and service performance, and that an extra 150% of resources are needed to cover this. However, this does not justify the acceptance of the test results by the Service Manager, who is not authorised to approve the test according to the software security management procedure. The Service Manager should have consulted with the IT Manager, who is the owner of the process, and followed the procedure for handling nonconformities and corrective actions. The Service Manager's decision to continue the service based on access control alone exposes the organisation to the risk of compromising the confidentiality, integrity, and availability of personal data processed by the mobile app. Therefore, there is a nonconformity (NC) with clause 8.1, control A.8.30.

- B. 審核高階管理人員
- C. 頒發管理體系證書
- D. 採用風險為本的方法來規劃審核
- E. 準備審核不合格報告
- F. 與受審核方建立聯繫

Answer: D,F

A risk-based approach to planning the audit means that the team leader should consider the risks and opportunities that may affect the achievement of the audit objectives, the scope and criteria, the audit methods and techniques, the allocation of resources and the assignment of tasks to the audit team members. Establishing contact with the auditee means that the team leader should communicate with the auditee before, during and after the audit, to confirm the audit arrangements, to obtain relevant information, to address any issues or concerns, to provide feedback and to report the audit results and conclusions. NEW QUESTION # 327

下列哪三個短語是與審計相關的目標？

- A. 確定改進機會
- B. 監理要求
- C. 確認管理系統的範圍
- D. 管理策略
- E. 按時完成審核
- F. 國際標準

Answer: A,B,C

Explanation:

According to ISO 19011:2018, which provides guidelines for auditing management systems, the audit objectives are defined by the audit client and may include determining the extent of conformity or nonconformity of the audited management system against the audit criteria, evaluating the ability of the audited management system to ensure that the organization meets applicable statutory, regulatory and contractual requirements, identifying potential improvement opportunities for the audited management system, and facilitating continual improvement of the audited management system. Therefore, these three phrases are examples of objectives in relation to an audit. The other options are not objectives, but rather elements or factors that may influence or affect an audit. For example, an international standard is a source of audit criteria, a management policy is a part of the audited management system, and completing an audit on time is a requirement for an effective audit.
