The SSM (6.0) - SAFe® Scrum Master certification exam is a multiple-choice exam that tests the knowledge and skills of participants in the Scrum methodology. SSM exam is designed to assess the ability of participants to apply the principles of Scrum methodology in real-world scenarios. Participants who pass the exam are awarded the Scrum SSM Certification, which is recognized globally as a mark of expertise in the field of agile development.

Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q56-Q61):

NEW QUESTION # 56

During which of the following stages of team development do team members stop focusing on their own goals and begin focusing on developing better ways of working together?

- A. Forming
- B. Transforming
- C. Norming
- D. Storming

Answer: C

Explanation:

Norming is the stage of team development where team members stop focusing on their own goals and begin focusing on developing better ways of working together. Norming occurs after the team has gone through the Forming and Storming stages, where they have established their roles and responsibilities, and have resolved their initial conflicts and disagreements¹². In the Norming stage, the team starts to build trust, respect, and cohesion among themselves. They also align on a common vision, mission, and goals, and agree on the norms and expectations for their collaboration and communication¹². The team becomes more productive, efficient, and effective, as they leverage their collective strengths and skills, and support each other in overcoming challenges and delivering value¹². The team also develops a sense of identity and pride, and celebrates their achievements and learnings¹².

NEW QUESTION # 57

What is one way to ensure a team is holding successful Iteration Reviews and demos?

- A. The team shares improving metrics
- B. The team swarms to prepare for demos
- C. The team ensures they complete every Story
- D. The team demos working functionality

Answer: D

Explanation:

One way to ensure a team is holding successful iteration reviews and demos is to have the team demo working, tested system components that meet the definition of done (DoD). This shows the team's progress and value delivery, and allows them to receive feedback from the product owner and other stakeholders. The team should minimize the use of slides and the preparation time for the demos, and focus on the solution instead of the presentation. The team should also discuss the impact of the current solution on the nonfunctional requirements (NFRs) and identify any risks or impediments.
