

# New AZ-104 Exam Topics & Latest AZ-104 Exam Materials

**AZ 104 Exam Questions with Correct Answers**  
**2023 Update**

Your company's Azure subscription includes Azure virtual machines (VMs) that run Windows Server 2016. One of the VMs is backed up every day using Azure Backup Instant Restore. When the VM becomes infected with data encrypting ransomware, you decide to recover the VM's files. Which of the following is TRUE in this scenario?

A. You can only recover the files to the infected VM.  
B. You can recover the files to any VM within the company's subscription.  
C. You can only recover the files to a new VM.  
D. You will not be able to recover the files.

Correct Answer: A

Your company has an Azure Active Directory (Azure AD) subscription. You need to deploy five virtual machines (VMs) to your company's virtual network subnet. The VMs will each have both a public and private IP address. Inbound and outbound security rules for all of these virtual machines must be identical. Which of the following is the least amount of security groups needed for this configuration?

A. 4  
B. 3  
C. 2  
D. 1

Correct Answer: D

Your company has an Azure Active Directory (Azure AD) tenant that is configured for hybrid coexistence with the on-premises Active Directory domain. You plan to deploy several new virtual machines (VMs) in Azure. The VMs will have the same operating system and custom software requirements. You configure a reference VM in the on-premise virtual environment. You then generalize the VM to create an image. You need to upload the image to Azure to ensure that it is available for selection when you create the new Azure VMs. Which PowerShell cmdlets should you use?

A. Add-AzVM  
B. Add-AzVhd  
C. Add-AzImage  
D. Add-AzImageDataDisk

Correct Answer: B

Your company has an Azure Active Directory (Azure AD) tenant that is configured for hybrid coexistence with the on-premises Active Directory domain. The on-premise virtual environment consists of virtual machines (VMs) running on Windows Server 2012 R2 Hyper-V host servers. You have created

P.S. Free & New AZ-104 dumps are available on Google Drive shared by TopExamCollection: [https://drive.google.com/open?id=1tHctmVW2bEXxfMq2QDts-oK\\_Xht4XMK](https://drive.google.com/open?id=1tHctmVW2bEXxfMq2QDts-oK_Xht4XMK)

Our AZ-104 guide question dumps are suitable for all age groups. Even if you have no basic knowledge about the relevant knowledge, you still can pass the AZ-104 exam. We sincerely encourage you to challenge yourself as long as you have the determination to study new knowledge. Our AZ-104 test prep will not occupy too much time. You might think that it is impossible to memorize well all knowledge. We can tell you that our AZ-104 Test Prep concentrate on systematic study, which means all your study is logic. Why not give us a chance to prove? Our AZ-104 guide question dumps will never let you down.

We have the first-rate information safety guarantee system for the buyers who buy the AZ-104 questions and answers of our company, we can ensure that the information of your name, email, or product you buy. We respect the private information of every customer, and we won't send the junk information to you to bother. Besides, you will get AZ-104 Questions and answers downloading link within ten minutes, and our system will send you the update version to your mailbox.

## 100% Pass Quiz Efficient Microsoft - New AZ-104 Exam Topics

The clients can download our products and use our AZ-104 study materials immediately after they pay successfully with their credit cards. Our system will send our AZ-104 learning prep in the form of mails to the client in 5-10 minutes after their successful payment. The mails provide the links and if only the clients click on the links they can log in our software immediately to learn our AZ-104 Guide materials. If there are something they can't understand, they can contact with our service and we will solve them right

away.

## Microsoft Azure Administrator Sample Questions (Q125-Q130):

### NEW QUESTION # 125

You have an Azure subscription that contains a user named User1.

You need to ensure that User1 can deploy virtual machines and manage virtual networks. The solution must use the principle of least privilege.

Which role-based access control (RBAC) role should you assign to User1?

- A. Contributor
- **B. Virtual Machine Contributor**
- C. Owner
- D. Virtual Machine Administrator Login

**Answer: B**

Explanation:

To ensure that User1 can deploy virtual machines and manage virtual networks, you need to assign an RBAC role that grants the necessary permissions to perform these tasks. The solution must also use the principle of least privilege, which means that you should only grant the minimum level of access required to accomplish the goal.

Based on these requirements, the best RBAC role to assign to User1 is D.

Virtual Machine Contributor. This role allows User1 to create and manage virtual machines, disks, snapshots, and network interfaces. It also allows User1 to connect virtual machines to existing virtual networks and subnets. However, it does not allow User1 to create or delete virtual networks or subnets, or to access the virtual machines themselves. This role follows the principle of least privilege by limiting User1's access to only the resources and actions that are relevant to deploying virtual machines and managing virtual networks.

### NEW QUESTION # 126

You have an Azure subscription that contains a virtual network named VNet1. VNet1 uses an IP address space of 10.0.0.0/16 and contains the subnets in the following table.

Name	IP address range
Subnet0	10.0.0.0/24
Subnet1	10.0.1.0/24
Subnet2	10.0.2.0/24
GatewaySubnet	10.0.254.0/24

Subnet1 contains a virtual appliance named VM1 that operates as a router.

You create a routing table named RT1.

You need to route all inbound traffic to VNet1 through VM1.

How should you configure RT1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Address prefix	10.0.0.0/16 10.0.1.0/24 10.0.254.0/24
Next hop type:	Virtual appliance Virtual network Virtual network gateway
Assigned to:	GatewaySubnet Subnet0 Subnet1 and Subnet2

**Answer:**

Explanation:

## Answer Area

Address prefix	<div>10.0.0.0/16</div> <div>10.0.1.0/24</div> <div>10.0.254.0/24</div>
Next hop type:	<div>Virtual appliance</div> <div>Virtual network</div> <div>Virtual network gateway</div>
Assigned to:	<div>GatewaySubnet</div> <div>Subnet0</div> <div>Subnet1 and Subnet2</div>

### NEW QUESTION # 127

You have an Azure subscription.

You plan to use Azure Resource Manager templates to deploy 50 Azure virtual machines that will be part of the same availability set.

You need to ensure that as many virtual machines as possible are available if the fabric fails or during servicing.

How should you configure the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
{
  "$schema": "https://schema.management.azure.com/schemas/2015-01-01/deploymentTemplate.json",
  "contentVersion": "1.0.0.0",
  "parameters": {},
  "resources": [
    {
      "type": "Microsoft.Compute/availabilitySets",
      "name": "ha",
      "apiVersion": "2017-12-01",
      "location": "eastus",
      "properties": {
        "platformFaultDomainCount": 20,
        "platformUpdateDomainCount": 20
      }
    }
  ]
}
```

**Answer:**

**Explanation:**

```

{
  "$schema": "https://schema.management.azure.com/schemas/2015-01-01/deploymentTemplate.json",
  "contentVersion": "1.0.0.0",
  "parameters": {},
  "resources": [
    {
      "type": "Microsoft.Compute/availabilitySets",
      "name": "ha",
      "apiVersion": "2017-12-01",
      "location": "eastus",
      "properties": {
        "platformFaultDomainCount": 20,
        "platformUpdateDomainCount": 20
      }
    }
  ]
}

```

### NEW QUESTION # 128

You have an Azure subscription that contains the virtual networks shown in the following table.

Name	Location	Cloud type
VNet1	East US	Azure Government
VNet2	West US 2	Public
VNet3	China East	Azure China

You have the peering options shown in the following exhibit.

You need to design a communication strategy for the resources on the virtual networks.

For each of the following statements, select Yes if the statement is true. Otherwise, select No

**Answer:**

Explanation:

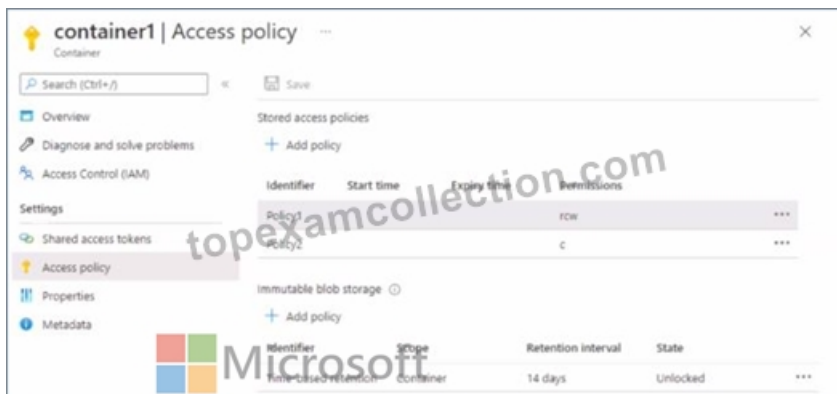

Statements	Yes	No
Peering 1-2 is a possible configuration.	<input type="radio"/>	<input type="radio"/>
Peering 1-3 is a possible configuration.	<input type="radio"/>	<input type="radio"/>
Peering 3-2 is a possible configuration.	<input type="radio"/>	<input type="radio"/>

Explanation:

Statements	Yes	No
Peering 1-2 is a possible configuration.	<input type="radio"/>	<input checked="" type="radio"/>
Peering 1-3 is a possible configuration.	<input type="radio"/>	<input checked="" type="radio"/>
Peering 3-2 is a possible configuration.	<input type="radio"/>	<input checked="" type="radio"/>

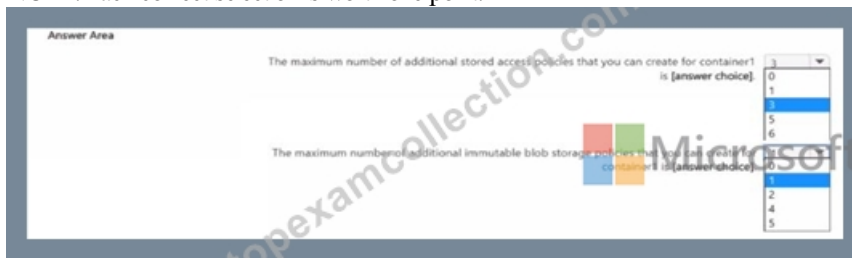

### NEW QUESTION # 129

You have an Azure subscription that contains the storage account shown in the following exhibit.

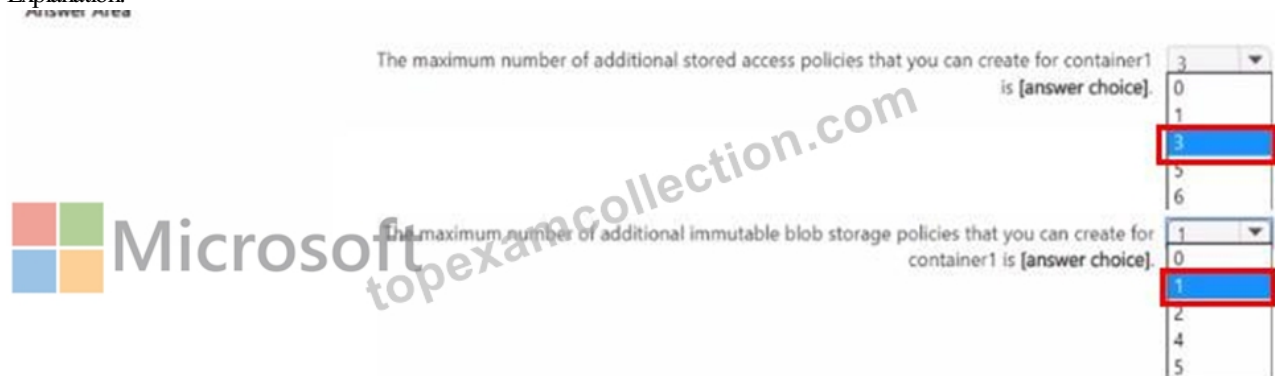

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

**Explanation:**

## NEW QUESTION # 130
