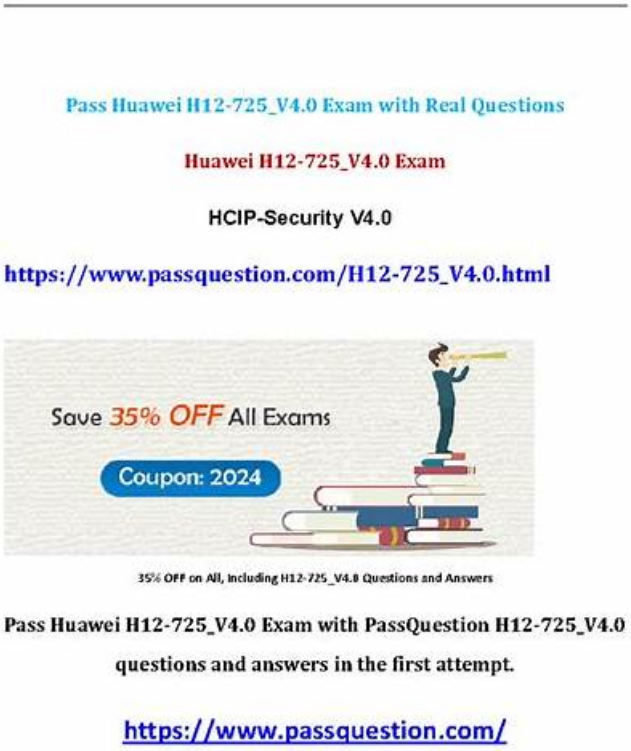
Free PDF 2026 High Hit-Rate H12-725_V4.0: HCIP-Security V4.0 Free Exam



DOWNLOAD the newest VCEPrep H12-725_V4.0 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=18JqtJFw0zJPgvMnEKvARUzu7cDZCU4tv

Our Huawei H12-725_V4.0 practice materials compiled by the most professional experts can offer you with high quality and accuracy HCIP-Security V4.0 H12-725_V4.0 practice materials for your success. Up to now, we have more than tens of thousands of customers around the world supporting our Huawei exam torrent.

If you encounter any questions about our H12-725_V4.0 learning materials during use, you can contact our staff and we will be happy to serve for you. Maybe you will ask if we will charge an extra service fee. We assure you that we are committed to providing you with guidance on H12-725_V4.0 quiz torrent, but all services are free of charge. As for any of your suggestions, we will take it into consideration, and effectively improve our H12-725_V4.0 Exam Question to better meet the needs of clients. In the process of your study, we have always been behind you and are your solid backing. This will ensure that once you have any questions you can get help in a timely manner.

100% Pass Quiz 2026 Huawei H12-725_V4.0 Useful Free Exam

Every year, countless Huawei aspirants face challenges to prove their skills and knowledge by attempting the Huawei H12-

725_V4.0 certification exam. Once they pass this examination, lucrative job opportunities in the tech industry await them. But fear not! VCEPrep has got you covered with their collection of real and updated H12-725_V4.0 Exam Questions. These affordable H12-725_V4.0 questions are available in three user-friendly formats, ensuring a smooth and efficient preparation experience for the H12-725_V4.0 exam.

Huawei HCIP-Security V4.0 Sample Questions (Q53-Q58):

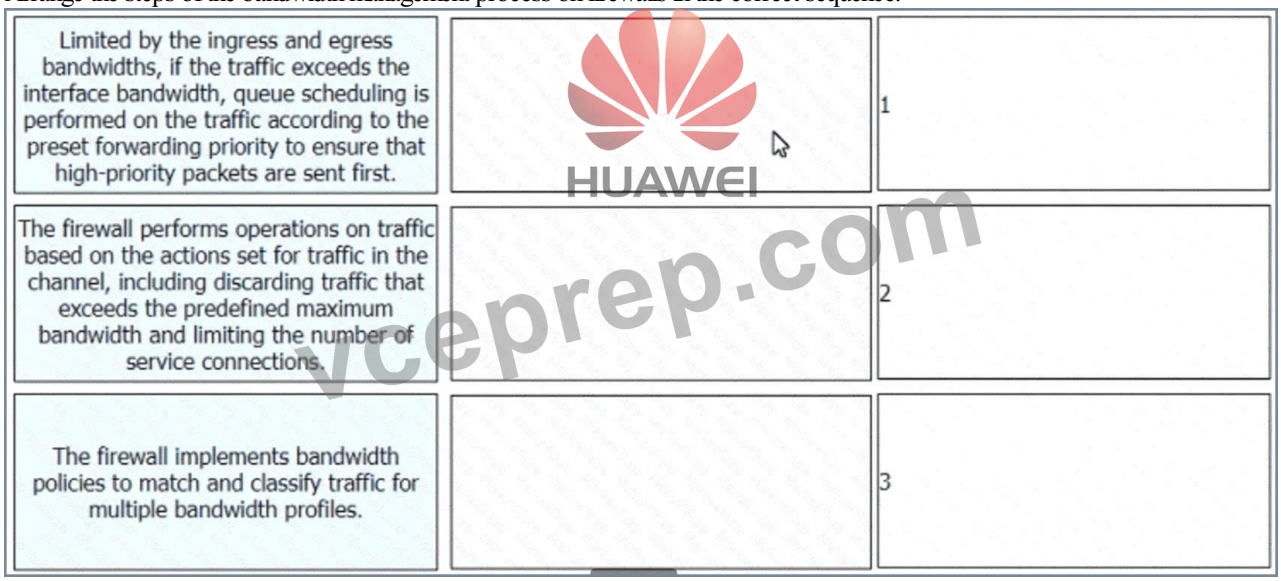
NEW QUESTION # 53
Which of the following is not a response action for abnormal file identification?

- A. Allow
- B. Delete
- C. Alert
- D. Block

Answer: A

Explanation:
Comprehensive and Detailed Explanation:
* Response actions for abnormal file identification in Huawei firewalls include:
* A. Alert# Logs the event but does not stop the file.
* B. Block# Prevents the file from being accessed or downloaded.
* D. Delete# Removes the malicious file before it reaches the user.
* Why is C incorrect?
* Allowing an identified abnormal file defeats the purpose of security enforcement.
HCIP-Security References:
* Huawei HCIP-Security Guide # File Anomaly Detection & Response

NEW QUESTION # 54
Arrange the steps of the bandwidth management process on firewalls in the correct sequence.



Answer:

Explanation:

Limited by the ingress and egress bandwidths, if the traffic exceeds the interface bandwidth, queue scheduling is performed on the traffic according to the preset forwarding priority to ensure that high-priority packets are sent first.	The firewall implements bandwidth policies to match and classify traffic for multiple bandwidth profiles.	1
The firewall performs operations on traffic based on the actions set for traffic in the channel, including discarding traffic that exceeds the predefined maximum bandwidth and limiting the number of service connections.	The firewall performs operations on traffic based on the actions set for traffic in the channel, including discarding traffic that exceeds the predefined maximum bandwidth and limiting the number of service connections.	2
The firewall implements bandwidth policies to match and classify traffic for multiple bandwidth profiles.	Limited by the ingress and egress bandwidths, if the traffic exceeds the interface bandwidth, queue scheduling is performed on the traffic according to the preset forwarding priority to ensure that high-priority packets are sent first.	3

Explanation:
A screenshot of a computer screen AI-generated content may be incorrect.

Correct Order	Bandwidth Management Step
1st Step	The firewall implements bandwidth policies to match and classify traffic for multiple bandwidth profiles.
2nd Step	The firewall performs operations on traffic based on the actions set for traffic in the channel, including discarding traffic that exceeds the predefined maximum bandwidth and limiting the number of service connections.
3rd Step	Limited by the ingress and egress bandwidths, if the traffic exceeds the interface bandwidth, queue scheduling is performed on the traffic according to the preset forwarding priority to ensure that high-priority packets are sent first.

HCIP-Security References:
* Huawei HCIP-Security Guide# Bandwidth Management & Traffic Control Policies
* Huawei QoS Configuration Guide# Traffic Classification, Policing, and Queue Scheduling
1##Step 1: Traffic Classification and Bandwidth Policy Matching
* The firewallfirst classifies trafficusing predefined bandwidth policies.
* These policies match traffic based on criteria such assource/destination IP, application type, and protocol.
* This step ensures that each type of traffic is categorized correctly before applying bandwidth restrictions.
2##Step 2: Traffic Processing Based on Bandwidth Policies
* Once traffic is classified,the firewall enforces bandwidth limits and security actions:
* Traffic exceeding the assigned bandwidth is discarded or throttled.
* Service connection limits are enforced to prevent excessive connections per user or application.
3##Step 3: Queue Scheduling and Priority Handling
* If trafficexceeds the available bandwidth, the firewallprioritizes high-priority trafficusing queue scheduling mechanisms.
* Techniques likeWeighted Fair Queuing (WFQ) and Priority Queuing (PQ)ensure thatcritical traffic (e.g., VoIP, business applications) is prioritized over less important traffic (e.g., downloads, streaming).

NEW QUESTION # 55
The difference between DoS attacks and DDoS attacks is that DoS attacks are usually directly initiated by attackers, whereas DDoS attacks are usually initiated by attackers controlling multiple zombies.

- A. FALSE
- B. TRUE

Answer: B

Explanation:
Comprehensive and Detailed Explanation:

* DoS (Denial-of-Service)# A single attacker sends excessive traffic to a target.
* DDoS (Distributed Denial-of-Service)# Uses multiple compromised devices (zombies or botnets) to amplify the attack.
* Why is this statement true?
* DDoS attacks originate from multiple sources (botnets), unlike DoS attacks.
HCIP-Security References:
* Huawei HCIP-Security Guide # DoS vs. DDoS Attacks

NEW QUESTION # 56
In the figure, enterprise A and enterprise B need to communicate securely, and an IPsec tunnel is established between firewall A and firewall B. Which of the following security protocols and encapsulation modes can meet the requirements of this scenario?

- A. ESP; transport mode
- B. AH+ESP; transport mode
- C. AH; tunnel mode
- D. ESP; tunnel mode

Answer: D

Explanation:
1##Understanding the Scenario:
* Enterprise A and Enterprise B communicate over the Internet through an IPsec tunnel.
* Firewall A and Firewall B establish the tunnelto secure traffic between the enterprises.
* The network includes aSource NAT device, meaning IP headers may be modified.
* The goal is to ensure confidentiality, integrity, and authentication of data transmission.
2##Why ESP (Encapsulating Security Payload)?
* ESP (Encapsulating Security Payload)provides:
* Encryption (Confidentiality)# Protects data from eavesdropping.
* Integrity & Authentication# Ensures data is not modified.
* NAT Traversal Support# Works through NAT devices, unlike AH (Authentication Header).
* ESP is the preferred choice for VPN tunnels over the public Internet.
3##Why Tunnel Mode?
* Tunnel Mode encapsulates the entire original IP packet, including headers and payload,adding a new IP header.
* Advantages of Tunnel Mode:
* Protects both the data and the original IP addresses(important for communication over untrusted networks).
* Used in site-to-site VPNswhere private network addresses need to be hidden.
HCIP-Security References:
* Huawei HCIP-Security Guide# IPsec VPN Fundamentals
* Huawei USG Series Firewall Configuration Guide# IPsec ESP vs. AH
* RFC 4301 (Security Architecture for the Internet Protocol)# ESP and Tunnel Mode Usage

NEW QUESTION # 57
When a user accesses the virtual gateway, the user can access the SSL VPN only after the user terminal passes the host check policy.

- A. FALSE
- B. TRUE

Answer: B

Explanation:
Comprehensive and Detailed Explanation:
* Host check policyis a security mechanism inSSL VPNto verifyterminal security compliancebefore granting access.
* It checks for:
* Antivirus software
* Operating system patches
* Running processes
* Security settings
* If the terminal fails the host check, access is denied.
* Why is this statement true?

* A successful host check is required before an SSL VPN session is allowed.
HCIP-Security References:
* Huawei HCIP-Security Guide # SSL VPN Host Check Policy

NEW QUESTION # 58
.....

We have installed the most advanced operation system in our company which can assure you the fastest delivery speed, to be specific, you can get immediately our H12-725_V4.0 training materials only within five to ten minutes after purchase after payment. As soon as you pressed the payment button on our H12-725_V4.0 Exam Questions, you can study right away if you choose to buy the H12-725_V4.0 exam practice from us. We aim to leave no misgivings to our customers so that they are able to devote themselves fully to their studies on H12-725_V4.0 guide materials and they will find no distraction from us.
