Oracle 1Z0-1126-1 Exam Syllabus Topics:

Topic	Details
Topic 1	• Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.

Topic 2	• Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.
Topic 3	• Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.
Topic 4	• Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.
Topic 5	• Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.

Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q62-Q67):

NEW QUESTION # 62
What analytics data is not displayed on the Feedback dashboard?

- A. Guide name
- B. Rating
- C. Search terms
- D. Date/Time

Answer: C

Explanation:
The Feedback dashboard in the OGL console is designed to display data related to user feedback on guides, such as Date/Time (option B) of submissions, Guide name (option C) to identify the content, and Rating (option D) to gauge user satisfaction. These

metrics help administrators and developers assess guide effectiveness and user experience. However, Search terms (option A) are not typically part of the Feedback dashboard, as they relate to how users search for content rather than their feedback on it. Search-related data is more likely found in a Search Terms dashboard or similar analytics tool focused on user navigation behavior, not feedback analysis. Excluding search terms from the Feedback dashboard keeps its focus on evaluative insights rather than discovery patterns, ensuring clarity in its purpose.

NEW QUESTION # 63

What is an example of project goals for go live?

- A. Complete the relevant digital learning in MyLearn.
- B. Assist users in logging in, touring the application, and taking care of essential tasks for day one.
- C. Identify OGL templates that will be relevant and in alignment with the project strategy.

Answer: B

Explanation:
A key go-live project goal is to assist users in logging in, touring the application, and handling essential tasks on day one (option B), ensuring immediate usability and minimal disruption. Identifying templates (option A) is a design-phase activity, while completing digital learning (option C) is preparatory, not a go-live goal. Option B focuses on practical user enablement, aligning with OGL's purpose of guiding users through critical first-day actions, making it a tangible, user-centric target for a successful launch.

NEW QUESTION # 64

What is the standard use of a Base Guide?

- A. You want to familiarize the project team with overall business processes.
- B. You want clear, step-by-step instructions for essential tasks.
- C. You want targeted assistance for specific areas of the host application.

Answer: B

Explanation:
A Base Guide in Oracle Guided Learning (OGL) is a content type designed to deliver clear, step-by-step instructions for completing essential tasks within a host application. It differs from Business Process Training, which focuses on familiarizing teams with overarching processes (option A), and Use Cases, which provide targeted assistance for specific areas (option B). Base Guides are practical tools aimed at enabling end users to perform critical functions efficiently, making them a cornerstone of task-oriented guidance in OGL.

NEW QUESTION # 65

What type of information does Business Process Training deliver?

- A. Tips, beacons, and personalized messages for specific areas
- B. Overview of generic business processes used in Oracle Cloud applications
- C. Step-by-step instructions for common tasks across Oracle Fusion applications

Answer: B

Explanation:
Business Process Training (BPT) in Oracle Guided Learning is designed to provide a high-level overview of generic business processes utilized within Oracle Cloud applications, such as Oracle Fusion. This training aims to familiarize project teams and end users with the foundational workflows and operational frameworks that underpin the applications, rather than focusing on granular, task-specific instructions or contextual tips. Option A (step-by-step instructions) aligns more with Base Guides, which are task-oriented, while option B (tips and beacons) corresponds to Smart Tips or Use Cases, which offer targeted, situational guidance. BPT's purpose is educational and process-centric, helping teams understand the "big picture" of how processes like procurement, financials, or HR operate across Oracle Cloud, making option C the correct choice. This broad perspective supports content development and process refinement by establishing a common understanding among stakeholders.

NEW QUESTION # 66

Which type of project document is an integral part of your Change Management documentation?

- A. Business Process Documentation
- B. Fusion Security Roles Documentation
- C. Business Impact Analysis
- D. Communications Plan

Answer: D

Explanation:
A Communications Plan is integral to Change Management documentation in OGL projects, as it outlines how changes are communicated to stakeholders. While Business Impact Analysis (option A) and Business Process Documentation (option D) support change management, they are not core components. Fusion Security Roles (option B) is technical documentation, not change-focused.
