As we all know, the influence of 1Z0-1042-25 exam guides even have been extended to all professions and trades in recent years. Passing the 1Z0-1042-25 exam is not only for obtaining a paper certification, but also for a proof of your ability. Most people regard Oracle certification as a threshold in this industry, therefore, for your convenience, we are fully equipped with a professional team with specialized experts to study and design the most applicable 1Z0-1042-25 exam prepare. We have organized a team to research and study question patterns pointing towards various learners. Our company keeps pace with contemporary talent development and makes every learners fit in the needs of the society. Based on advanced technological capabilities, our 1Z0-1042-25 Study Materials are beneficial for the masses of customers. Our experts have plenty of experience in meeting the requirement of our customers and try to deliver satisfied 1Z0-1042-25 exam guides to them. Our 1Z0-1042-25 exam prepare is definitely better choice to help you go through the test.

Oracle 1Z0-1042-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.
Topic 2	<ul style="list-style-type: none">Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.
Topic 3	<ul style="list-style-type: none">Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.
Topic 4	<ul style="list-style-type: none">Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.
Topic 5	<ul style="list-style-type: none">Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.

1Z0-1042-25 Brain Exam - Dump 1Z0-1042-25 File

All contents are masterpieces from experts who imparted essence of the exam into our 1Z0-1042-25 practice materials. So our high quality and high efficiency 1Z0-1042-25 practice materials conciliate wide acceptance around the world. By incubating all useful content 1Z0-1042-25 practice materials get passing rate from former exam candidates of 98 which evince our accuracy rate and proficiency. If your problems are divulging during the review you can pick out the difficult one and focus on those parts.

Oracle Cloud Infrastructure 2025 Application Integration Professional Sample Questions (Q70-Q75):

NEW QUESTION # 70

In the context of Oracle Integration (OIC), what is the primary purpose of "connections"?

- A. To monitor system performance and application health
- B. To create custom user interfaces for applications
- C. To manage user roles and access permissions
- **D. To specify the source and target applications that an integration connects**

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

Connections:

C:True-define integration endpoints.

NEW QUESTION # 71

Oracle Integration Cloud (OIC) integrations can be exported so that later they can be imported into another OIC instance environment. Which statement is NOT true about the import and export of OIC integrations?

- A. Imported integrations can be reconfigured to use different connection resources by using the OIC REST API.
- B. Imported integrations cannot be immediately activated if their dependent connection resources are not already present in the target OIC environment.
- **C. Integrations must be exported as a package if you want to import them into another OIC environment.**
- D. Exported integrations include all their dependent connection resource information except URLs and credentials.

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

OIC supports exporting and importing integrations for migration or backup:

Option A:True-activation requires all dependent connections (e.g., adapters) to exist in the target environment; otherwise, manual configuration is needed.

Option B:True-exported integrations (IAR files) include connection metadata but exclude sensitive data like URLs and credentials for security.

Option D:True-the OIC REST API allows post-import reconfiguration of connections.

NEW QUESTION # 72

What are the four steps required to complete the task 'create a connection'?

- A. Configure Lookup
- **B. Configure Connection Properties**
- **C. Select an Adapter**
- D. Import SSL Certificate

- E. Configure Connection Security
- F. Test Connection

Answer: B,C,E,F

Explanation:

The four steps to creating a connection are selecting an adapter, configuring connection properties, configuring security, and testing the connection. Importing SSL certificates and configuring lookups are optional tasks.

NEW QUESTION # 73

One of your downstream applications is becoming overwhelmed with too many individual synchronous invocations from your current Oracle Integration (OIC) integration. It is recommended that you redesign the integration to take advantage of the batch processing capabilities of that application. Which approach is a valid OIC design best practice that will provide the best solution for this issue?

- A. Use the Append option in the Write File operation of the Stage File action within a loop to create a single batch file to be sent to the application.
- B. Reactivate the integration and use the disable tracing and message tracking option, which will optimize performance for each invocation to the application.
- C. Throttle the individual synchronous calls by adding a wait activity prior to each invocation to the application within the loop, then fetch a batch response after the loop.
- D. Create a custom batch call function, register the function as a Library in your OIC environment, then use the JavaScript call action to invoke the application.

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

Batch Processing:

C:True-Stage File batches efficiently.

NEW QUESTION # 74

Which four are key features of Oracle Integration Cloud Enterprise (OIC)?

- A. Enterprise Service Bus (ESB)
- B. Business to Business (B2B)
- C. Web and Mobile application creation
- D. OCI VPC endpoints
- E. Application Integration
- F. Data stream analytics

Answer: A,B,E,F

Explanation:

The four key features of Oracle Integration Cloud Enterprise (OIC) are:

Application Integration: OIC excels at integrating various applications, on-premises systems, and cloud services.

Enterprise Service Bus (ESB): OIC provides a central hub for managing communication between services, enabling message routing, transformation, and security enforcement.

Business to Business (B2B): OIC enables secure and reliable B2B communication.

Stream Analytics: OIC includes Stream Analytics, which allows real-time event analysis in Apache Spark-based systems.

Web and Mobile Application Creation is not a direct feature of OIC.

OCI VPC Endpoints enhance security but are not core to OIC itself.

NEW QUESTION # 75

.....

The three versions of our 1Z0-1042-25 exam questions are PDF & Software & APP version for your information. Each one has its indispensable favor respectively. All 1Z0-1042-25 training engine can cater to each type of exam candidates' preferences. Our 1Z0-1042-25 practice materials call for accuracy legibility and high quality, so 1Z0-1042-25 study braindumps are good sellers and
