

# LEED-Green-Associate Prüfungsfragen, LEED-Green-Associate Fragen und Antworten, LEED Green Associate Exam

## LEED Green Associate Sample Exam Questions&Answers

What rules should be used when selecting a LEED rating system when more than one system may apply? - ✓ 40/60  
Use the rating system that is most applicable

To verify the compliance of a credit or prerequisite, a qualified member of the project team submits this - ✓ Credit Forms

This source consumes the largest amount of energy in buildings - ✓ Space Heating

Legal protection of the ozone layer in the US is provided by this - ✓ Montreal Protocol

2009 LEED rating systems, except LEED for Homes and LEED for ND, have what 3 structures? - ✓ Credits, Minimum Program Requirements, Prerequisites

The Energy Policy Act establishes what flush rate as the baseline water consumption for water closets? - ✓ 1.6 gallons per flush

The Triple Bottom Line evaluates the human and environmental effects associated with these - ✓ Social, economics, and environment

Construction and demolition debris cannot include 2 of these items - ✓ Rock, Soil

To qualify as a regional material, within what distance must a material be extracted, harvested, or recovered, and manufactured? - ✓ 500 miles

For storage and collection of recyclables, a building recycling program must include these items: - ✓ Plastic, Cardboard, Metal

To two primary responsibilities of the Green Building Certification Institute (GBCI) are: - ✓ Provides third party LEED professional credentialing, Provides third part LEED project certification

Regional Priority credits are made available to the project for - ✓ The zip code of the geographic location of the project

The LEED project boundary is defined as - ✓ The boundary description that is submitted for certification

Liebe Kandidaten, haben Sie schon mal gedacht, sich an der Kurse für die USGBC LEED-Green-Associate Zertifizierungsprüfung beteiligen? Eigentlich können Sie Maßnahmen treffen, die Prüfung nur einmal zu bestehen. Die Schulungsunterlagen von PrüfungFrage ist eine gute Wahl. Das virtuelle Internet-Training und die Kurse enthalten viele USGBC LEED-Green-Associate Prüfungsaufgaben, die Ihnen zum erfolgreichen Bestehen der Prüfung verhelfen.

## USGBC LEED-Green-Associate Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> <li>Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.</li> </ul>

Thema 2	<ul style="list-style-type: none"> <li>• <b>Energy and Atmosphere:</b> This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>• <b>Sustainable Sites:</b> This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.</li> </ul>
Thema 4	<ul style="list-style-type: none"> <li>• <b>Location and Transportation:</b> This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.</li> </ul>
Thema 5	<ul style="list-style-type: none"> <li>• <b>Project Surroundings and Public Outreach:</b> This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.</li> </ul>
Thema 6	<ul style="list-style-type: none"> <li>• <b>Integrative Strategies:</b> This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.</li> </ul>
Thema 7	<ul style="list-style-type: none"> <li>• <b>Materials and Resources:</b> This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.</li> </ul>
Thema 8	<ul style="list-style-type: none"> <li>• <b>LEED Process:</b> This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.</li> </ul>

## LEED-Green-Associate Prüfungen, LEED-Green-Associate Übungsmaterialien

Die Schulungsunterlagen zur USGBC LEED-Green-Associate Zertifizierungsprüfung aus PrüfungFrage sind nicht nur echt, sondern auch preiswert. Nach dem Kauf unserer Prüfungsmaterialien werden Sie einjährige Aktualisierung genießen. Sie können einen Teil von den kostenlosen originalen Fragen herunterladen, bevor Sie die Schulungsunterlagen zur USGBC LEED-Green-Associate Zertifizierungsprüfung aus PrüfungFrage kaufen. Wenn Sie die USGBC LEED-Green-Associate Prüfung nicht bestehen oder die Schulungsunterlagen zur USGBC LEED-Green-Associate Zertifizierungsprüfung irgend ein Problem haben, geben wir Ihnen eine bedingungslose volle Rückerstattung.

### USGBC LEED Green Associate Exam LEED-Green-Associate Prüfungsfragen mit Lösungen (Q276-Q281):

#### 276. Frage

Strategically locating functional and decorative hardscape on a project site may reduce the amount of on-site

- A. impervious area
- B. pervious area
- C. waste area
- D. sensitive area

**Antwort: A**

Begründung:

Strategically locating functional and decorative hardscape on a project site can reduce the amount of on-site impervious area.

Impervious surfaces are surfaces that do not allow water to infiltrate into the ground (e.g., concrete or asphalt). By reducing these surfaces, we can increase water infiltration, which helps recharge groundwater supplies and reduces stormwater runoff that can lead to erosion and water pollution. References:

LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

### 277. Frage

Which statement is the U.S. Green Building Council vision?

- A. Meeting the goals of the Paris Agreement and improving the lives of millions of citizens through better buildings
- B. To transform the building and construction sector across three strategic areas - climate action, health and wellbeing and resources and circularity
- C. A transformed built environment leading to a sustainable future
- **D. Buildings and communities will regenerate and sustain the health and vitality of all life within a generation**

**Antwort: D**

### 278. Frage

Which of the following has the highest energy consumption in a typical U.S. office building?

- A. Cooling
- B. Water Heating
- **C. Space Heating**
- D. Lighting

**Antwort: C**

Begründung:

According to the U.S. Energy Information Administration, space heating accounted for about 32% of energy use for all U.S. commercial buildings in 2018, followed by ventilation and lighting, each at about 10%<sup>1</sup>. Space heating is the largest single energy end use in U.S. office buildings as well<sup>2</sup>.

Reference:

Use of energy in commercial buildings - U.S. Energy Information Administration (EIA)<sup>1</sup> DataTrends: Energy Use in Office Buildings | ENERGY STAR<sup>2</sup>

### 279. Frage

Limiting the concentration of which of the following substances protects the health of construction personnel?

- A. Compostable materials
- B. Biomass
- C. CFC refrigerants
- **D. vocs**

**Antwort: D**

Begründung:

vocs are volatile organic compounds that can evaporate from paints, solvents, adhesives, and other building materials. They can cause health problems such as eye irritation, respiratory distress, headaches, and cancer. Limiting the concentration of vocs in the air protects the health of construction personnel by reducing their exposure to these harmful substances<sup>12</sup>.

1910.1450 - Occupational exposure to hazardous chemicals in laboratories. | Occupational Safety and Health Administration

### 280. Frage

Which of the following contribute to the triple bottom line?

- **A. Social responsibility**

- B. Global security
- C. Project balance sheet
- D. Green metrics and verification

**Antwort: A**

Begründung:

Social responsibility is one of the factors that contribute to the triple bottom line. The triple bottom line is a framework that measures the performance of an organization or a project based on three dimensions:

environmental, social, and economic. Social responsibility refers to the ethical obligation of an organization or a project to consider the impacts of its decisions and actions on society and stakeholders, such as employees, customers, communities, and future generations. The other options are not factors that contribute to the triple bottom line. Global security is a broad concept that encompasses various aspects of international relations, such as peace, human rights, justice, and cooperation. Project balance sheet is a financial statement that summarizes the assets, liabilities, and equity of a project at a given point in time. Green metrics and verification are tools and methods that quantify and validate the environmental performance of a project or a product.
