Exam C-TS422-2023 Question, Latest C-TS422-2023 Test Preparation

Our company boosts top-ranking expert team, professional personnel and specialized online customer service personnel. Our experts refer to the popular trend among the industry and the real exam papers and they research and produce the detailed information about the C-TS422-2023 exam study materials. They constantly use their industry experiences to provide the precise logic verification. The C-TS422-2023 prep material is compiled with the highest standard of technology accuracy and developed by the certified experts and the published authors only. And you will be bound to pass the C-TS422-2023 exam with them.

Allowing for the different bents of exam candidate, we offer three versions of our C-TS422-2023 learning braindumps for you. They are app, software and pdf versions of our C-TS422-2023 training questions. All crucial points are included in the C-TS422-2023 Exam Materials with equivocal contents for your reference with stalwart faith. And we also have the according three free demos of the C-TS422-2023 practice engine for you to download before your purchase.

Pass Guaranteed Newest SAP - C-TS422-2023 - Exam SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Question

There a galaxy of talents in the 21st century, but professional SAP talents not so many. Society need a large number of professional SAP talents. Now C-TS422-2023 certification exam is one of the methods to inspect the employees' ability, but it is not so easy to is one of the way to IT certification exams. Generally, people who participate in the C-TS422-2023 certification exam should choose a specific training course, and so choosing a good training course is the guarantee of success. DumpStillValid's training course has a high quality, which its practice questions have 95% similarity with real examination. If you use DumpStillValid's product to do some simulation test, you can 100% pass your first time to attend C-TS422-2023 Certification Exam.

SAP C-TS422-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Master Data in SAP S • 4HANA: This section covers the exploration of crucial production-related master data elements, with emphasis on bill of material, routing, and production version.
Topic 2	• Advanced Planning in SAP S • 4HANA: This section includes an overview of advanced planning fundamentals and master data. Explanation of key tools and processes. Discussion of planning evaluation concepts.

Topic 3	• Lean Manufacturing in SAP S • 4HANA: This section covers repetitive manufacturing master data, line load planning, and Kanban systems.
Topic 4	• Material Requirements Planning in SAP S • 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.
Topic 5	• Introduction to SAP S • 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S • 4HANA, its main components, business applications, and user experience strategy.
Topic 6	• Capacity Planning in SAP S • 4HANA: This section covers a discussion of SAP S • 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
Topic 7	• Demand Management in SAP S • 4HANA: This section covers a comparison of production methods in various manufacturing environments.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q23-Q28):

NEW QUESTION # 23
You want to set up a make-to-order planning scenario for a finished material. The bill of material contains two components: one should be procured for each sales order individually, and the other should be procured jointly for all independent requirements Forecasting for the finished product is NOT possible. Which settings do you make to achieve this?

- A. Choose planning strategy 50 (Planning without final assembly) and select the - corresponding Individual/Collective indicator.
- B. Choose planning strategy 50 (Planning without final assembly) and select the corresponding Mixed MRP indicator.
- C. Choose planning strategy 20 (Make-to-Order) and select the corresponding ndividual/Collective indicator.
- D. Choose planning strategy 20 (Make-to-Order) and select the corresponding Mixed MRP indicator.

Answer: C

Explanation:
To set up a make-to-order planning scenario for a finished material, you need to choose planning strategy 20 (Make-to-Order) and select the corresponding Individual/Collective indicator for the components in the bill of material. This way, you can control whether the components are procured individually or collectively for the sales orders. The following steps explain how to achieve this:
In the material master record of the finished material, you need to select the MRP type PD (MRP) and the strategy group 20 (Make-to-Order) in the MRP 1 view. This means that the finished material is planned based on the sales order requirements and not on the forecast12.
In the bill of material of the finished material, you need to select the Individual/Collective indicator for each component. This indicator determines whether the component is procured individually for each sales order or collectively for all independent requirements. For the component that should be procured for each sales order individually, you need to select the indicator 2 (Individual requirements only). For the component that should be procured jointly for all independent requirements, you need to select the indicator 1 (Collective requirements only)3 .
When you create a sales order for the finished material, the system generates a sales order item and a planned independent requirement for the finished material. The planned independent requirement is used as a planning element in MRP and triggers the procurement of the components according to the Individual/Collective indicator. For the component with indicator 2, the system creates a dependent requirement that is linked to the sales order item. For the component with indicator 1, the system creates an independent requirement that is not linked to the sales order item .

NEW QUESTION # 24
You want to create a production order. What methods can you use?
Note: There are 2 correct answers to this question.

- A. Create without material
- B. Convert a purchase requisition
- C. Create by order release
- D. Create in Kanban process

Answer: A,D

NEW QUESTION # 25
For a production version to be valid and consistent, what requirements must be fulfilled? Note: There are 3 correct answers to this question.

- A. The deletion flag must NOT be set for the bill of material (BOM) or the routing
- B. The assigned routing and bill of material (BOM) must be valid in the entirevalidity period.
- C. The lot size range must be within the lot size range of the assigned routing.
- D. The assigned routing must NOT have alternative sequences
- E. The assigned routing must be a rate routing.

Answer: A,B,C

Explanation:
A production version is a combination of a BOM and a routing that defines how a material is produced. For a production version to be valid and consistent, the following requirements must be fulfilled:
The deletion flag must NOT be set for the BOM or the routing. The deletion flag indicates that the BOM or the routing is no longer used and should be archived. If the deletion flag is set, the production version cannot be used for production planning or execution.
The lot size range must be within the lot size range of the assigned routing. The lot size range specifies the minimum and maximum order quantity for which the production version is valid. The lot size range of the production version must match or be smaller than the lot size range of the routing, otherwise the system will not find a suitable routing for the production order.
The assigned routing and BOM must be valid in the entire validity period. The validity period defines the time frame for which the production version is valid. The validity period of the production version must be within or equal to the validity periods of the routing and the BOM, otherwise the system will not find a consistent BOM and routing combination for the production order. Reference: [SAP S/4HANA Production Planning and Manufacturing Certification Guide], page 113; [SAP Help Portal: Production Version].

NEW QUESTION # 26
You have maintained the parameters for simple discontinuation in the material master of a component.
Which business process will be affected if the available stock is zero the discontinuation date is in the past?

- A. Production order release
- B. Material requirements planning
- C. Back flushing
- D. Kanban

Answer: B

NEW QUESTION # 27
What does the material type influence? Note: There are 2 correct answers to this question.

- A. Which document types and class categories are allowed
- B. Which material master screens appear and in which sequence
- C. Whether the material is produced in-house, procured externally, or both

- D. Which plant-specific and plant-independent statuses are allowed

Answer: A,B

Explanation:
The material type in SAP S/4HANA (selected in MM01, configured via OMS2) defines a material's properties and behavior:
* Which document types and class categories are allowed(A): Material type determines which business documents (e.g., purchase orders, production orders) can be created and which classification categories (e.g., batch, variant) apply. For example, "FERT" allows production orders, while "NLAG" (non-stock) restricts inventory documents (configured in Logistics - General > Material Master > Define Attributes of Material Types).
* Which material master screens appear and in which sequence(C): Material type controls the views available in the material master (e.g., MRP for "FERT," no Sales view for "ROH") and their order, based on Customizing (OMS2, field selection and view sequence). This tailors the interface to the material's purpose.
Plant-specific and plant-independent statuses(B) are managed via material status (Basic Data view), not material type-type defines broader attributes.Whether produced in-house or procured(D) is set by the Procurement Type (MRP 2 view), not directly by material type, though type may imply defaults (e.g., "ROH" for procurement). This is per SAP's material type definition.

NEW QUESTION # 28

......

The paper materials students buy on the market are often not able to reuse. After all the exercises have been done once, if you want to do it again you will need to buy it again. But with C-TS422-2023 test question, you will not have this problem. All customers who purchased C-TS422-2023 study tool can use the learning materials without restrictions, and there is no case of duplicate charges. For the PDF version of C-TS422-2023 test question, you can print multiple times, practice multiple times, and repeatedly reinforce your unfamiliar knowledge. For the online version, unlike other materials that limit one person online, C-TS422-2023 learning dumps does not limit the number of concurrent users and the number of online users. You can practice anytime, anywhere, practice repeatedly, practice with others, and even purchase together with othersC-TS422-2023 learning dumps make every effort to help you save money and effort, so that you can pass the exam with the least cost.
