

Perfect UiPath-ADAv1 Sample Test Online & Excellent UiPath Certification Training - Excellent UiPath UiPath Automation Developer Associate v1 Exam

UIPATH-ADAV1 PRACTICE TEST QUESTIONS AND ANSWERS

UiPath Certified Professional Automation Developer Associate - answer UiPath Certified Professional Automation Developer Associate is expected to be able to (1) independently design and develop simple Automation solutions or (2) be a productive member of an automation team led by an experienced Automation Developer responsible for developing complex solutions using UiPath technologies. This exam assesses knowledge and skills related to problem solving, process identification, and building simple automation solutions with UiPath platform components such as UiPath Studio, Robots, and Orchestrator.

Exam Details - answer Certification Tracks: UiPath Certified Professional - Developer Track
 Credential: UiPath Certified Professional Automation Developer Associate v1.0
 Valid Period: 3 years
 Exam Number and Exam Title: UiPath-ADAv1 - UiPath Automation Developer Associate v1.0
 Exam Pre-requisite Exam(s) and/or Certification(s): None. Some Hands-on experiences with UiPath Studio are recommended.
 Exam Duration: 90 minutes
 Passing Score: 70%
 Exam Fee: \$150.00

Exam Domains/Exam Sections - answer The Automation Developer Associate v1.0 Exam contains the following exam sections:
 • Business Knowledge
 • Platform Knowledge
 • Studio Interface
 • Variables and Arguments
 • Control Flow
 • Debugging
 • Exception Handling
 • Logging
 • UI Automation
 • Object Repository
 • Excel Automation
 • Email Automation
 • PDF Automation
 • Working with Files and Folders
 • Data Manipulation
 • Version Control Integration
 • Libraries and Templates
 • Workflow Analyzer
 • Implementation Methodology
 • Orchestrator
 • Integration Service

The UiPath Automation Developer Associate v1 Exam (UiPath-ADAv1) practice test software also shows changes and improvements done by the candidates on every step during the UiPath-ADAv1 exam. So this reduces your chance of failure in the actual UiPath-ADAv1 Exam. It requires no special plugins to function properly. So just start your journey with Prep4cram and prepare for the UiPath-ADAv1 exam instantly.

UiPath UiPath-ADAv1 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"> Version Control Integration: The section highlights the benefits of version control by demonstrating the use of Studio's Git integration for adding projects, cloning repositories, committing changes, and managing branches. |
| Topic 2 | <ul style="list-style-type: none"> Integration Service: The section introduces Integration Service, explaining its purpose and demonstrating the use of connectors and triggers in automation projects to interact with external systems. |

| | |
|----------|---|
| Topic 3 | <ul style="list-style-type: none"> Platform Knowledge: The section provides an overview of UiPath's product suite, including Studio and Robot variants, Orchestrator, and Integration Service, showcasing their unique contributions. It also emphasizes the benefits of Academy, Forum, and Marketplace in the UiPath ecosystem. |
| Topic 4 | <ul style="list-style-type: none"> Working with Files and Folders: Here, you explore creating, managing, and navigating local files and folders, providing a foundation for file system automation. |
| Topic 5 | <ul style="list-style-type: none"> Object Repository: This topic covers the creation, publication, and consumption of UI Libraries, including the use of static and dynamic descriptors, offering a structured approach to UI element management. |
| Topic 6 | <ul style="list-style-type: none"> Variables and Arguments: This topic introduces data types and delves into creating, managing, and utilizing variables, arguments, and global constants variables. It also clarifies the distinctions between these concepts, ensuring a comprehensive understanding of data handling in automation projects. |
| Topic 7 | <ul style="list-style-type: none"> Control Flow: The section explains the functionality of control flow activities and their impact on workflow types. It covers the use of sequence and flowchart layouts. Lastly, it focuses on implementing IF, For Each, and While activities, among others. |
| Topic 8 | <ul style="list-style-type: none"> Excel Automation: The section delves into Excel Automation, showcasing the use of modern Excel activities and workbook-level operations. |
| Topic 9 | <ul style="list-style-type: none"> Workflow Analyzer: Here, the topic introduces the Workflow Analyzer tool, explaining its use for project analysis and validation, and providing guidance on configuring its settings. |
| Topic 10 | <ul style="list-style-type: none"> PDF Automation: The section focuses on data extraction from native and scanned PDFs, including single and multiple document scenarios. |
| Topic 11 | <ul style="list-style-type: none"> Logging: The section provides insights into interpreting robot execution logs and adhering to logging best practices, ensuring effective issue identification and resolution. |
| Topic 12 | <ul style="list-style-type: none"> Implementation Methodology: The section offers an overview of project implementation stages, interpretation of PDDs and SDDs, and the conduct of automation project peer reviews, ensuring a structured approach to development. |
| Topic 13 | <ul style="list-style-type: none"> Email Automation: This topic covers retrieving emails via IMAP POP3, sending SMTP messages, and managing integrations with Microsoft and Gmail accounts, utilizing their respective packages. |
| Topic 14 | <ul style="list-style-type: none"> Orchestrator: This topic covers the definition of Orchestrator entities, tenant entities, and folder entities, along with their respective functionalities. It also provides practical guidance on robot provisioning, workspace management, role assignments, and logging features. |
| Topic 15 | <ul style="list-style-type: none"> Business Knowledge: This topic covers the fundamental concepts of business process automation, highlighting its value proposition. It also explores key ideas related to business processes, offering a comprehensive understanding of this domain. |
| Topic 16 | <ul style="list-style-type: none"> Data Manipulation: This topic covers a range of data manipulation techniques, including string manipulation using VB.Net methods and the RegEx Builder. It also guides users through working with arrays, lists, and dictionaries, as well as building and iterating through Data Tables. |

UiPath-ADAv1 New Practice Questions, Valid UiPath-ADAv1 Exam Camp Pdf

Good product can was welcomed by many users, because they are the most effective learning tool, to help users in the shortest possible time to master enough knowledge points, so as to pass the qualification test, and our UiPath-ADAv1 learning dumps have always been synonymous with excellence. Our UiPath-ADAv1 practice guide can help users achieve their goals easily, regardless of whether you want to pass various qualifying examination, our products can provide you with the learning materials you want. Of course, our UiPath-ADAv1 Real Questions can give users not only valuable experience about the exam, but also the latest information about the exam. Our UiPath-ADAv1 practical material is a learning tool that produces a higher yield than the other. If you make up your mind, choose us!

UiPath Automation Developer Associate v1 Exam Sample Questions (Q265-Q270):

NEW QUESTION # 265

What is the main benefit of importing profiling sessions?

- A. Disables the analysis of potential flow issues.
- **B. Enables the analysis of potential flow issues.**
- C. Provides context menu options for profiling actions.
- D. Disables focus on imported profiling sessions.

Answer: B

Explanation:

The main benefit of importing profiling sessions is that it enables the analysis of potential flow issues in the automation workflows. By importing profiling sessions, the developer can examine previous runs and compare them with the current run. This can help the developer to identify which workflows or activities take longer to execute, which ones consume more resources, and which ones cause errors or exceptions. The developer can also use the Profiler app to visualize the profiling data and drill down into the details of each operation. This way, the developer can optimize the performance and reliability of the automation workflows and improve the user experience.

NEW QUESTION # 266

In a UiPath State Machine workflow, which section of State activity is used to specify conditional/triggers logic and multiple outgoing transitions in a state machine?

- A. Exit
- B. Transitions
- **C. Triggers**
- D. Entry

Answer: C

Explanation:

The Triggers section of the State activity is used to specify the conditional or trigger logic and multiple outgoing transitions in a state machine. A trigger is a condition that evaluates to true or false and determines whether the state machine should move from one state to another. A transition is a link between two states that defines the direction of the state machine flow. You can add multiple triggers and transitions to a state and configure their properties, such as priority, display name, and action. (UiPath Studio documentation)

NEW QUESTION # 267

Which of the following properties is optional when creating a new argument?

- A. Direction
- B. IsRequired
- **C. Default value**
- D. Argument type

Answer: C

Explanation:

Arguments have mandatory and optional properties.

* Mandatory Properties:

* Argument Type # Defines the data type (String, Int32, etc.).

* Direction # Determines how the argument is used (In, Out, In/Out).

* Optional Properties:

* Default Value # Can be left empty, meaning it is not required.

* IsRequired # Not all arguments must be required.

Why is A Correct?

Default Value is optional because:

* Not all arguments need a predefined value.

* Some arguments get values dynamically at runtime.

NEW QUESTION # 268

After generating a strict selector using the Indicate target on screen option within a Click activity, what should the developer utilize to view the complete list of attributes for the targeted UI element?

- A. Output Panel
- **B. Open in UI Explorer**
- C. Properties Panel
- D. Debug Mode

Answer: B

Explanation:

To view the complete list of attributes for the targeted UI element after generating a selector, the developer should use the "Open in UI Explorer" option. UI Explorer is a tool that provides a detailed view of the UI elements' properties and their full selectors. It allows for editing, validating, and testing selectors for better accuracy and reliability. Therefore, the correct answer is B.

UiPath Studio Guide: UI Explorer

NEW QUESTION # 269

A developer is using a Type into activity to enter details into a web form. The developer notices that the selector for the text field is unreliable. The selector that is shown in the exhibit currently targets both a text label and a text field at runtime. Only one additional Property needs to be clicked to ensure the selector targets only the First Name text field at runtime.

Instructions: Click the additional Property checkbox in the following UI Explorer "Unselected Items" column that should be used for the First Name text field.

Answer:

Explanation:

□ Explanation:

To ensure the selector targets only the First Name text field at runtime, you need to click the additional Property checkbox for ID in the UI Explorer Unselected Items column. This will add the ID attribute to the selector, which is a unique identifier for the text field element. The ID attribute has the value "firstname" for the First Name text field, as shown in the image. This will make the selector more reliable and specific, and avoid targeting the text label or other elements with the same class or tag.
