300-710 Exam Questions and Securing Networks with Cisco Firepower Torrent Prep - 300-710 Test Guide

All 300-710 test prep is made without levity and the passing rate has up to 98 to 100 percent now. We esteem your variant choices so all these versions of 300-710 exam guides are made for your individual preference and inclination. We know that tenet from the bottom of our heart, so all parts of service are made due to your interests. You are entitled to have full money back if you fail the exam even after getting our 300-710 Test Prep. Our staff will help you with genial attitude.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q95-Q100):

NEW QUESTION # 95

Which two characteristics represent a Cisco device operating in tap mode? (Choose two.)

- A. If a rule is triggered the device drops the packet
- B. If a rule is triggered the device generates an intrusion event.
- C. The device is deployed in a passive configuration
- D. It analyzes copies of packets from the packet flow
- E. The packet flow traverses the device

Answer: D,E

Explanation:

The two characteristics that represent a Cisco device operating in tap mode are:

A: It analyzes copies of packets from the packet flow.

D: The packet flow traverses the device.

In tap mode, a Cisco device creates a copy of the traffic flowing through it, which can then be analyzed by a monitoring device. The original traffic is not affected, and continues to flow through the network as normal.

NEW QUESTION # 96

Which command should be used on the Cisco FTD CLI to capture all the packets that hit an interface?

- **A. capture**
- B. capture WORD
- C. configure coredump packet-engine enable
- D. capture-traffic

Answer: A

Explanation:

Reason: the command "capture-traffic" is used for SNORT Engine Captures. To capture a LINA Engine Capture, you use the "capture" command. Since the Lina Engine represents the actual physical interface of the device, "capture" is the only reasonable choice Reference:

<https://www.cisco.com/c/en/us/support/docs/security/firepower-ngfw/212474-working-with-firepower-threat-def> The command is
firepower# capture DMZ interface dmz trace detail match ip host 192.168.76.14 host 192.168.76.100 firepower# capture INSIDE
interface inside trace detail match ip host 192.168.76.14 host 192.168.75.14

NEW QUESTION # 97

A security engineer is configuring an Access Control Policy for multiple branch locations. These locations share a common rule set and utilize a network object called INSIDE_NET which contains the locally significant internal network subnets at each location. What technique will retain the policy consistency at each location but allow only the locally significant network subnet within the application rules?

- A. creating a unique ACP per device
- B. utilizing policy inheritance
- C. utilizing a dynamic ACP that updates from Cisco Talos
- **D. creating an ACP with an INSIDE_NET network object and object overrides**

Answer: D

Explanation:

Section: Configuration

NEW QUESTION # 98

Refer to the exhibit.

□ A systems administrator conducts a connectivity test to their SCCM server from a host machine and gets no response from the server. Which action ensures that the ping packets reach the destination and that the host receives replies?

- A. Create an ICMP allow list and add the ICMP destination to remove it from the implicit deny list.
- B. Modify the Snort rules to allow ICMP traffic.
- **C. Create an access control policy rule that allows ICMP traffic.**
- D. Configure a custom Snort signature to allow ICMP traffic after Inspection.

Answer: C

NEW QUESTION # 99

Which limitation applies to Cisco Firepower Management Center dashboards in a multidomain environment?

- **A. Child domains cannot view dashboards that originate from an ancestor domain.**
- B. Child domains can view but not edit dashboards that originate from an ancestor domain.

- Answer: A**
