APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q84-Q89):

NEW QUESTION # 84

What defines how well, or to what level a solution needs to perform?

- A. Testable Requirements
- **B. Non-Functional Requirements**
- C. Functional Requirements
- D. Tangible Requirements

Answer: B

Explanation:

Comprehensive and Detailed Explanation (paraphrased from AgilePM/Agile standards; exact long extracts cannot be provided): In AgilePM (and broadly across agile practice), functional requirements describe what the solution should do-capabilities, behaviors, and services. By contrast, non-functional requirements (NFRs) describe how well the solution must perform those functions. NFRs encompass performance, reliability, security, usability, accessibility, supportability, maintainability, and other quality attributes that set objective thresholds (e.g., response times, availability targets, encryption standards). They guide architectural choices, testing strategies, and acceptance criteria, and they are essential to protecting quality during timeboxed delivery and MoSCoW prioritization. Testable acceptance checks can and should be derived from NFRs, but "testable requirements" is not the category name for defining performance levels-the recognized term is Non-Functional Requirements. Therefore, the correct option is B.

NEW QUESTION # 85

Which of the following statements, about selecting the appropriate communication channels for a change initiative, are true?

* If the aim is to achieve active engagement, then rich communication is essential.

* Leaner channels are suitable where there is little chance of misinterpretation.

- A. Only 1 is true.
- B. Neither 1 nor 2 is true.
- C. Only 2 is true.
- **D. Both 1 and 2 are true.**

Answer: D

Explanation:

* Statement 1: Correct. Rich communication channels, such as face-to-face conversations or video calls, are necessary for active engagement as they allow for two-way interaction and emotional connection.

* Statement 2: Correct. Leaner channels, like emails or memos, are appropriate when the message is straightforward and unlikely to be misinterpreted.

* Effective Communication Channels: AgilePM Handbook, Chapter 4, Section 4.3.

NEW QUESTION # 86

Which purpose relates to the instrumental Success Factors?

- A. Informs the development of the Business Case
- **B. Positions DSDM projects for a successful outcome**
- C. Underpins the prioritization of requirements
- D. Inform the development of the Terms of Reference

Answer: B

Explanation:

Instrumental Success Factors (ISFs) in DSDM are crucial as they position projects for a successful outcome. ISFs are the critical elements that must be in place for a DSDM project to succeed. They provide a foundation for effective project management and delivery, ensuring that all necessary conditions are met to support the project's objectives and deliverables.
