Snowflake SnowPro Core Certification Exam Sample Questions (Q303-Q308):

NEW QUESTION # 303
A deterministic query is run at 8am, takes 5 minutes, and the results are cached.
Which of the following statements are true? Choose 2 answers

- A. The same exact query will return the precomputed results if the underlying data hasn't changed and the results were last accessed within the previous 24 hour period
- B. The exact query win ALWAYS return me precomputed result set for the RESULT_CACHE_ACTIVE = time period
- C. The same exact query will return the precomputed results even if the underlying data has changed as long as the results were last accessed within the previous
- D. The "24 hour" on the percomputed results gets renewed every time the exact query is executed

Answer: A,D

NEW QUESTION # 304
What SnowFlake database object is derived from a query specification, stored for later use, and can speed up expensive aggregation on large data sets?

- A. Temporary table
- B. Materialized view
- C. Secure view
- D. External table

Answer: B

Explanation:
A materialized view in Snowflake is a database object derived from a query specification, stored for later use, and can significantly speed up expensive aggregations on large data sets. Materialized views store the result of their underlying query, reducing the need to recompute the result each time the view is accessed. This makes them ideal for improving the performance of read-heavy, aggregate-intensive queries.
