질문 # 41
When should you run Digital Discovery Assessments of an SAP S/4HANA Cloud Public Edition implementation project?

- A. During the Discover phase
- B. After the Realize phase
- C. After each upgrade
- D. During the Deployment phase

정답：A

설명:
The Digital Discovery Assessment (DDA) is a strategic tool used early in the SAP S/4HANA Cloud Public Edition implementation to align customer requirements with SAP capabilities and plan the project effectively.
* Option A: After each upgradeIncorrect. DDAs are not used post-upgrade, as they focus on initial project planning. TheSAP S/4HANA Cloud Implementation Guidestates, "The Digital Discovery Assessment is a pre-implementation tool, not used for post-upgrade evaluations, which rely on testing and monitoring."
* Option B: After the Realize phaseIncorrect. The Realize phase focuses on configuration and testing, not discovery. TheSAP Activate Methodology Guidenotes, "The DDA is conducted before the implementation begins, not after the Realize phase, which is for solution build and validation."
* Option C: During the Discover phaseCorrect. The DDA is run during the Discover phase to assess requirements and define the project scope. TheSAP S/4HANA Cloud Implementation Guideexplains,
"The DigitalDiscovery Assessment is conducted during the Discover phase to capture customer requirements, integration needs, and project timelines, forming the foundation for the implementation."
* Option D: During the Deployment phaseIncorrect. The Deploy phase focuses on go-live and cutover, not discovery activities. TheSAP S/4HANA Cloud Study Guideclarifies, "The Deploy phase is for system activation, not for running assessments like the DDA, which occurs pre-project." Extract from Official Documentation:
* SAP S/4HANA Cloud Implementation Guide(SAP Help Portal,https://help.sap.com): "The Digital Discovery Assessment is a critical activity in the Discover phase, used to gather requirements, assess solution fit, and plan the SAP S/4HANA Cloud Public Edition implementation."
* SAP Activate Methodology Guide(SAP Community,https://community.sap.com): "During the Discover phase, the Digital Discovery Assessment is run to define the project scope, ensuring alignment between customer needs and SAP Best Practices."

Additional Context:
The DDA is a cornerstone of the Discover phase, enabling customers to evaluate SAP S/4HANA Cloud's capabilities and establish a clear implementation roadmap. Its early execution ensures that subsequent phases are grounded in a well-defined scope, reducing risks and misalignments.

- B. Extending SAP S/4HANA using SAP ABAP Development Workbench.
- C. Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub.
- D. SAP S/4HANA extensions are context-aware and focused on tight integration.

정답：C

설명:
Side-by-Side extensibility is a key approach in SAP S/4HANA Cloud Public Edition to extend functionality while maintaining cloud compliance, leveraging external platforms and APIs to avoid modifying core system code.
* Option A: SAP S/4HANA extensions are context-aware and focused on tight integration.Incorrect.
While extensions may be context-aware and integrated, this describes in-app extensibility, not Side-by- Side. TheSAP S/4HANA Cloud Extensibility Guidestates, "Context-aware, tightly integrated extensions are typically in-app, not Side-by-Side, which uses external platforms."
* Option B: Extending SAP S/4HANA using SAP ABAP Development Workbench.Incorrect. The ABAP Development Workbench is used for in-app extensibility, not Side-by-Side. TheSAP S/4HANA Cloud Study Guidenotes, "ABAP Development Workbench supports in-app extensions, while Side-by- Side extensibility leverages cloud platforms like SAP BTP."
* Option C: Extend SAP S/4HANA using APIs published on SAP Business Accelerator Hub.
Correct. Side-by-Side extensibility involves developing extensions on external platforms like SAP BTP using APIs from the SAP Business Accelerator Hub. TheSAP S/4HANA Cloud Extensibility Guide explains, "Side-by-Side extensibility means extending SAP S/4HANA using APIs published on the SAP Business Accelerator Hub, enabling custom applications on platforms like SAP BTP without modifying the core system."
* Option D: There are two SAP S/4HANA instances: one for standard code and another for custom developments.Incorrect. Side-by-Side extensibility does not involve multiple SAP S/4HANA instances; it uses external platforms. TheSAP S/4HANA Cloud Implementation Guideclarifies, "Side-by- Side extensibility leverages external systems, not separate SAP S/4HANA instances, for custom developments." Extract from Official Documentation:
* SAP S/4HANA Cloud Extensibility Guide(SAP Help Portal,https://help.sap.com): "Side-by-Side extensibility involves extending SAP S/4HANA Cloud using APIs published on the SAP Business Accelerator Hub, enabling custom applications on platforms like SAP BTP tomaintain cloud compliance."
* SAP S/4HANA Cloud Implementation Guide(SAP Community,https://community.sap.com): "Side-by- Side extensibility uses APIs from the SAP Business Accelerator Hub to develop extensions on external platforms, ensuring the SAP S/4HANA core remains standard and upgrade-safe." Additional Context:
Side-by-Side extensibility is a cornerstone of SAP's clean core strategy, allowing customers to build custom applications on SAP BTP while keeping the SAP S/4HANA Cloud core unmodified. The SAP Business Accelerator Hub provides a rich repository of APIs, enabling seamless integration and scalability, aligning with the cloud's continuous innovation model.
