Check Point Certified Security Expert R81 certification is ideal for security professionals, network administrators, and IT professionals who are responsible for implementing, configuring, and managing Check Point security solutions.

## Realistic Valid 156-315.81 Exam Papers - 100% Pass CheckPoint New Check Point Certified Security Expert R81 Exam Pass4sure

Many customers may doubt the quality of our 156-315.81 learning quiz since they haven't tried them. But our 156-315.81 training engine is reliable. What you have learnt on our 156-315.81 exam materials are going through special selection. The core knowledge of the real exam is significant. With our guidance, you will be confident to take part in the 156-315.81 Exam. Our 156-315.81 study materials will be your good assistant. Put your ideas into practice.

CheckPoint 156-315.81 Exam is part of the Check Point Certification Program, which provides a comprehensive and reliable framework for assessing the skills and knowledge of IT professionals in the area of Check Point Security technologies. Check Point Certified Security Expert R81 certification is designed to help IT professionals advance their careers and increase their value to their organizations by demonstrating their expertise in Check Point Security solutions. Check Point Certified Security Expert R81 certification validates the candidate's ability to design, implement, and manage advanced security solutions using Check Point technologies, making them valuable assets to any organization that relies on these solutions to secure their networks and data.

### CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q497-Q502):

#### NEW QUESTION # 497

Which of the following statements about Site-to-Site VPN Domain-based is NOT true?

- **A. Domain-based- VPN domains are pre-defined for all VPN Gateways. A VPN domain is a service or user that can send or receive VPN traffic through a VPN Gateway.**
- B. Domain-based- VPN domains are pre-defined for all VPN Gateways. When the Security Gateway encounters traffic originating from one VPN Domain with the destination to a VPN Domain of another VPN Gateway, that traffic is identified as VPN traffic and is sent through the VPN Tunnel between the two Gateways.
- C. Route-based- The Security Gateways will have a Virtual Tunnel Interface (VTI) for each VPN Tunnel with a peer VPN Gateway. The Routing Table can have routes to forward traffic to these VTIs. Any traffic routed through a VTI is automatically identified as VPN Traffic and is passed through the VPN Tunnel associated with the VTI.
- D. Domain-based- VPN domains are pre-defined for all VPN Gateways. A VPN domain is a host or network that can send or receive VPN traffic through a VPN Gateway.

**Answer: A**

#### NEW QUESTION # 498

What are the steps to configure the HTTPS Inspection Policy?

- A. Go to Application&url filtering blade > Https Inspection > Policy
- B. Go to Manage&Settings > Blades > HTTPS Inspection > Policy
- **C. Go to Manage&Settings > Blades > HTTPS Inspection > Configure in SmartDashboard**
- D. Go to Application&url filtering blade > Advanced > Https Inspection > Policy

**Answer: C**

Explanation:

The correct steps to configure the HTTPS Inspection Policy in Check Point R81 are as follows:

- \* Go to Manage&Settings > Blades > HTTPS Inspection > Configure in SmartDashboard.
- \* Enable HTTPS Inspection and select the Policy tab.
- \* Create a new HTTPS Inspection Layer or edit an existing one.
- \* Define the rules for inspecting HTTPS traffic based on the source, destination, service, and action.
- \* Install the policy on the relevant gateways.

The other options are incorrect because they either use wrong blade names, wrong menu options, or wrong configuration steps.

### NEW QUESTION # 499

Kurt is planning to upgrade his Security Management Server to R81.X. What is the lowest supported version of the Security Management he can upgrade from?

- A. R75 Gaia
- B. R75 Splat
- C. R77.X Gaia
- D. R76 Splat

**Answer: A**

Explanation:

The lowest supported version of the Security Management that can be upgraded to R81.X is R75 Gaia. This means that the Security Management Server must be running on the Gaia Operating System and have a version of R75 or higher. R76 Splat, R77.X Gaia, and R75 Splat are not supported for upgrading to R81.X1. Reference: 1: Check Point Software, Getting Started, Supported Upgrade Paths.

### NEW QUESTION # 500

Under which file is the proxy arp configuration stored?

- A. \$FWDIR/conf/local.arp on the gateway
- B. \$FWDIR/state/\_tmp/proxy.arp on the security gateway
- C. \$FWDIR/conf/local.arp on the gateway
- D. \$FWDIR/conf/local.arp on the management server
- E. \$FWDIR/state/proxy\_arp.conf on the management server

**Answer: A,C**

Explanation:

This file, local.arp, contains the proxy ARP configuration for the Security Gateway. It is used to configure ARP (Address Resolution Protocol) settings for network communication.

Explanation:

The proxy ARP configuration is stored under the following file:

### NEW QUESTION # 501

Which statement is true about ClusterXL?

- A. Supports Dynamic Routing (Multicast Only)
- B. Does not support Dynamic Routing
- C. Supports Dynamic Routing (Unicast and Multicast)
- D. Supports Dynamic Routing (Unicast Only)

**Answer: C**

Explanation:

Explanation

ClusterXL supports Dynamic Routing for both Unicast and Multicast traffic. Dynamic Routing protocols, such as OSPF, BGP, or PIM, can be configured on cluster members to exchange routing information with other routers. ClusterXL supports two modes of operation for Dynamic Routing: New Mode and Legacy Mode.
