Why not choose AWS-Developer braindumps PDF materials at the beginning?

## Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q25-Q30):

**NEW QUESTION # 25**
An organization has 10000 employees. The organization wants to give restricted AWS access to each employee. How can the organization achieve this?

- A. Create an IAM user for each employee and make them a part of the group
- B. Use Identity federation with SSO
- C. It is not recommended to support 10000 users with IAM
- D. Use STS and create the users' run time

**Answer: B**

Explanation:
Identity federation enables users from an existing directory to access resources within your AWS account, making it easier to manage your users by maintaining their identities in a single place.
In this case, the federated user is the only solution since AWS does not allow creating more than
5000 IAM users.

**NEW QUESTION # 26**
A microservices application is deployed across multiple containers in Amazon Elastic Container Service (Amazon ECS). To improve performance, a developer wants to capture trace information between the microservices and visualize the microservices architecture. Which solution will meet these requirements?

- A. Configure AWS CloudTrail data events to capture the traffic between the microservices.
- B. Build the container from the amazon/aws-xray-daemon base image.
  Use the AWS X-Ray SDK to instrument the application.
- C. Install the Amazon CloudWatch agent on the container image.
  Use the CloudWatch SDK to publish custom metrics from each of the microservices.
- D. Install the AWS X-Ray daemon on each of the ECS instances.

**Answer: D**

**NEW QUESTION # 27**
An application needs to use the IP address of the client in its processing. The application has been moved into AWS and has been placed behind an Application Load Balancer (ALB). However, all the client IP addresses now appear to be the same. The application must maintain the ability to scale horizontally.
Based on this scenario, what is the MOST cost-effective solution to this problem?

- A. Alter the application code to inspect the X-Forwarded-For header. Ensure that the code can work properly if a list of IP addresses is passed in the header.
- B. Remove the application from the ALB. Create a Classic Load Balancer in its place. Direct traffic to the application using the HTTP protocol.
- C. Remove the application from the ALB. Delete the ALB and change Amazon Route 53 to direct traffic to the instance

running the application.
- D. Alter the application code to inspect a custom header. Alter the client code to pass the IP address in the custom header.

**Answer: A**

## NEW QUESTION # 28
You have a three-tier web application with separate subnets for Web, Applications, and Database tiers.
Your CISO suspects your application will be the target of malicious activity. You are tasked with notifying the security team in the event your application is port scanned by external systems.
Which two AWS Services cloud you leverage to build an automated notification system? (Select two.)

- A. Lambda
- B. AWS Inspector
- C. Internet gateway
- D. AWS CloudTrail
- E. VPC Flow Logs

**Answer: A,D**

Explanation:

by-using-aws-cloudtrail-amazon-sns-and-aws-lambda/

## NEW QUESTION # 29
A company has a legacy application that was migrated to a fleet of Amazon EC2 instances. The application stores data in a MySQL database that is currently installed on a single EC2 instance.
The company has decided to migrate the database from the EC2 instance to MySQL on Amazon EDS.
What should the Developer do to update the application to support data storage in Amazon RDS?

- A. Create a new EC2 instance with an IAM role that allows access to the new RDS database.
- B. Add a script to the EC2 instance that implements an AWS SDK for requesting database credentials.
- C. Update the database connection parameters in the application to point to the new RDS instance.
- D. Create an AWS Lambda function that will route traffic, from the EC2 instance to the RDS database.

**Answer: C**

## NEW QUESTION # 30
......
