

Free PDF Plat-Con-201 Reliable Test Pdf | Perfect Plat-Con-201 Latest Braindumps Free: Salesforce Certified Omnistudio Consultant

RH134 Partial Test

¿Cuál es la función principal de la notación she-bang (`#!/usr/bin/bash`) al inicio de un script?

- A. Cifrar el contenido del script para que no pueda ser leído por otros usuarios.
- B. Definir el nombre del script dentro del entorno de la shell.
- C. Asignar automáticamente permisos de ejecución al archivo del script.
- D. Establecer la variable de entorno `PATH` para el resto de la sesión.
- E. Indicar al sistema qué intérprete de comandos debe utilizar para procesar el archivo.

Si un script no se encuentra en un directorio listado en la variable `PATH`, ¿cómo se debe ejecutar desde el directorio de trabajo actual?

- A. Moviendo el script al directorio `/root` para permisos globales.
- B. Cambiando el nombre del archivo para que coincida con un comando del sistema.
- C. Simplemente escribiendo el nombre del script, ya que la shell busca siempre en el directorio actual por defecto.
- D. Usando el comando `which` antes del nombre del script.
- E. Usando el prefijo `/` seguido del nombre del script.

Plat-Con-201 Latest Braindumps Free, Exam Plat-Con-201 Quizzes

Failure in the Plat-Con-201 test of the Salesforce Certified Omnistudio Consultant credential leads to loss of time and money.

Therefore preparing with Salesforce Certified Omnistudio Consultant actual test questions matters a lot to save time and money. The prep material of ExamDiscuss comes in three different formats so that users with different study styles can prepare with ease. We have made this Salesforce Certified Omnistudio Consultant product after taking feedback of experts so that applicants can prepare for the Salesforce Plat-Con-201 Exam successfully.

Salesforce Certified Omnistudio Consultant Sample Questions (Q143-Q148):

NEW QUESTION # 143

what can a DataRaptor Extract do?

- A. Create data in multiple related objects
- B. Load data from external sources
- C. Extract data from a spreadsheet
- **D. Retrieve data from multiple related objects**

Answer: D

Explanation:

A DataRaptor Extract can retrieve data from multiple related objects. A DataRaptor Extract is a tool that can read data from a Salesforce object or invoke a Salesforce API, using SOQL queries or Apex methods. A DataRaptor Extract can also use filters, joins, and formulas to manipulate the data. A DataRaptor Extract can retrieve data from multiple related objects by using lookup or master-detail relationships in the SOQL queries or Apex methods

NEW QUESTION # 144

Which two functions can be performed by DataRaptors?

Choose 2 answers

- **A. Transform data**
- B. Combine requests into a single response
- **C. Read and write data to Salesforce**
- D. Read and write data to external systems

Answer: A,C

Explanation:

DataRaptors are OmniStudio data tools that can perform various functions on data, such as reading, writing, transforming, and validating. They can work with Salesforce data and external data sources. The two functions that can be performed by DataRaptors are:

* Transform data: DataRaptors can use transformation rules to manipulate data, such as changing the format, applying calculations, mapping values, etc.

* Read and write data to Salesforce: DataRaptors can use SOQL or SOSL queries to read data from Salesforce objects and fields, and use DML operations to insert, update, delete, or upsert data to Salesforce.

The functions that cannot be performed by DataRaptors are:

* Combine requests into a single response: DataRaptors cannot aggregate multiple requests from different sources into one response. This can be done using Integration Procedures, which can orchestrate multiple DataRaptors or REST calls into a single process.

* Read and write data to external systems: DataRaptors cannot directly access external systems or APIs.

They need to use Integration Procedures or REST elements to invoke external services and pass the data to or from DataRaptors.

NEW QUESTION # 145

A company needs to implement new verification processes for contacts in their org. This process relies on three Contact record types: Recruiter, Candidate, and Trainer. The verification process is different for each type of contact. For example, recruiters must pass a background check; trainers must complete mandatory training classes, and candidates must achieve certifications.

Which OmniStudio tools should the consultant recommend to meet these requirements?

- A. Single OmniStudio Action that invokes separate Omniscripts
- **B. Multiple OmniStudio Actions that invoke separate OmniScripts**
- C. Single FlexCard with an Action to invoke an OmniScript
- D. Specific FlexCards with Actions for each type of Contact

Answer: B

Explanation:

The OmniStudio tools that should be recommended to meet these requirements are single OmniStudio Action that invokes separate Omniscripts. OmniStudio Action can be used to conditionally launch different Omniscripts based on the record type of the contact. Omniscripts can be used to implement the verification processes for each type of contact. Specific FlexCards with Actions for each type of Contact would require creating redundant FlexCards and Actions for each record type. Multiple OmniStudio Actions that invoke separate Omniscripts would require creating redundant Actions for each record type. Single FlexCard with an Action to invoke an Omniscript would not allow for different verification processes based on the record type.

NEW QUESTION # 146

A business needs to display installed products for field service technicians on service calls using a mobile device. The installed product information must be summarized so the technician can see key details at a glance.

How the technician also needs to sometimes access a list of past service dates for each product.

Which two FlexCards features should the consultant recommend to meet this requirement?

Choose 2 answers

- A. Customize the styling
- **B. Enable the Responsive property**
- **C. Use flyouts**
- D. Use card states

Answer: B,C

Explanation:

The two FlexCard features that the consultant should recommend to meet this requirement are: Flyouts and Responsive property. A Flyout is a pop-up window that can display additional information or actions for a FlexCard. The consultant can use a Flyout to show the list of past service dates for each product, without cluttering the main FlexCard. The Responsive property is a property that determines how a FlexCard adapts to different screen sizes and orientations. The consultant can enable the Responsive property to make the FlexCard display well on mobile devices, such as tablets or phones.

NEW QUESTION # 147

A company has several customer support departments. Each

department has different case creation processes, but they want to unify them into a single LWC OmniScript. During the discovery, the consultant identifies two key requirements:

* Each department has different case fields they need to capture

* If the user cancels the process, they should return to a support console app

Which two OmniScript features should the consultant recommend to meet these requirements?

Choose 2 answers

- A. Enable the Save for Later feature
- B. Add a Done action that redirects to the support console
- **C. Set Enable Cancel in Setup**
- **D. Use Conditional Views on steps for each department**

Answer: C,D

Explanation:

* Set Enable Cancel in Setup (B) - This ensures that users can cancel the OmniScript process and be redirected to a specific URL (e.g., support console app).

* Use Conditional Views on steps for each department (C) - Conditional Views allow different fields to be displayed based on department-specific requirements, ensuring that each department only sees the fields relevant to them.

* A. Enable the Save for Later feature - This allows users to pause and resume the OmniScript later, but the question specifically asks about canceling the process, not saving progress.

* D. Add a Done action that redirects to the support console - The Done Action is used to submit the process, but the question focuses on handling the cancellation scenario, making "Enable Cancel" the better choice.

Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:

- * OmniScript Conditional Views
- * OmniScript Enable Cancel Option

NEW QUESTION # 148

.....

If you are troubled with Plat-Con-201 exam, you can consider down our free demo. You will find that our latest Plat-Con-201 exam torrent are perfect paragon in this industry full of elucidating content for exam candidates of various degree to use.
