At QuestionsTube, you can read 300-740 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Cisco 300-740 practice questions. These free demo questions are parts of the 300-740 exam questions. Download and read them carefully, you will find that the 300-740 test questions of QuestionsTube will be your great learning materials online. Share some 300-740 exam online questions below.

2026 Latest Actual4Dumps 300-740 PDF Dumps and 300-740 Exam Engine Free Share: <https://drive.google.com/open?id=1QyYdo-SqeFJsLmQLKAvdCptuBBHNraPY>

Our company deeply knows that product quality is very important, so we have been focusing on ensuring the development of a high quality of our 300-740 test torrent. All customers who have purchased our products have left deep impression on our 300-740 guide torrent. Of course, the customer not only has left deep impression on the high quality of our products but also the efficiency of our products. Our 300-740 Exam Questions can help you save much time, if you use our products, you just need to spend 20-30 hours on learning, and you will pass your exam successfully. What most important is that you can download our study materials about 5~10 minutes after you purchase.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Network and Cloud Security: This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.

Topic 2	<ul style="list-style-type: none"> Threat Response: This section of the exam measures skills of Incident Response Engineers and focuses on responding to threats through automation and data analysis. It covers how to act based on telemetry and audit reports, manage user or application compromises, and implement response steps such as containment, reporting, remediation, and reinstating services securely.
Topic 3	<ul style="list-style-type: none"> Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.
Topic 4	<ul style="list-style-type: none"> SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.
Topic 5	<ul style="list-style-type: none"> User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.
Topic 6	<ul style="list-style-type: none"> SAFE Key Structure: This section of the exam measures skills of Network Security Designers and focuses on the SAFE framework's key structural elements. It includes understanding 'Places in the Network'—the different network zones—and defining 'Secure Domains' to organize security policy implementation effectively.
Topic 7	<ul style="list-style-type: none"> Application and Data Security This section of the exam measures skills of Cloud Security Analysts and explores how to defend applications and data from cyber threats. It introduces the MITRE ATT&CK framework, explains cloud attack patterns, and discusses mitigation strategies. Additionally, it covers web application firewall functions, lateral movement prevention, microsegmentation, and creating policies for secure application connectivity in multicloud environments.
Topic 8	<ul style="list-style-type: none"> Visibility and Assurance: This section of the exam measures skills of Security Operations Center (SOC) Analysts and focuses on monitoring, diagnostics, and compliance. It explains the Cisco XDR solution, discusses visibility automation, and describes tools for traffic analysis and log management. The section also involves diagnosing application access issues, validating telemetry for behavior analysis, and verifying user access with tools like firewall logs, Duo, and Cisco Secure Workload.
Topic 9	<ul style="list-style-type: none"> Cloud Security Architecture: This section of the exam measures the skills of Cloud Security Architects and covers the fundamental components of the Cisco Security Reference Architecture. It introduces the role of threat intelligence in identifying and mitigating risks, the use of security operations tools for monitoring and response, and the mechanisms of user and device protection. It also includes strategies for securing cloud and on-premise networks, as well as safeguarding applications, workloads, and data across environments.

Test 300-740 Quiz - Free PDF Quiz 2026 300-740: First-grade New Designing and Implementing Secure Cloud Access for Users and Endpoints Test Experience

At the beginning of the launch of our 300-740 exam torrent, they made a splash in the market. We have three versions which are the sources that bring prestige to our company. Our PDF version of Designing and Implementing Secure Cloud Access for Users and Endpoints prepare torrent is suitable for reading and printing requests. You can review and practice with it clearly just like using a professional book. It can satisfy the fundamental demands of candidates with concise layout and illegible outline. The second one of 300-740 Test Braindumps is software versions which are usable to windows system only with simulation test system for you to practice in daily life. The last one is app version of 300-740 exam torrent suitable for different kinds of electronic products. And

there have no limitation for downloading.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q82-Q87):

NEW QUESTION # 82

Which of the following are purposes of URL filtering in controlling access to cloud applications?

- A. To monitor employee productivity
- B. To prevent access to malicious websites
- C. To increase internet speed
- D. To block access to unauthorized web content

Answer: B,D

NEW QUESTION # 83

An engineer is configuring multifactor authentication using Duo. The implementation must use Duo Authentication Proxy and the Active Directory as an identity source. The company uses Azure and a local Active Directory. Which configuration is needed to meet the requirement?

- A. Configure the Identity Source as "Active Directory" on the Single Sign-On tab in the Duo Admin Panel, and configure the permit list to "Local database".
- B. Configure the Identity Source as "SAML" on the Single Sign-On tab, and configure the authentication proxy with the "[cloud]" section.
- C. Configure the Identity Source as "SAML" on the Single Sign-On tab in the Duo Admin Panel, and configure the forwarding proxy as "local" for the Identity Source.
- D. Configure the Identity Source as "Active Directory" on the Single Sign-On tab, and configure the authentication proxy with the "[sso]" section.

Answer: D

Explanation:

When integrating Duo Authentication Proxy with Active Directory for multifactor authentication (MFA), you must: Configure the Identity Source in the Duo Admin Panel as Active Directory (not SAML), since it's using the Authentication Proxy. Configure the authentication proxy settings in the [sso] section to communicate with both AD and the Duo cloud. This setup allows Active Directory to be the primary identity store while Duo provides the second authentication factor. Reference: Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT), Section 2: User and Device Security, Pages 40-45

NEW QUESTION # 84

When validating traffic flow and telemetry reports, it is important to:

- A. Assume all traffic is benign and requires no further investigation
- B. Rely exclusively on manual inspection without the aid of automated tools
- C. Only focus on external traffic while ignoring internal traffic patterns
- D. Utilize tools like Cisco Secure Network Analytics for comprehensive analysis and baselining

Answer: D

NEW QUESTION # 85

An administrator must deploy an endpoint posture policy for all users. The organization wants to have all endpoints checked against antimalware definitions and operating system updates and ensure that the correct Secure Client modules are installed properly. How must the administrator meet the requirements?

- A. Create an ASA Firewall posture policy, upload the Secure Client images to the NAD, and create a local client provisioning portal.
- B. Identify the antimalware being used, create an endpoint script to ensure that it is updated, and send the update log to Cisco

ISE for processing.

- C. Configure the WLC to provide local posture services, and configure Cisco ISE to receive the compliance verification from the WLC to be used in an authorization policy.
- D. Create the required posture policy within Cisco ISE, configure redirection on the NAD, and ensure that the client provisioning policy is correct.

Answer: D

Explanation:

Cisco Identity Services Engine (ISE) is the central policy engine for posture assessments. As outlined in the SCAZT guide (Section 2: User and Device Security, Pages 39-44), to implement posture assessment and client provisioning correctly, an administrator must create posture policies within Cisco ISE and configure the Network Access Device (NAD)-such as a switch, WLC, or firewall-for redirection. This redirection sends the user to the posture portal, where ISE verifies the Secure Client modules (such as AnyConnect) and enforces compliance with antivirus signatures and OS updates.

ISE evaluates endpoint health based on pre-defined compliance rules and supports automatic remediation via the client provisioning portal. This ensures consistency and policy enforcement across distributed environments.

NEW QUESTION # 86

To allow users a seamless and secure login experience across multiple applications, many organizations configure _____ using an identity provider connection.

- A. SAML/SSO
- B. antivirus software
- C. firewalls
- D. VPNs

Answer: A

NEW QUESTION # 87

.....

Do you want to get more respects from other people? Do you long to become a powerful people? Our 300-740 exam torrent is compiled by professional experts that keep pace with contemporary talent development and makes every learner fit in the needs of the society. If you choose our 300-740 Study Materials, you will pass 300-740 exam successful in a short time. There is no doubt that our 300-740 exam question can be your first choice for your relevant knowledge accumulation and ability enhancement.
