

# JN0-105 Valid Study Questions & Detailed JN0-105 Answers

www.NWExam.com  
Get complete detail on JN0-105 exam guide to crack Juniper Junos Associate. You can collect all information on JN0-105 tutorial, practice test, books, study material, exam questions, and syllabus. Firm your knowledge on Juniper Junos Associate and get ready to crack JN0-105 certification. Explore all information on JN0-105 exam with number of questions, passing percentage and time duration to complete test.

BTW, DOWNLOAD part of GuideTorrent JN0-105 dumps from Cloud Storage: [https://drive.google.com/open?id=12kpW1jt0u5QFJWKL0vfk\\_xriR2p0MMOu](https://drive.google.com/open?id=12kpW1jt0u5QFJWKL0vfk_xriR2p0MMOu)

All kinds of exams are changing with dynamic society because the requirements are changing all the time. To keep up with the newest regulations of the JN0-105 exam, our experts keep their eyes focusing on it. Our JN0-105 exam torrent are updating according to the precise of the real exam. Our JN0-105 Test Prep to help you to conquer all difficulties you may encounter. Once you choose our JN0-105 quiz torrent, we will send the new updates for one year long, which is new enough to deal with the exam for you and guide you through difficulties in your exam preparation.

Perhaps you worry about the quality of our JN0-105 exam questions. We can make solemn commitment that our JN0-105 study materials have no mistakes. All contents are passing rigid inspection. You will never find small mistakes such as spelling mistakes and typographical errors in our JN0-105 learning guide. No one is willing to buy a defective product. And our JN0-105 practice braindumps are easy to understand for all the candidates.

## Free PDF Quiz 2026 Juniper JN0-105: Perfect Junos, Associate (JNCIA-Junos) Valid Study Questions

You will gain a clear idea of every Juniper JN0-105 exam topic by practicing with Web-based and desktop Juniper JN0-105 practice test software. You can take Juniper JN0-105 Practice Exam many times to analyze and overcome your weaknesses before the final Juniper JN0-105 exam.

## Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.</li></ul>

## Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q64-Q69):

### NEW QUESTION # 64

What is the primary system log file that is present in the default configuration of a Junos device?

- A. vrrp
- **B. messages**
- C. jsrpd
- D. kmd

**Answer: B**

Explanation:

In the default configuration of a Junos device, the primary system log file is "messages" (B). This log file contains a wide range of system messages, including operational status changes, system errors, and other critical information, making it a key resource for troubleshooting and monitoring the system's health.

### NEW QUESTION # 65

What are two functions of the routing protocol daemon (rpd)? (Choose two.)

- A. It provides access to the CLI.
- B. It generates chassis alarms.
- **C. It creates forwarding tables.**
- **D. It maintains routing tables.**

**Answer: C,D**

Explanation:

The Routing Protocol Daemon (rpd) is a critical component in Juniper Networks devices, responsible for all routing operations. It maintains routing tables, which hold information about network paths and destinations derived from various routing protocols. These tables are used to make decisions about where to send packets. Additionally, rpd generates forwarding tables based on the information in the routing tables. The forwarding tables are then used by the Packet Forwarding Engine (PFE) to actually forward packets to their next hop or final destination.

### NEW QUESTION # 66

Click the Exhibit button.

Referring to the exhibit, what should be configured on R1 to advertise a default static route into OSPF?

- A. a loopback interface

- B. a firewall filter
- **C. a routing policy**
- D. a management interface

**Answer: C**

Explanation:

To advertise a default static route into OSPF on router R1, a routing policy should be configured. This policy would typically include a statement to match the default route (0.0.0.0/0) and then apply an action to set the route as an OSPF external type, which would then be redistributed into the OSPF domain. The routing policy is a set of conditions and actions that determine how routes are imported into or exported from the routing table and how routes are shared between routing instances or routing protocols. After defining the policy, it must be applied to OSPF under the export section of the OSPF configuration on R1. This process will allow R1 to announce the default route to other OSPF routers in the network, which then can use it as a gateway of last resort to reach the Internet or other networks not explicitly known to the OSPF domain.

#### NEW QUESTION # 67

Which two statements about firewall filters are correct? (Choose two.)

- A. Firewall filters are stateful.
- B. Firewall filters can match Layer 7 parameters.
- **C. Firewall filters are stateless.**
- **D. Firewall filters can match Layer 4 parameters.**

**Answer: C,D**

Explanation:

Firewall filters in Junos OS are stateless, meaning they process each packet individually without regard to the state of a connection or sequence of packets. These filters can match various packet attributes, including those at Layer 4, such as TCP and UDP port numbers. This allows for granular control over traffic based on the type of service or application. Unlike stateless filters, stateful firewalls keep track of the state of active connections and make decisions based on the context of the traffic flow, which is not a capability of Junos firewall filters. Additionally, Junos firewall filters primarily operate up to Layer 4 and do not natively inspect Layer 7 parameters, which involve application-level data.

#### NEW QUESTION # 68

Which statement is correct when multiple users are configuring a Junos device using the configure private command?

- A. Each user shares the same candidate configuration.
- B. A commit will not succeed until there is only a single user in configuration mode.
- **C. Each user gets their own candidate configuration.**
- D. A commit by any user will commit changes made by all active users.

**Answer: C**

Explanation:

When multiple users are configuring a Junos device using the "configure private" command, each user gets their own candidate configuration (C). This allows for isolated configuration sessions, where changes made by one user do not impact or interfere with the changes made by another user in their private session.

#### NEW QUESTION # 69

.....

To do this you just need to download the GuideTorrent practice test questions and start preparation with complete peace of mind and satisfaction. The GuideTorrent exam questions are designed and verified by experience and qualified Juniper JN0-105 Exam experts so you do not need to worry about the top standard and relevancy of GuideTorrent exam practice questions.
