Pdf CertiProf I27001F Version - I27001F Latest Test Dumps

Through the good reputation of word of mouth, more and more people choose to use I27001F study torrent to prepare for the I27001F exam, which makes us very gratified. One of the reason for this popularity is our study material are accompanied by high quality and efficient services so that they can solve all your problems. We guarantee that after purchasing our I27001F Test Prep, we will deliver the product to you as soon as possible about 5-10 minutes. So you don't need to wait for a long time or worry about the delivery time has any delay.

CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which of the following aspects is considered a critical success factor in the implementation of an Information Security Management System?

- A. Completely avoiding all information security incidents
- B. Promoting good information security practices
- C. Increasing the confidence of interested parties in the organization
- D. Satisfying social needs and expectations

Answer: C

Explanation:

A well-implemented ISMS helps build trust and confidence among interested parties by demonstrating that information security risks are being managed systematically and effectively. Completely preventing all incidents is unrealistic and not required by ISO/IEC 27001:2022. Promoting good practices is important, but the broader organizational outcome recognized as a major success factor is increased confidence by customers, partners, regulators, and other interested parties. Therefore, option D is the best answer.

NEW QUESTION # 25

What does ISO/IEC 27001:2022 require for information security risk assessment?

- A. A person designated by top management
- B. A consultancy to perform the information security risk assessment professionally
- C. Applying an information security risk assessment process that establishes and maintains information security risk criteria
- D. Acquisition of a set of information security tools to automate the assessment using artificial intelligence

Answer: C

Explanation:

ISO/IEC 27001:2022 does not require a specific tool, consultant, or named individual as the basis for compliance. What it does require is that the organization define and apply an information security risk assessment process that establishes and maintains risk criteria, ensures consistent, valid, and comparable results, identifies risks, analyzes risks, and evaluates risks. Therefore, option D is the correct answer.

NEW QUESTION # 26

In the context of clause 6.1 actions to address risks and opportunities, what is defined as residual risk?

- A. Informed decision to take a particular risk
- B. Effect of uncertainty on objectives
- C. Risk remaining after risk treatment
- D. None of the above

Answer: C

Explanation:

Residual risk is the risk that remains after risk treatment has been applied. In an ISMS, organizations assess risks, select treatment options, and implement controls or other measures to reduce risk to an acceptable level.

Even after treatment, some level of risk may still remain, and that remaining portion is called residual risk.

Therefore, option C is correct.

NEW QUESTION # 27

Annex A of ISO/IEC 27001:2022 consists of:

- A. Guidelines for risk management
- B. None of the above
- **C. A comprehensive list of controls grouped by themes**
- D. Elements necessary for a good design and implementation of the ISMS

Answer: C

Explanation:

Annex A of ISO/IEC 27001:2022 contains the reference set of information security controls used to support risk treatment decisions. In the 2022 edition, these controls are organized into four themes: organizational, people, physical, and technological controls. Annex A is not a set of ISMS implementation steps and it is not a risk management guideline. Its role is to provide a structured set of control objectives and controls that may be selected as part of risk treatment. Therefore, option B is the correct answer.

NEW QUESTION # 28

Identify the missing words in the following sentence.

The organization shall establish, _____, maintain, and continually improve an information security management system.

- A. administer
- **B. implement**
- C. monitor
- D. exploit

Answer: B

Explanation:

Clause 4.4 of ISO/IEC 27001:2022 requires the organization to establish, implement, maintain, and continually improve an information security management system. This is one of the core statements of the standard and defines the lifecycle expectation for the ISMS. Therefore, the missing word is implement, making option A correct.

NEW QUESTION # 29

.....

I27001F learning materials have a variety of self-learning and self-assessment functions to test learning outcomes. I27001F study guide is like a tutor, not only gives you a lot of knowledge, but also gives you a new set of learning methods. I27001F Exam Practice is also equipped with a simulated examination system that simulates the real exam environment so that you can check your progress at any time.
