high marks and pass the exam easily. What is the shortcut for your exam? Do you want to know the test taking skills? Now, I would like to tell you making use of CertkingdomPDF PSPO-I Questions and answers can help you get the certificate.

Scrum Professional Scrum Product Owner I Sample Questions (Q98-Q103):

NEW QUESTION # 98

Which statement best describes the Sprint Backlog as the output of the Sprint Planning?
(choose the best answer)

- **A. It is the Developers plan for the Sprint.**
- B. Each task is estimated in hours.
- C. It is a complete list of all work to be done in a Sprint.
- D. It is ordered by the Product Owner.
- E. Every item has a designated owner.

Answer: A

Explanation:

The Sprint Backlog is the output of the Sprint Planning, where the Developers select the Product Backlog items that they can deliver in the Sprint and create a plan for how to do the work. The Scrum Guide states that "The Sprint Backlog is composed of the Sprint Goal (why), the set of Product Backlog items selected for the Sprint (what), as well as an actionable plan for delivering the Increment (how)." The Sprint Backlog is owned and managed by the Developers, who can update it throughout the Sprint as more is learned. The Sprint Backlog makes visible all the work that the Developers identify as necessary to meet the Sprint Goal.

NEW QUESTION # 99

Who has the final decision about the order of items in the Product Backlog?
(choose the best answer)

- **A. The Developers.**
- B. The Scrum Team
- C. The Product Owner.
- D. The Stakeholders.
- E. The Scrum Master.

Answer: A

Explanation:

In Scrum, the Product Owner is responsible for maximizing the value of the product resulting from the work of the Development Team. One of the primary ways the Product Owner does this is by managing the Product Backlog, which includes clearly expressing Product Backlog items, ordering the items to best achieve goals and missions, and ensuring that the Product Backlog is visible, transparent, and clear to all. This means that the Product Owner has the final authority on the order of items in the Product Backlog, as they are best positioned to understand the strategic and market value of the work to be done.

NEW QUESTION # 100

Which Scrum Events are formal opportunities for inspecting and adapting?

- **A. Sprint Review**
- **B. Sprint Retrospective**
- C. Product Backlog Grooming
- D. Product Backlog Refinement

Answer: A,B

NEW QUESTION # 101

Which two ways of creating Scrum Teams are consistent with Scrum's values?
(choose the best two answers)

- A. Bring all the people together and let them organize into Scrum Teams.
- B. Existing teams propose how they would like to go about organizing into the new structure.
- C. Managers collaborate to assign individuals to specific teams.
- D. The Chief Product Owner determines the new team structures and assignments.
- E. Managers personally re-assign current subordinates to new teams.

Answer: A,B

NEW QUESTION # 102

Which three of the following are feedback loops in Scrum?
(choose the best three answers)

- A. Sprint Retrospective.
- B. Release Planning.
- C. Sprint Review.
- D. Daily Scrum.
- E. Refinement Meeting.

Answer: A,C,D

Explanation:

In Scrum, feedback loops are essential mechanisms that allow for inspection and adaptation at regular intervals. The three feedback loops from the options provided are:

* Sprint Review (A): This is a feedback loop that occurs at the end of the Sprint to inspect the Increment and adapt the Product Backlog if needed. It involves stakeholders and provides an opportunity to inspect the progress towards the Product Goal.

* Daily Scrum (C): This is a daily feedback loop for the Developers to synchronize their work and plan for the next 24 hours. It helps in identifying challenges and creating a plan to achieve the Sprint Goal.

* Sprint Retrospective (D): This feedback loop occurs after the Sprint Review and before the next Sprint Planning. It is an opportunity for the Scrum Team to inspect itself and create a plan for improvements to be enacted during the next Sprint.

The Refinement Meeting (B) is not considered a feedback loop but rather an ongoing process of adding details to Product Backlog items. Release Planning (E) is not a formal event in Scrum and thus not a prescribed feedback loop.

The Scrum Guide and the Professional Scrum Product Owner™ (PSPO I) materials describe these events as integral parts of the Scrum framework that serve as feedback loops.

NEW QUESTION # 103

.....

Practice tests are also a core part of the CertkingdomPDF product. We recognize that retention of information is crucial, and interactive learning tools, such as practice exams are provided to help students retain the information they have learned. These PSPO-I Practice Tests simulate the actual exam conditions and provide applicants with an accurate assessment of their readiness for the test.
