As is known to us, our company is professional brand established for compiling the NSE8_812 study materials for all candidates. The NSE8_812 study materials from our company are designed by a lot of experts and professors of our company in the field. We can promise that the NSE8_812 study materials of our company have the absolute authority in the study materials market. We believe that the study materials designed by our company will be the most suitable choice for you. You can totally depend on the NSE8_812 Study Materials of our company when you are preparing for the exam.

These NSE8_812 mock tests are made for customers to note their mistakes and avoid them in the next try to pass Fortinet NSE 8 - Written Exam (NSE8_812) (NSE8_812) exam in a single try. These Fortinet NSE8_812 mock tests will give you real NSE8_812 exam experience. This feature will boost your confidence when taking the Fortinet NSE8_812 Certification Exam. The 24/7 support system has been made for you so you don't feel difficulty while using the product. In addition, we offer free demos and up to 1 year of free Fortinet Dumps updates. Buy It Now!

Get the Fortinet NSE8_812 Certification to Boost Your Professional Career

No one can be responsible for you except yourself. So you must carefully plan your life and future career development. Our NSE8_812 training quiz might offer you some good guidance. Maybe you never find out your real interest in the past. Now, everything is different. With our NSE8_812 Study Guide, you will find that studying knowledge and making a progress is quite interesting and easy. And the most important is that you will get the best reward according to the NSE8_812 certification.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q72-Q77):

NEW QUESTION # 72

You are designing a setup where the FortiGate device is connected to two upstream ISPs using BGP. Part of the requirement is that you must be able to refresh the route advertisements manually without disconnecting the BGP neighborships. Which feature must you enable on the BGP neighbors to accomplish this goal?

- A. Deterministic-med
- B. Graceful-restart
- C. Synchronization
- D. Soft-reconfiguration

Answer: D

Explanation:

The soft reconfigure is correct by elimination (FGTs all support BGP Refresh, so question is not worded correctly - to refresh routes in advertisements, there is no need to do manually anything, after the change is committed to config FGT will send BGP Refresh message to the peers to notify them of it. The same is true for Cisco and Juniper routers. The question should ask "when routing

policy was changed" - then yes, reconfiguration is the way to notify BGP peers that BGP policy was changed.

NEW QUESTION # 73

You are troubleshooting a FortiMail Cloud service integrated with Office 365 where outgoing emails are not reaching the recipients' mail. What are two possible reasons for this problem? (Choose two.)

- A. The FortiMail access control rules to relay from Office 365 servers public IPs are missing.
- B. A Mail Flow connector from the Exchange Admin Center has not been set properly to the FortiMail Cloud FQDN.
- C. The FortiMail access control rule to relay from Office 365 servers FQDN is missing.
- D. The FortiMail DKIM key was not set using the Auto Generation option.

Answer: A,B

Explanation:

FortiMail Cloud service is a cloud-based email security solution that integrates with Office 365 to provide protection against spam, malware, phishing, data loss, etc. To use FortiMail Cloud service with Office 365, users need to configure both FortiMail Cloud settings and Office 365 settings properly. One possible reason for outgoing emails not reaching the recipients' mailboxes is that the FortiMail access control rules to relay from Office 365 servers public IPs are missing. This means that FortiMail Cloud service does not recognize the Office 365 servers as authorized senders and rejects the outgoing emails. Users need to add the Office 365 servers public IPs to the FortiMail access control rules to allow relaying. Another possible reason for outgoing emails not reaching the recipients' mailboxes is that a Mail Flow connector from the Exchange Admin Center has not been set properly to the FortiMail Cloud FQDN. This means that Office 365 does not route the outgoing emails to the FortiMail Cloud service for scanning and delivery. Users need to create a Mail Flow connector from the Exchange Admin Center and specify the FortiMail Cloud FQDN as the smart host. Reference: <https://docs.fortinet.com/document/fortimail-cloud/6.4.0/administration-guide/19662/integrating-fortimail-cloud-with-office-365>

NEW QUESTION # 74

Refer to the exhibit.

The exhibit shows two error messages from a FortiGate root Security Fabric device when you try to configure a new connection to a FortiClient EMS Server.

Referring to the exhibit, which two actions will fix these errors? (Choose two.)

- A. Authorize the root FortiGate on the FortiClient EMS
- B. Install a new known CA on the Win2K16-EMS server.
- C. Verify that the CRL is accessible from the root FortiGate
- D. Export and import the FortiClient EMS server certificate to the root FortiGate.

Answer: A,D

Explanation:

Based on the exhibit, the two actions that will fix the errors when trying to configure a new connection to a FortiClient EMS server are:

Export and import the FortiClient EMS server certificate to the root FortiGate. This will resolve the error message that says "The server certificate is not trusted". The root FortiGate needs to have the FortiClient EMS server certificate in its trusted CA list in order to establish a secure connection with it. The administrator can export the server certificate from the FortiClient EMS web UI and import it to the root FortiGate using the CLI or GUI.

Authorize the root FortiGate on the FortiClient EMS. This will resolve the error message that says "The device is not authorized". The FortiClient EMS needs to have the root FortiGate in its authorized device list in order to allow it to connect and receive configuration information. The administrator can authorize the root FortiGate on the FortiClient EMS web UI by entering its serial number and IP address. Reference: <https://docs.fortinet.com/document/fortigate/7.0.1/administration-guide/185333/forticlient-ems> <https://docs.fortinet.com/document/forticlient/6.0.3/administration-guide/936332/fortigate-and-ems-integration>

NEW QUESTION # 75

Refer to the exhibit containing the configuration snippets from the FortiGate. Customer requirements:

- * SSLVPN Portal must be accessible on standard HTTPS port (TCP/443)
- * Public IP address (129.11.1.100) is assigned to port1
- * Datacenter.acmecorp.com resolves to the public IP address assigned to port1 The customer has a Let's Encrypt certificate that is

going to expire soon and it reports that subsequent attempts to renew that certificate are failing. Reviewing the requirement and the exhibit, which configuration change below will resolve this issue?

- A.
- B.
- C.
- D.

Answer: B

Explanation:

<https://docs.fortinet.com/document/fortigate/7.4.1/administration-guide/822087/automatically-provision-a-certificate>

NEW QUESTION # 76

Refer to the CLI output:

Given the information shown in the output, which two statements are correct? (Choose two.)

- A. The IP Reputation feature has been manually updated
- B. Geographical IP policies are enabled and evaluated after local techniques.
- C. An IP address that was previously used by an attacker will always be blocked
- D. Reputation from blacklisted IP addresses from DHCP or PPPoE pools can be restored
- E. Attackers can be blocked before they target the servers behind the FortiWeb.

Answer: D,E

Explanation:

The CLI output shown in the exhibit indicates that FortiWeb has enabled IP Reputation feature with local techniques enabled and geographical IP policies enabled after local techniques (set geoip-policy-order after-local). IP Reputation feature is a feature that allows FortiWeb to block or allow traffic based on the reputation score of IP addresses, which reflects their past malicious activities or behaviors. Local techniques are methods that FortiWeb uses to dynamically update its own blacklist based on its own detection of attacks or violations from IP addresses (such as signature matches, rate limiting, etc.). Geographical IP policies are rules that FortiWeb uses to block or allow traffic based on the geographical location of IP addresses (such as country, region, city, etc.). Therefore, based on the output, one correct statement is that attackers can be blocked before they target the servers behind the FortiWeb. This is because FortiWeb can use IP Reputation feature to block traffic from IP addresses that have a low reputation score or belong to a blacklisted location, which prevents them from reaching the servers and launching attacks. Another correct statement is that reputation from blacklisted IP addresses from DHCP or PPPoE pools can be restored. This is because FortiWeb can use local techniques to remove IP addresses from its own blacklist if they stop sending malicious traffic for a certain period of time (set local-techniques-expire-time), which allows them to regain their reputation and access the servers. This is useful for IP addresses that are dynamically assigned by DHCP or PPPoE and may change frequently. References:

<https://docs.fortinet.com/document/fortiweb/6.4.0/administration-guide/19662/ip-reputation>

<https://docs.fortinet.com/document/fortiweb/6.4.0/administration-guide/19662/geographical-ip-policies>

<https://docs.fortinet.com/document/fortiweb/7.4.2/administration-guide/608374/ip-reputation-blocklisting-source-ips-with-poor-reputation> Fortinet compiles a reputation for each public IP address. Clients will have poor reputations if they have been participating in attacks, willingly or otherwise. Because blacklisting innocent clients is equally undesirable, Fortinet also restores the reputations of clients that improve their behavior. This is crucial when an infected computer is cleaned, or in DHCP or PPPoE pools where an innocent client receives an IP address that was previously leased by an attacker.

NEW QUESTION # 77

.....

We will offer the preparation for the NSE8_812 training materials, we will also provide you the guide in the process of using. The materials of the exam dumps offer you enough practice for the NSE8_812 as well as the knowledge points of the NSE8_812 exam, the exam will become easier. If you are interested in the NSE8_812 training materials, free demo is offered, you can have a try. And the download link will send to you within ten minutes, so you can start your preparation as quickly as possible. In fact, the outcome of the NSE8_812 Exam most depends on the preparation for the NSE8_812 training materials. With the training materials, you can make it.
