For your smooth GH-100 test preparation, ExamsLabs provides updated GH-100 practice material with a success guarantee.

Microsoft GitHub Administration Sample Questions (Q64-Q69):

NEW QUESTION # 64

Why would a GitHub App be favored over a machine account for automation tasks?

- A. Machine accounts are easier to audit than GitHub Apps.
- B. GitHub Apps are limited to a single repository.
- C. GitHub Apps provide a higher rate limit ceiling than using a personal access token on a machine account, when they use an install token and are owned by a GitHub Enterprise Cloud licensed enterprise.
- D. Machine accounts are required for webhook delivery.

Answer: C

Explanation:

GitHub Apps authenticate with short-lived installation tokens scoped to fine-grained permissions and, when owned by a GitHub Enterprise Cloud organization, enjoy a higher rate limit (15,000 requests/hour) compared to a machine account's personal access token.

NEW QUESTION # 65

You need to create a support bundle for your GitHub Enterprise Server instance with the hostname ghe.avocado.corp. What command should you use to create a support bundle?

- A. `ssh -p 122 admin@ghe.avocado.corp -- 'ghe-support-bundle -o' > support-bundle.tgz`
- B. `ssh -p 122 admin@ghe.avocado.corp - 'ghe-diagnostics' > support-bundle.tgz`
- C. `curl -u admin https://ghe.avocado.corp/diagnostics/support-bundle.tgz -o`
- D. `ssh -p 122 admin@ghe.avocado.corp -- 'ghe-config generate-support-bundle' > support-bundle.tgz`

Answer: A

Explanation:

Run the ghe-support-bundle command over SSH on your appliance and redirect its output to a file. For example: `ssh -p 122 admin@ghe.avocado.corp -- 'ghe-support-bundle -o' > support-bundle.tgz` This invokes the built-in support-bundle utility on your GitHub Enterprise Server instance and captures the resulting archive locally.

NEW QUESTION # 66

Which of the following is the responsibility of a Team Maintainer in a GitHub organization? (Choose two.)

- A. Deleting repositories assigned to the team.
- B. Modifying organization-wide settings.
- C. Managing nested sub-teams.
- D. Adding or removing team members.

Answer: C,D

Explanation:

Team maintainers can manage nested sub-teams - requesting to add or change parent/child teams within the organization's hierarchy. Team maintainers have permission to add and remove members from their team, controlling day-to-day team membership.

NEW QUESTION # 67

Our organization is updating its enterprise policies. Which of the following steps should you take to ensure alignment with security requirements?

- A. Implement the new enterprise policies across the organization first and then consult with the security team to identify any necessary adjustments or retrofits
- B. Maintain clear documentation of existing policies and policy changes.
- C. Implement changes without consulting stakeholders.
- D. Regularly assess and adjust policies based on evolving risks.
