□

□ A FortiSASE administrator has configured an antivirus profile in the security profile group and applied it to the internet access policy. Remote users are still able to download the eicar.com-zip file from <https://eicar.org>. Which configuration on FortiSASE is allowing users to perform the download?

- A. Intrusion prevention is disabled.
- B. Application control is exempting all the browser traffic.
- C. Deep inspection is not enabled.
- D. Web filter is allowing the URL.

**Answer: C**

Explanation:

The SSL inspection mode is set to certificate inspection, which only inspects SSL/TLS headers and does not allow full scanning of encrypted content. Without full (deep) inspection, the antivirus profile cannot scan or block malicious files (like eicar.com-zip) delivered over HTTPS, allowing the download to proceed.

- C. SD-WAN and NGFW
- D. zero trust network access (ZTNA) and next generation firewall (NGFW)

Explanation:

For a customer looking to upgrade their legacy on-premises proxy to a cloud-based proxy for a hybrid network, the combination of Secure Web Gateway (SWG) and Inline Cloud Access Security Broker (CASB) features in FortiSASE will provide the necessary capabilities.

Secure Web Gateway (SWG):

SWG provides comprehensive web security by inspecting and filtering web traffic to protect against web-based threats.

It ensures that all web traffic, whether originating from on-premises or remote locations, is inspected and secured by the cloud-based proxy.

Inline Cloud Access Security Broker (CASB):

CASB enhances security by providing visibility and control over cloud applications and services.

Inline CASB integrates with SWG to enforce security policies for cloud application usage, preventing unauthorized access and data leakage.
