Google Cloud - Apigee Certified API Engineer Sample Questions (Q85-Q90):

NEW QUESTION # 85

Which statements ate true when the following policy is used?
<SpikeArrest continueOnError="false" name="Arrest">
<Rate>5ps</Rate>
</SpikeArrest>

- A. The continueOnError setting means that normal flow processing will resume even if the traffic exceeds the spike arrest rate
- B. It is possible to make fewer than 5 requests in a second and still cause a spike arrest
- C. The rate of 5 per second indicates that 5 requests can be made at any time during a second: but the 6th and later requests durng the same second would be rejected
- D. Spike arrest is calculated separately on each message processor, so you could end up with significantly more than 5 calls in a second

Answer: A

NEW QUESTION # 86

What is the purpose of a refresh token?

- A. To request that Apigee re-issue a new access token to replace an expired access token.
- B. To reset an application to its default configuration.
- C. To notify the application that a new access token is required.
- D. To extend the amount of time an existing access token can be used by resetting the token's expiration time

Answer: A

NEW QUESTION # 87

As an API Engineer you are approached late in the day with an emergency request to configure a 2 way TLS connection between Apigee and the backend server. All existing certificates have been revoked. The security team provides you the PEM file for the backend server and your new Apigee TLS certificate. What minimum steps are required to reconfigure 2-way TLS?
Choose 2 answers

- A. Add the backend certificate chain to the trust store
- B. Add the backend servers PEM file to the trust store.
- C. Use the Access Control Policy to reference the PEM file
- D. Add the backend servers PEM file to the key store.
- E. Add your Apigee TLS certificate to the key store.
- F. Use the KVM to store the contents of the PEM file.

Answer: D,F

NEW QUESTION # 88
