Microsoft Power Platform Solution Architect Latest Pdf Material & PL-600 Valid Practice Files & Microsoft Power Platform Solution Architect Updated Study Guide

Are you still worrying about the high difficulty to pass Microsoft certification PL-600 exam? Are you still sleeplessly endeavoring to review the book in order to pass Microsoft PL-600 Exam Certification? Do you want to pass Microsoft PL-600 exam certification faster? Be quick to select our DumpsReview! Having it can quickly fulfill your dreams.

Microsoft PL-600 Certification Exam consists of multiple-choice questions that assess a candidate's knowledge of the Power Platform and their ability to design and implement solutions using its various applications. PL-600 exam covers topics such as data modeling, user experience design, automation workflows, and security configurations. Earning this certification can help professionals advance their career in the technology field and demonstrate their expertise to potential employers and clients.

The PL-600 Exam measures the candidate's ability to design and implement solutions that meet business requirements and ensure scalability, reliability, and security. It also evaluates their knowledge of the Power Platform architecture, integration with other Microsoft and third-party applications, and the use of advanced features and functionalities.

Microsoft Power Platform Solution Architect Sample Questions (Q182-Q187):

NEW QUESTION # 182

You are designing a data model for a Microsoft Power Platform solution.

The data model must meet the following requirements:

* When an account is assigned to a new salesperson, all opportunities that are associated with the account must be assigned to the new salesperson.

* When a salesperson assigns a lead to another salesperson, all phone call activities related to the lead must be assigned to the new salesperson.

You need to recommend cascading strategies for the data model.

Which cascading strategy should you recommend? To answer, drag the appropriate cascading strategies to the correct requirements. Each cascading strategy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 183

You need to recommend the field type to use for configuring meal selections during reservation.

Which field type should you recommend?

- A. Option Set
- B. Lookup
- C. Two Options
- D. Global Option Set

Answer: A

Explanation:

Explanation

Scenario:

Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.

The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.

In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage - once you define its text values you can centrally manage it.

Example:

NEW QUESTION # 184

A company plans to import 2.5 million data rows into Microsoft Dataverse during a go-live process. The import job will run as a single import job.

You run a test on the import and observe that some of the rows did not import.

You need to identify which rows did not import.

Which tool should you use?

- A. Microsoft Power Platform dataflows
- B. Import Data Wizard
- C. Azure Service Bus
- D. Azure Event Hub

Answer: B

NEW QUESTION # 185

You are a Microsoft Power Platform architect designing integrations for a project. You have the following integration requirements:

* Post requests to a system that is not always available and limited in its ability to process high volumes of messages.

* Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.

* Stream large volumes of data from the company's website to a live Power BI dashboard.

* Support enterprise-level integrations with Dynamics 365 that can be billed on a consumption basis.

You need to use an Azure service for the integration requirements.

Which Azure services should you use? To answer, select the appropriate options in the answer area?

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 186

You are designing a Power Platform solution for a company that provides in-home appliance maintenance.

When a customer schedules a service appointment, a dispatcher assigns one technician for a specific time and location.

The solution must capture information about the technician assigned to each appointment and the list of tools that the technician must bring to the appointment.

You need to recommend the data type for the captured information.

Which data type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Choice

Like Choices below, but can only select one of the option.

Box 2: Choices

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.
