VMware 2V0-32.24 시험요강:

주제	소개
주제 1	Architecture and Technologies: This section of the exam measures the skills of Cloud Architects and covers the core differences between VMware Cloud Management offerings, focusing on SaaS versus on-premises deployments. It introduces the capabilities of vRealize Suite Lifecycle Manager, vRealize Operations, and vRealize Log Insight, helping professionals understand the foundational technologies that support VMware's cloud ecosystem.
주제 2	Troubleshooting and Repairing: This section of the exam measures skills of Support Engineers and covers the diagnosis and resolution of common performance and configuration issues in vRealize Operations, Log Insight, and Lifecycle Manager. It also includes cluster management options, log bundle generation, password handling, and changing authentication settings, equipping professionals to ensure system reliability.
주제 3	Performance-tuning, Optimization, and Upgrades: This section has no testable objectives and therefore is not directly assessed in the exam.
주제 4	VMware Products and Solutions: This section of the exam measures the skills of Cloud Engineers and covers the components, integrations, and use cases for various VMware Cloud Management solutions. It includes tools like vRealize True Visibility Suite, Skyline, Federated Analytics, vRealize AI Cloud, and Log Insight Cloud. Candidates also explore deployment tools such as Remote Collectors and Cloud Proxies to understand their role in scalable cloud operations.
주제 5	Administrative and Operational Tasks: This section of the exam measures skills of Cloud Administrators and covers daily operational tasks such as content and environment management in vRealize Suite Lifecycle Manager. It also includes managing licensing, alert systems, dashboards, metrics, cost assessments, capacity optimization, workload planning, and system monitoring. Additionally, it explores access control, patching, and retention settings in vRealize Log Insight, ensuring ongoing operational excellence across VMware tools.

최신 VCP-CO 2024 2V0-32.24 무료샘플문제 (Q18-Q23):

질문 # 18

An administrator has added Microsoft Azure as a data source in vRealize Operations. Which is the minimal time interval that is supported for data collection?

- A. 5 minutes
- B. 10 minutes
- C. 30 minutes
- D. 1 minute

정답: C

설명:

When Microsoft Azure is added as a data source in vRealize Operations, the minimal supported time interval for data collection is 30 minutes. This is the smallest interval at which data can be retrieved from Azure, ensuring that performance and resource utilization data is gathered at regular intervals for monitoring and analysis.

질문 # 19

An administrator updated the alert and symptom definitions. The administrator now wants to complete an upgrade to the latest version of vRealize Operations.

Which two actions can be done to preserve the customized content? (Choose two.)

- A. Backup the customized content as a YAML file
- B. Select the checkbox 'Reset Default Content' when performing the upgrade
- C. Backup the customized content by cloning it
- D. Select the checkbox 'Preserve Custom Content' when performing the upgrade
- E. Import your custom content

정답: C,D

설명:

Select the checkbox 'Preserve Custom Content' when performing the upgrade: During the upgrade process, you can select the "Preserve Custom Content" option to ensure that any custom content, including alerts and symptoms, is retained during the upgrade to the latest version of vRealize Operations.

Backup the customized content by cloning it: Before upgrading, it's a good practice to backup customized content by cloning it. This ensures that you have a copy of the custom configurations in case they are lost or need to be restored after the upgrade.

질문 # 20

When using vRealize Lifecycle Manager to capture content from a vRealize Operations endpoint, which three statements are correct regarding the content sync? (Choose three.)

- A. An auto refresh of content list runs in the background every 15 minutes.
- B. Select the "Get latest" content option to retrieve the content in between automatic sync timers.
- C. Select the "Get latest" content option to retrieve the content, before the initial sync.
- D. An auto refresh of content list runs in the background every 30 minutes.
- E. The UI retrieves the content from the endpoint when listing the content for the first time.

- F. The UI retrieves the content every time from the endpoint when opening the endpoint.

정답: B,D,E

설명:

An auto refresh of content list runs in the background every 30 minutes: vRealize Lifecycle Manager automatically refreshes the content list from the vRealize Operations endpoint every 30 minutes to ensure the most current content is displayed.

Select the "Get latest" content option to retrieve the content in between automatic sync timers: If the administrator wants to manually sync and get the latest content between the auto-refresh intervals, they can select the "Get latest" option.

The UI retrieves the content from the endpoint when listing the content for the first time: When accessing the content for the first time, the UI will retrieve the content directly from the endpoint to populate the list.

질문 # 21

Which three types of Virtual Machine (VM) action can be scheduled in a vRealize Operations Automation Central job? (Choose three.)

- A. Downsize oversized VMs
- B. Reboot VMs
- C. Power On VMs
- D. Delete powered off VMs
- E. Move VMs
- F. Delete unused snapshots for VMs

정답: A,B,C

설명:

Power On VMs: You can schedule the action to power on specific VMs at a specified time.

Reboot VMs: Scheduling a reboot for VMs can be done to automate maintenance or restart processes.

Downsize oversized VMs: This action allows you to resize VMs based on performance data, ensuring resources are allocated optimally.

질문 # 22

Which statement is correct about the deployment process for vRealize Log Insight using vRealize Suite Lifecycle Manager?

- A. Federal Information Processing Standard (FIPS) is enabled by default.
- B. VMware Identity Manager (VIDM) is not a mandatory requirement.
- C. A DHCP address can be used for vRealize Log Insight worker nodes.
- D. A cluster Virtual IP (VIP) address is a mandatory requirement.

정답: C

설명:

In the deployment process for vRealize Log Insight using vRealize Suite Lifecycle Manager, DHCP addresses can be used for vRealize Log Insight worker nodes. This allows the flexibility to use dynamic IP addresses for worker nodes, simplifying network configuration in some environments.
