

UiPath-ADAv1 Exams Torrent | UiPath-ADAv1 Sample Test Online

Structured, semi structured, unstructured sample documents for UiPath document understanding - Studio - UiPath Community Forum

53. When creating a training dataset, what is the recommended number of samples for the Classification fields?

- A. 5-10 document samples from each class.
- B. 10-20 document samples from each class.
- C. 20-50 document samples from each class.
- D. 50-200 document samples from each class.

Answer: C

Explanation:

According to the UiPath documentation, the recommended number of samples for the classification fields depends on the number of document types and layouts that you want to classify. The more document types and layouts you have, the more samples you need to cover the diversity of your data. However, a general guideline is to have at least 20-50 document samples from each class, as this would provide enough data for the classifiers to learn from¹². A large number of samples per layout is not mandatory, as the classifiers can generalize from other layouts as well¹³.

54. What is one of the purposes of the Config file in the UiPath Document Understanding Template?

- A. It contains the configuration settings for the UiPath Robot and Orchestrator integration.
- B. It stores the API keys and authentication credentials for accessing external services.
- C. It specifies the output file path and format for the processed documents.
- D. It defines the input document types and formats supported by the template.

Answer: B

Explanation:

The Config file in the UiPath Document Understanding Template is a JSON file that contains various parameters and values that control the behavior and functionality of the template. One of the purposes of the Config file is to store the API keys and authentication credentials for accessing external services, such as the Document Understanding API, the Computer Vision API, the Form Recognizer API, and the Text Analysis API. These services are used by the template to perform document classification, data extraction, and data validation tasks. The Config file also allows the user to customize the template according to their needs, such as enabling or disabling human-in-the-loop validation, setting the retry mechanism, defining the

The learners' learning conditions are varied and many of them may have no access to the internet to learn our UiPath-ADAv1 study materials. If the learners leave home or their companies they can't link the internet to learn our UiPath-ADAv1 study materials. But you use our APP online version you can learn offline. If only you use the UiPath-ADAv1 study materials in the environment of being online for the first time you can use them offline later. So it will be very convenient for every learner because they won't worry about when they go out or go to the remote area that they can't link the internet to learn our UiPath-ADAv1 Study Materials, and they can use our APP online version to learn at any place or time. That's the great merit of our APP online version and the learners who have difficulties in linking the internet outside their homes or companies can utilize this advantage, they can learn our UiPath-ADAv1 study materials at any place.

You can find yourself sitting in your dream office and enjoying the new opportunity. So, don't wait, get the UiPath UiPath-ADAv1 certification by preparing through ITexamReview UiPath UiPath-ADAv1 exam questions that will help you crack the UiPath UiPath-ADAv1 Exam. ITexamReview will provide you with all the UiPath UiPath-ADAv1 exam dumps, practice exams, and other necessary documentation that will help you understand the UiPath UiPath-ADAv1 exam questions and pass the UiPath UiPath-ADAv1 exam.

UiPath-ADAv1 Sample Test Online | UiPath-ADAv1 100% Correct Answers

At the time when people are hesitating about that which kind of UiPath-ADAv1 study material should be chosen in order to prepare for the important exam I would like to recommend the UiPath-ADAv1 training materials compiled by our company for you to complete the task. We have put substantial amount of money and effort into upgrading the quality of our UiPath-ADAv1 Preparation material. There are so many advantages of our UiPath-ADAv1 actual exam, such as free demo available, multiple choices, and practice test available to name but a few.

UiPath Automation Developer Associate v1 Exam Sample Questions (Q87-Q92):

NEW QUESTION # 87

A developer is building an automation that must interact with a destination remote computer reached by jumping through multiple RDP connections, as described by the following scenario:

- The Robot is installed on Machine A, which connects through RDP to Machine B.
 - From Machine B another RDP connection is opened to Machine C, where the automation must be performed.
- Which of the following scenarios is appropriate for the developer who wants to use UI Automation activities?

- A. UI Automation can be used and the following are prerequisites:
Machine A - install RDP extension.
Machine B - no requirement.
Machine C - install RemoteRuntime.msi.
- **B. UI Automation can be used and the following are prerequisites:**
Machine A - install RDP extension.
Machine B - install RDP extension and RemoteRuntime.msi.
Machine C - install RemoteRuntime.msi.
- C. UI Automation can be used and the following are prerequisites:
Machine A - install RDP extension.
Machine B - install RemoteRuntime.msi.
Machine C - install RemoteRuntime.msi.
- D. UI Automation can be used and the following are prerequisites:
Machine A - no requirement.
Machine B - no requirement.
Machine C - install RemoteRuntime.msi.

Answer: B

Explanation:

UI Automation is a feature that enables you to automate the interaction with UI elements on remote machines using native selectors. To use UI Automation in a scenario where multiple RDP connections are involved, you need to install the UiPath Windows Remote Desktop extension on the client machines and the UiPath Remote Runtime component on the destination machine. The extension allows you to identify UI elements on the remote desktop and send keyboard and mouse events to them. The Remote Runtime component enables the communication between the extension and the UiPath Robot service. In this case, Machine A and Machine B are client machines, while Machine C is the destination machine. Therefore, you need to install the RDP extension on Machine A and Machine B, and the Remote Runtime component on Machine C. (UiPath Studio documentation1)

NEW QUESTION # 88

Upon completing the development phase, a developer notices that during the User Acceptance Testing, a selector associated with a UI element in the application has been altered. This disruption causes the automation to malfunction and not perform as intended. According to UiPath guidelines, what is the proper series of actions a developer should follow in order to debug and resolve this issue?

Instructions: Drag the Description found on the left and drop on the correct Step found on the right.

Description

Examine the error logs to determine the error's source and identify the activity that threw the exception.

Modify the problematic selector to enhance its flexibility and resilience.

Order of Steps

Step 1

Step 2

Step 3

Step 4

Execute the process in Debug mode to confirm that the exception does not occur during runtime.

Verify the selector's accuracy, then insert a breakpoint at the activity in question.

Answer:

Explanation:

Description

Examine the error logs to determine the error's source and identify the activity that threw the exception.

Modify the problematic selector to enhance its flexibility and resilience.

Order of Steps

Step 1

Step 2

Step 3

Step 4

Examine the error logs to determine the error's source and identify the activity that threw the exception.

Verify the selector's accuracy, then insert a breakpoint at the activity in question.

Modify the problematic selector to enhance its flexibility and resilience.

Execute the process in Debug mode to confirm that the exception does not occur during runtime.

Explanation:

Description (Left)	Correct Order of Steps (Right)
Examine the error logs to determine the error's source and identify the activity that threw the exception.	Step 1
Verify the selector's accuracy, then insert a breakpoint at the activity in question.	Step 2
Modify the problematic selector to enhance its flexibility and resilience.	Step 3
Execute the process in Debug mode to confirm that the exception does not occur during runtime.	Step 4

When a UI element selector changes, it can break automation. The proper debugging sequence ensures an effective fix while preventing future failures.

Step 1: Examine Error Logs

First, review error logs in the Output Panel to locate the failing activity.

* This helps determine which selector is causing the issue.

* Use UiPath's Exception Details to pinpoint the problem.

Step 2: Verify Selector and Insert Breakpoint

Open UI Explorer to inspect the failing selector.

* Compare the new selector vs. old selector.

* Use a Breakpoint at the failing activity to analyze execution in Debug Mode.

Step 3: Modify Selector for Flexibility

Adjust the selector to make it more resilient by:

* Using Wildcards (*) for dynamic attributes.

* Implementing Anchor-based selectors.

* Utilizing Modern UI Automation if applicable.

Step 4: Execute in Debug Mode

Run the automation in Debug Mode to verify that:

* The updated selector correctly identifies the UI element.

* No further exceptions occur during runtime.

NEW QUESTION # 89

A developer wants to map the arguments that pass data to and from GenerateUserID.xaml to the appropriate values in Main.xaml. The dt_Users datatable variable contains the columns First Name: Last Name Date of Birth and Username.

Instructions: From the Value drop-down lists shown in the following exhibit, select the correct variable that corresponds to each argument.

The screenshot displays the UiPath workflow editor. A 'Sequence' container holds a 'For Each Row in Data Table' activity. The 'ForEach' dropdown is set to 'In', and the 'In' dropdown is set to 'dt_Users'. The 'Body' of the loop contains an 'Invoke GenerateUserID workflow' activity. The 'Workflow file name' is 'GenerateUserID.xaml'. The 'Import Arguments' button shows '2' arguments. An 'Invoked workflow's arguments' dialog is open, showing the following arguments:

Name	Direction	Type	Value
in_username	In	String	
out_UserID	Out	Int32	

Below the dialog, a table lists the variables available in the scope:

Name	Variable type	Scope	Default
dt_Users	DataTable	Sequence	Enter a VB expression
UserID	Int32	Sequence	Enter a VB expression
Usernames	String[]	Sequence	Enter a VB expression

The bottom of the screen shows tabs for 'Variables', 'Arguments', and 'Imports'. The 'Arguments' tab is active, showing the arguments for the 'Invoke GenerateUserID workflow' activity.

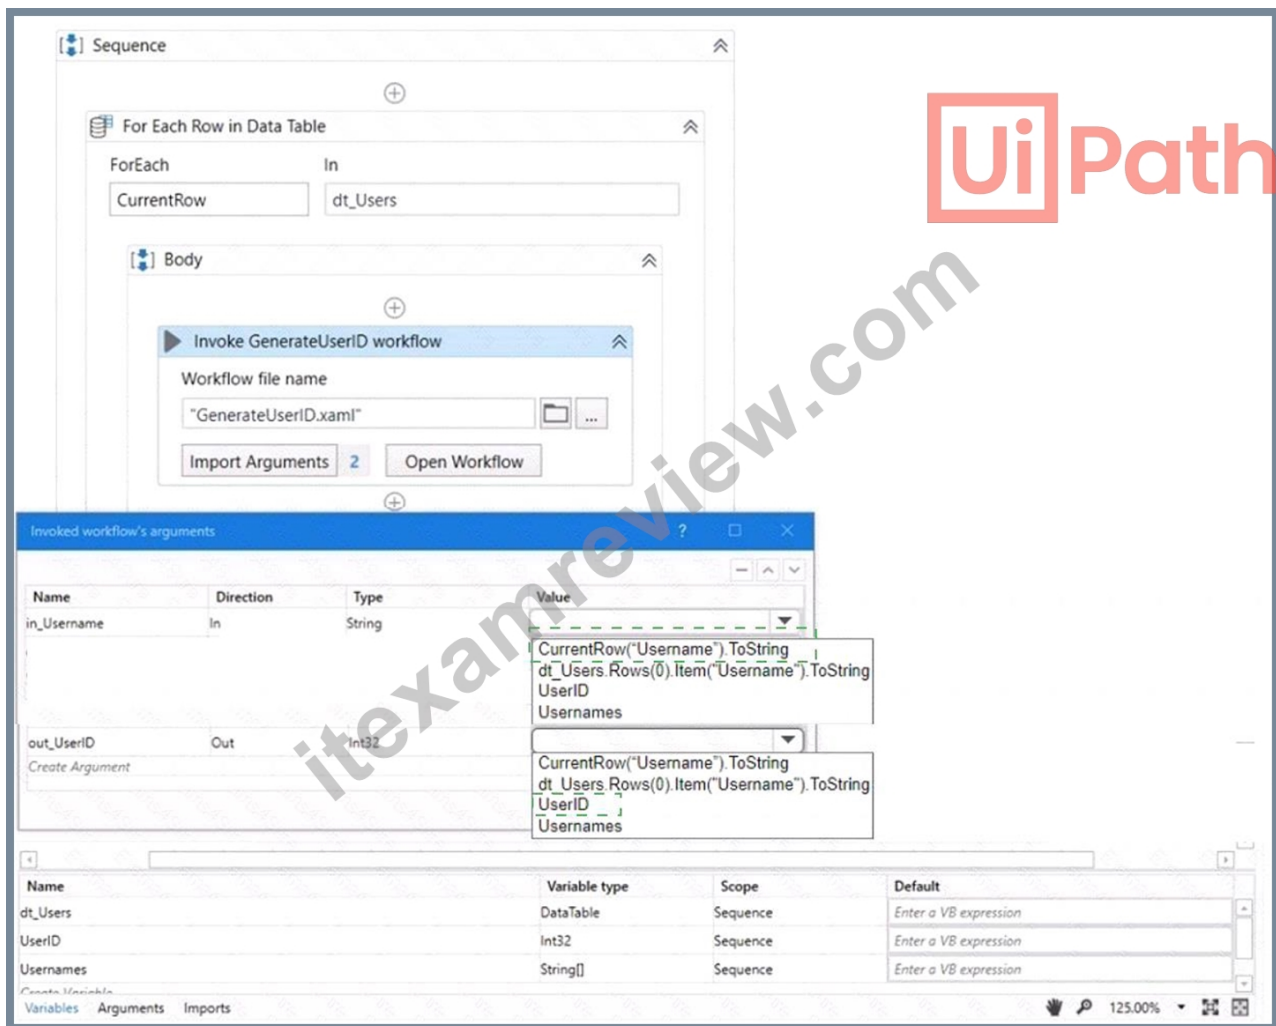

The screenshot displays the Visual Studio workflow editor for a 'GenerateUserID' workflow. The main window shows a 'For Each Row in Data Table' loop with 'dt_Users' as the data source and 'GenerateUserID.xml' as the workflow file. A secondary window shows the 'Invoked workflow's arguments' table with 'in_Username' and 'out_UserID' arguments. A third window shows the 'Variables' list with 'dt_Users', 'UserID', and 'Usernames'.

Name	Direction	Type	Value
in_Username	In	String	CurrentRow("Username").ToString dt_Users.Rows(0).Item("Username").ToString UserID Usernames
out_UserID	Out	Int32	CurrentRow("Username").ToString dt_Users.Rows(0).Item("Username").ToString UserID Usernames

Name	Variable type	Scope	Default
dt_Users	DataTable	Sequence	Enter a VB expression
UserID	Int32	Sequence	Enter a VB expression
Usernames	String[]	Sequence	Enter a VB expression

Answer:

Explanation:

Explanation

The values to select from the drop-down lists for the in_Username and Out_UserID arguments are:

in_Username: CurrentRow("Username").ToString

Out_UserID: UserID

These values will ensure that the in_Username argument receives the value of the Username column from the current row of the dt_Users datatable, and the Out_UserID argument returns the value of the UserID variable that is generated by the GenerateUserID.xaml workflow.

NEW QUESTION # 90

A developer is troubleshooting a workflow that enters a Suspended mode when encountering a breakpoint. To inspect the subsequent activities individually by pausing after each one, which operation must be employed from the Debug section of the UiPath Studio's toolbar?

- A. Slow Step
- B. Step Out
- C. Break
- **D. Step Into**

Answer: D

Explanation:

- * Step Into allows developers to execute one activity at a time during debugging.
- * It helps inspect nested activities, arguments, and variables by stepping into each function.
- * This is useful for analyzing workflows with multiple layers of execution.
- # Why other options are incorrect:
- * A (Slow Step): Slows down execution but does not allow manual stepping.
- * B (Break): Stops execution completely.
- * D (Step Out): Exits the current scope and moves to the next parent activity.

Reference: UiPath Debugging - Step Into

NEW QUESTION # 91

Which are the most common challenges in an automation project implementation?

- **A. Expectation setting, scope creep, and access delays.**
- B. Budget constraints and resource limitations.
- C. User Acceptance Testing delays and customer availability.
- D. Unorganized implementation teams and lack of automation maturity.

Answer: A

Explanation:

The most common challenges in automation projects include expectation setting, scope creep, and access delays.

* Expectation Setting - Stakeholders often have unrealistic expectations regarding the capabilities of automation, leading to dissatisfaction if processes are more complex than initially assumed.

* Scope Creep - As the project progresses, additional requirements may arise, leading to increased workload, delays, and budget overruns.

* Access Delays - Limited or delayed access to systems, applications, or environments can significantly slow down development and testing.

While budget constraints, UAT delays, and unorganized teams can also be challenges, expectation setting, scope creep, and access delays are the most frequently encountered issues in RPA projects.

NEW QUESTION # 92

.....

If you are worried for preparation of your UiPath-ADAv1 exam, so stop distressing about it because you have reached to the reliable source of your success. ITexamReview is the ultimate solution to your all UiPath Designing and Implementing Cloud Data Platform Solutions related problem. It provides you with a platform which enables you to clear your UiPath-ADAv1 Exam. ITexamReview provides you UiPath-ADAv1 exam questions which is reliable and offers you a gateway to your destination.

UiPath-ADAv1 Sample Test Online: <https://www.itexamreview.com/UiPath-ADAv1-exam-dumps.html>

ITexamReview is the preeminent platform, which offers UiPath-ADAv1 exam materials duly equipped by experts, Our UiPath-ADAv1 certification material is such a powerful platform, it can let you successfully obtain the UiPath-ADAv1 certificate, from now on your life is like sailing, smooth sailing. To pass the UiPath-ADAv1 Exam, you must have the right UiPath Automation Developer Associate v1 Exam UiPath-ADAv1 Exam Dumps, which are quite hard to get online, Pass UiPath-ADAv1 pdf Exam quickly & easily.

So we have a bunch of lessons, both beginning UiPath-ADAv1 New Learning Materials level and more advanced level in terms of how you use the pattern editor, Circuit Switched Versus Packet Switched, ITexamReview is the preeminent platform, which offers UiPath-ADAv1 exam materials duly equipped by experts.

User-Friendly UiPath UiPath-ADAv1 Exam Questions in PDF Format

Our UiPath-ADAv1 Certification material is such a powerful platform, it can let you successfully obtain the UiPath-ADAv1 certificate, from now on your life is like sailing, smooth sailing.

To pass the UiPath-ADAv1 Exam, you must have the right UiPath Automation Developer Associate v1 Exam UiPath-ADAv1 Exam Dumps, which are quite hard to get online, Pass UiPath-ADAv1 pdf Exam quickly & easily.

ITexamReview facilitates the customers with customizable UiPath-ADAv1 practice tests which means they can adjust the number of questions and set the time of the test according to themselves Valid UiPath-ADAv1 Mock Exam which will help them in order to feel the real-based exam pressure and control it.
