## **Salesforce Certified MuleSoft Platform Integration Architect Sample Questions (Q130-Q135):**

### **NEW QUESTION # 130**

A large enterprise is building APIs to connect to their 300 systems of records across all of their departments. These systems have a variety of data formats to exchange with the APIs, and the Solution Architect plans to use the application/dw format for data transformations.

What are two facts that the Integration Architect must be aware of when using the application/dw format for transformations?

(Choose two.)

- A. The application/dw format is the only native format that never runs into an Out Of Memory Error
- B. The application/dw format stores input data from an entire file in-memory if the file is 10MB or less
- C. The application/dw configuration property must be set to "onlyData=true" when reading or writing data in the application/dw format
- D. The application/dw format can impact performance and is not recommended in a production environment
- E. The application/dw format improves performance and is recommended for all production environments

**Answer: C,D**
