

GH-100퍼펙트최신덤프모음집 - GH-100최신덤프문제 모음집

그 외, ExamPassdump GH-100 시험 문제집 일부가 지금은 무료입니다: <https://drive.google.com/open?id=10SaPL7xU8uuCXzgKJha4Qsu0EFY7K1ZT>

GH-100는 Microsoft의 인증 시험입니다. GH-100 인증 시험을 패스하면 Microsoft 인증과 한 발짝 더 내디딘 것입니다. 때문에 GH-100 시험의 인기는 날마다 더해갑니다. GH-100 시험에 응시하는 분들도 날마다 더 많아지고 있습니다. 하지만 GH-100 시험의 통과율은 아주 낮습니다. GH-100 인증 시험 준비 중인 여러분은 어떤 자료를 준비하였나요?

Microsoft GH-100 시험요강:

주제	소개
주제 1	- Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI - CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.
주제 2	Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.
주제 3	Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.
주제 4	Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.

ExamPassdump의 제품을 구매하시면 우리는 일년무료업데이트 서비스를 제공함으로 여러분을 인증 시험을 패스하게 도와줍니다. 만약 인증 시험내용이 변경이 되면 우리는 바로 여러분들에게 알려드립니다. 그리고 최신버전이 있다면 바로 여러분들한테 보내드립니다. ExamPassdump는 한번에 Microsoft GH-100 인증 시험을 패스를 보장합니다.

최신 GitHub Administrator GH-100 무료 샘플문제 (Q37-Q42):

질문 # 37

An organization wants to share a single API key required for their Actions workflows. They need to restrict its use to only a subset of repositories. Where should they configure the secrets to minimize maintenance?

- A. Repository secrets
- **B. Organization secrets**
- C. Development environment secrets
- D. Environment secrets

정답: B

설명:

By defining the API key as an organization secret, you centralize management and can grant access only to the subset of repositories you choose - eliminating per-repo duplication while enforcing the desired scope.

질문 # 38

You are planning GitHub account management for a healthcare organization with strict compliance requirements. Which THREE of the following statements accurately describe GitHub Enterprise Managed Users (EMU) accounts? (Choose three.)

- A. EMU accounts can be used for both personal and enterprise repositories.
- **B. EMU accounts are owned by the organization and cannot be unlinked.**
- **C. EMU accounts are managed through an identity provider such as Azure AD.**
- D. EMU accounts are created and managed by individual users.
- **E. EMU accounts restrict users to enterprise-related activities only**
- F. EMU accounts allow users to create and manage their own credentials.

정답: B,C,E

설명:

Enterprise Managed User accounts are provisioned and authenticated exclusively through your identity provider (for example, AzureAD), so the IdP handles their creation, attribute updates, and deprovisioning.

Managed user accounts cannot create public content or interact with repositories outside your enterprise; they're confined to private and internal repos within the enterprise.

EMU accounts are owned and controlled by the enterprise (via the IdP) and cannot be converted into or unlinked as personal accounts outside that enterprise.

질문 # 39

Which Git operation is not included in the Git activity audit log?

- A. Fetch
- B. Push
- C. Clone
- **D. Delete branch**

정답: D

설명:

Delete branch operations aren't tracked as Git-activity events; the Git activity audit log only records Git events such as clone, fetch (pull), and push.

질문 # 40

Which of the following is true about outside collaborators in a GitHub organization?

- A. They are granted explicit access to specific repositories.
- B. They appear in the organization's internal member list.
- C. They inherit organization-wide policies, such as SSO requirements.
- D. They have access to all private repositories by default.

정답: A

설명:

Outside collaborators aren't organization members; instead, they're granted explicit access - at read, write, or admin level - to only the repositories you choose.

질문 # 41

A GitHub Enterprise administrator is planning to implement SAML SSO across their company. Which of the following correctly distinguishes enterprise-wide SAML SSO from organization-level SAML SSO?

- A. Enterprise-wide SAML SSO immediately removes users who fail to authenticate via the IdP.
- B. Enterprise-wide SAML SSO requires less initial administrative overhead than organization-level implementation.
- C. Enterprise-wide SAML SSO ensures users authenticate through the same IdP across all organizations.
- D. Enterprise-wide SAML SSO allows different organizations to use different authentication methods.

정답: C

설명:

Enterprise-wide SAML SSO enforces a single IdP across all member organizations-its configuration overrides any per-organization SAML settings, so everyone must authenticate through the same provider.

질문 # 42

.....

Microsoft인증GH-100시험을 위하여 최고의 선택이 필요합니다. ExamPassdump 선택으로 좋은 성적도 얻고 하면서 저희 선택을 후회하지 않을것니다.돈은 적게 들고 효과는 아주 좋습니다.우리ExamPassdump여러분의 응시분비에 많은 도움이 될뿐만아니라Microsoft인증GH-100시험은 또 일년무료 업데이트서비스를 제공합니다.작은 돈을 투자 하고 이렇게 좋은 성과는 아주 바람직하다고 봅니다.
