PRINCE2 Agile Foundation Sample Questions (Q86-Q91):

NEW QUESTION # 86
Which statement about velocity is CORRECT?

- **A. It describes how much work is getting done**
- B. It is shown by the ideal line on a bum-down chart
- C. It tracks the time and cost of a timebox
- D. It is based on the concept of rationalism

Answer: A

NEW QUESTION # 87
Which statement is CORRECT with respect to the management of risk using PRINCE2 Agile?

- **A. It should always be appropriate to the needs of the project**
- B. It should always be addressed during the daily stand-ups
- C. It should always be carried out formally
- D. It should always be carried out informally

Answer: A

NEW QUESTION # 88
How does the change theme regard change in PRINCE2 Agile?

- A. As disruptive
- B. As something to be avoided
- C. As a necessity
- **D. As inevitable**

Answer: D

Explanation:

NEW QUESTION # 89
Which statement explains how the 'learn from experience' principle is applied in an agile context?

- A. It provides guidance on mapping PRINCE2 roles to an agile environment
- B. It integrates releases within management stages
- C. It focuses on the prioritization and decomposition of requirements
- **D. It is supported by the 'inspect and adapt' concept**

Answer: D

NEW QUESTION # 90
What is the MOST important when blending PRINCE2 Project Management with agile?

- A. Fostering psychological safety
- B. Following agile processes
- C. Adopting agile mindset
- D. Using agile techniques

Answer: C

Explanation:
When blending PRINCE2 with agile, adopting an agile mindset is the most important factor for success. The mindset involves embracing agile values such as flexibility, collaboration, delivering value incrementally, and being responsive to change. Without this cultural and attitudinal shift, the use of agile techniques or processes becomes superficial and fails to deliver the benefits of agility.
PRINCE2 is a highly structured project management method with defined roles, processes, and controls.
Integrating agile methods requires more than just overlaying practices like Scrum or Kanban; it demands a fundamental shift in thinking about leadership, governance, team dynamics, and customer involvement.
Fostering psychological safety (B) is indeed important because it allows teams to express ideas, take risks, and innovate without fear of negative consequences. However, this psychological safety is a component of the broader agile mindset.
Using agile techniques (C) and following processes (D) are enablers but do not guarantee agile success.
Teams may mechanically perform ceremonies without understanding the principles behind them.
The PRINCE2 Agile guidance emphasizes that the mindset must permeate all levels of the project and organization. Leaders and teams should adopt agility as a philosophy, not just a set of practices.
