

Latest 300-835 Exam Notes - 300-835 Testing Center

BTW, DOWNLOAD part of PremiumVCEDump 300-835 dumps from Cloud Storage: https://drive.google.com/open?id=1b78kOhuBlgATEGn8ZOY_7-wun_YzTtvA

The Automating and Programming Cisco Collaboration Solutions (300-835) practice test software keeps track of each previous attempt and highlights the improvements with each attempt. The Automating and Programming Cisco Collaboration Solutions (300-835) mock exam setup can be configured to a particular style and arrive at unique questions. PremiumVCEDump Cisco 300-835 practice exam software went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form. The Cisco 300-835 Exam Dumps are similar to real exam questions. Our Cisco 300-835 practice test software is suitable for computer users with a Windows operating system.

Cisco 300-835 exam is designed for individuals who are interested in automating and programming Cisco Collaboration Solutions. Automating and Programming Cisco Collaboration Solutions certification exam is part of the Cisco Certified DevNet Professional program, which focuses on developing and maintaining applications built on Cisco platforms. 300-835 Exam covers a wide range of topics related to automating and programming Cisco Collaboration Solutions, including APIs, automation tools, programming languages, and software development methodologies.

Enhance Your Success Rate with PremiumVCEDump's Cisco 300-835 Practice Test

To learn more about our 300-835 exam braindumps, feel free to check our 300-835 Exams and Certifications pages. You can browse through our 300-835 certification test preparation materials that introduce real exam scenarios to build your confidence further. Choose from an extensive collection of products that suits every 300-835 Certification aspirant. You can also see for yourself how effective our methods are, by trying our free demo. So why choose other products that can't assure your success? With PremiumVCEDump, you are guaranteed to pass 300-835 certification on your very first try.

Cisco 300-835 exam is one of the most sought-after exams in the IT industry. It is a certification exam that is designed to test the candidate's knowledge and skills in automating and programming Cisco Collaboration solutions. 300-835 Exam is ideal for individuals who are interested in building a career in the field of automation and programming for Cisco Collaboration solutions.

Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q32-Q37):

NEW QUESTION # 32

Drag and Drop Question

Refer to the exhibit. Drag and drop the code snippets from the bottom onto the blanks in the code to construct a cURL command that edits an existing space to change the name to Annual Meeting. Not all options are used.

Creating and Modifying a coSpace

- Creating: POST method to the `/coSpaces` node. If the coSpace was created successfully, a "200 OK" response is received, and the "Location" header contains the ID for the new coSpace
- Modifying: PUT method on a `/coSpaces/<coSpaceID>` node

Parameters	Type/Value	Description/Notes
userProvisionedCoSpace	ID	Instantiate a new coSpace from the user provisioned cospace. When this parameter is present all the other parameters are ignored. (from version 3.1)
name	String	The human-readable name that will be shown on clients' UI for this coSpace
uri	String (URI user part)	The URI that a SIP system would use to dial in to this coSpace. (The URI "user part" is the part before any '@' character in a full URI.)

Answer Area

```
curl -X  \
https://cms.domain.local/api/v1/coSpaces/asdf-1234-qwer-y555
-H 'Authorization:  YWAtaW46YzFzY28xMjM=' \
-H 'content-type: multipart/' \
-F ''
```

Answer:

Explanation:

Answer Area

```
curl -X  \
https://cms.domain.local/api/v1/coSpaces/asdf-1234-qwer-y555 \
-H 'Authorization: ' \
-H 'content-type: multipart/' \
-F '
```

Explanation:

To modify an existing coSpace, the correct HTTP method is PUT. Authentication requires Basic format with base64-encoded credentials. Since we are updating the coSpace name, the parameter name = Annual Meetings is passed as form data in a multipart request.

NEW QUESTION # 33

Drag and drop the code snippets from the bottom onto the boxes where the code is missing to listen for Call History events using the xAPI Python SDK.

Not all options are used.

Select and Place:

Answer Area

```
import xows
import asyncio

async def start():
    async with xows.  ('10.10.20.160', username='admin') as client:
        def callback(data, id_):
            print(f'Feedback (Id {id_}): {data}')

        await client.  ([,
             'Updated'], callback, True)

        await client.wait_until_closed()

asyncio.run(start())
```

XAPIClient	Event
XoWSClient	CallHistory
subscribe	Updated
listen	

Answer:

Explanation:

Answer Area

```
import xows
import asyncio

async def start():
    async with xows.XoWSClient('10.10.20.160', username='admin') as client:
        def callback(data, id_):
            print(f'Feedback (Id {id_}): {data}')

        await client.subscribe(['Event', 'CallHistory'], 'Updated', callback, True)
        await client.wait_until_closed()

asyncio.run(start())
```

XAPIClient

Event

XoWSClient

NEW QUESTION # 35

Which two functions are provided by the Java-based computer telephony applications API?
(Choose two.)

- A. Provide analytics about Cisco Unified Communications Manager endpoints and users.
- B. Route calls by using computer telephony integration ports and route points (virtual devices).
- C. Control and observe Cisco Unified Communications Manager phones.

- D. Allow provisioning of Cisco Unified Communications Manager endpoints and users.
- E. Provide call blocking and screening for applications.

Answer: B,C

Explanation:

https://www.cisco.com/c/en/us/td/docs/voice_ip_comm/cucm/jtapi_dev/11_0_1/CUCM_BK_J2445_637_00_jtapi-developers-guide_1101/Overview.html

JTAPI Overview

Cisco Unified JTAPI serves as a programming interface standard developed by Sun Microsystems for use with Java-based computer-telephony applications. Cisco JTAPI implements the Sun JTAPI 1.2 specification with additional Cisco extensions. You use Cisco JTAPI to develop applications that:

- Control and observe Cisco Unified Communications Manager phones.
- Route calls by using Computer-Telephony Integration (CTI) ports and route points (virtual devices).

Basic telephony APIs that are supported comprises conference transfer, connect, answer, and redirect APIs.

NEW QUESTION # 36

Drag and drop the elements to create the command to initiate a call to device@company.com using the Webex Devices xAPI SSH Interface. Not all options are used.

Answer Area

Command to initiate a call

:
device@company.com

URI	Call
Number	xCommand
Device	xDial
Dial	Create

Answer:

Explanation:
