## 使用優秀的JN0-281最新考古題確保您通過您的Juniper JN0-281考試

NewDumps就是一個能使Juniper JN0-281認證考試的通過率提高的一個網站。NewDumps的資深IT專家在不斷研究出各種成功通過Juniper JN0-281認證考試的方案，他們的研究成果可以100%保證一次性通過Juniper JN0-281 認證考試。。NewDumps提供的培訓工具是很有效的，有很多已經通過了一些IT認證考試的人就是用了NewDumps提供的練習題和答案，其中也有通過Juniper JN0-281認證考試，他們也是利用的NewDumps提供的便利。選擇NewDumps就選擇了成功。

## 最新的 JNCIA-DC JN0-281 免費考試真題 (Q166-Q171):

### 問題 #166

Which two statements are correct about aggregated Ethernet bundles? (Choose two.)

- A. You must specify which interfaces are members of a specific aggregated Ethernet bundle.
- B. You must enable the chassis to support aggregated Ethernet interfaces.
- C. You must purchase a services license for the chassis to support aggregate Ethernet interfaces.
- D. You must enable LACP when configuring aggregated Ethernet bundles.

答案: A,B

### 問題 #167

What is the behavior of the default export policy for OSPF?

- A. Accept all routes.
- B. Redistribute all routes.
- C. Forward all routes.
- **D. Reject all routes.**

答案: D

解題說明:

In Junos, the default export policy for OSPF is to reject all routes from being exported.

Step-by-Step Breakdown:

Default Export Policy:

By default, OSPF in Junos does not export any routes to other routing protocols or neighbors. This is a safety mechanism to prevent unintended route advertisements.

Custom Export Policies:

If you need to export routes, you must create a custom export policy that explicitly defines which routes to advertise.

Example: You can create an export policy to redistribute static or connected routes into OSPF.

Juniper Reference:

OSPF Export Behavior: In Juniper devices, the default policy for OSPF is to reject route advertisements unless explicitly configured otherwise through custom policies.

### 問題 #168

Which BGP message type is used to establish peering sessions?

- A. Notification
- B. Update
- C. Keepalive
- **D. Open**

答案: D

### 問題 #169

Fill in the blank: In BGP, a route received from an \_\_\_\_\_ peer will not be advertised to another \_\_\_\_\_ peer by default.

- **A. IBGP, IBGP**
- B. Static, Dynamic
- C. EBGP, EBGP
- D. EBGP, IBGP

答案: A

### 問題 #170

What is the main advantage of using an Overlay Network in a data center?

- **A. It simplifies physical network design by allowing multiple virtual topologies over it.**
- B. It replaces the need for physical network infrastructure.
- C. It offers higher physical bandwidth capacity.
- D. It provides direct Internet access to applications.

答案: A

### 問題 #171
