

# Free F5 F5CAB1 Download - Practice F5CAB1 Exam Fee

Our company is a multinational company which is famous for the F5CAB1 training materials in the international market. After nearly ten years' efforts, now our company have become the topnotch one in the field, therefore, if you want to pass the F5CAB1 Exam as well as getting the related certification at a great ease, I strongly believe that the F5CAB1 study materials compiled by our company is your solid choice.

Everyone has their roles in society, and they are busy with their jobs and family. So the time and energy are very precious for the preparation of F5CAB1 actual test. While, now you are lucky. F5CAB1 cert guide will give you some instructions and help you do study plan for your coming test. If you are a fresh men in this industry, do not worry, F5 F5CAB1 PDF training will help you. The questions and knowledge points are very simple and easy to get. You can download the F5CAB1 test engine and install it on your phone. When you take the subway, you can open it and do test practice. To take full use of the spare time by F5CAB1 test engine, you will enjoy a high efficiency study experience.

## Practice F5CAB1 Exam Fee, F5CAB1 Valid Test Registration

If you can obtain the job qualification F5CAB1 certificate, which shows you have acquired many skills. In this way, your value is greatly increased in your company. Then sooner or later you will be promoted by your boss. Our F5CAB1 preparation exam really suits you best. Our F5CAB1 Study Materials can help you get your certification in the least time with the least efforts. With our F5CAB1 exam questions for 20 to 30 hours, and you will be ready to take the exam confidently.

## F5 F5CAB1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• BIG IP Administration Control Plane Administration: This section of the exam measures skills of System Administrators and covers managing the control plane where BIG IP is configured and administered. It includes working with user accounts, roles, device settings, configuration management, and using the graphical interface and command line for daily administrative tasks.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>BIG IP Administration Support and Troubleshooting:</b> This section of the exam measures skills of Network Administrators and covers identifying and resolving common issues that affect BIG IP operation. It focuses on using logs, statistics, diagnostic tools, and basic troubleshooting methods to restore normal traffic flow and maintain stable application delivery.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>BIG IP Administration Install Initial Configuration and Upgrade:</b> This section of the exam measures skills of System Administrators and covers the lifecycle tasks for deploying and maintaining a BIG IP system. It includes installing the platform, performing initial setup, applying licenses, configuring basic networking, and planning and executing software upgrades and hotfixes.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>BIG IP Administration Data Plane Configuration:</b> This section of the exam measures skills of System Administrators and covers configuring BIG IP objects that control data plane behavior. It focuses on setting up virtual servers, pools, nodes, monitors, and profiles so that applications are delivered reliably and efficiently according to design requirements.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>BIG IP Administration Data Plane Concepts:</b> This section of the exam measures skills of Network Administrators and covers how BIG IP handles application traffic on the data plane. It includes understanding flow of traffic, key data path components, basic concepts of load balancing, and how security and performance features affect user traffic.</li> </ul>

## F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample Questions (Q41-Q46):

### NEW QUESTION # 41

An administrator is in the process of reactivating the license using the interface displayed in the exhibit.

What is the address of the license server to which the BIG-IP device must be able to establish an outbound connection in order to use the Automatic Activation Method?

- A. license.f5.com
- B. ask.f5.com
- C. activate.f5.com
- D. callhome.f5.com

**Answer: C**

**Explanation:**

When you choose Automatic as the activation method in the License , Re-activate screen, the BIG-IP device itself contacts F5's license activation service over the Internet.

For successful automatic activation:

- \* The BIG-IP must have outbound network connectivity (typically via the management interface).
- \* DNS resolution and routing must allow it to reach the F5 license activation host (the one shown in option D).
- \* The device sends its dossier and registration key to that service and receives an updated license file in return, which is then installed automatically.

The other hostnames in the options are not used by BIG-IP for license activation, so they cannot be correct in the context of Automatic Activation.

#### NEW QUESTION # 42

A BIG-IP Administrator needs to purchase new licenses for a BIG-IP appliance.

The administrator needs to know:

- \* Whether a module is licensed
- \* The memory requirement for that module

Where should the administrator view this information in the System menu?

- A. Configuration Device
- B. Software Management
- C. Configuration OVSDDB
- **D. Resource Provisioning**

**Answer: D**

Explanation:

To understand:

- \* Which modules are licensed
- \* Which modules are provisioned
- \* The resource requirements (CPU / RAM) of each module

The administrator uses:

System Resource Provisioning

This page displays:

- \* All modules present in the license
- \* Whether they are enabled or disabled
- \* Required memory to activate each module
- \* CPU and disk allocation information
- \* Provisioning level options (None / Minimal / Nominal / Dedicated)

This is the exact location where BIG-IP administrators evaluate module capacity before enabling or purchasing licensing upgrades.

Why the other options are incorrect:

A). Configuration OVSDDB

\* Used for network virtualization integrations, not licenses or modules.

B). Software Management

\* Used for software image installation, not licensing.

C). Configuration Device

\* Displays hostname, failover settings, device properties - not module resource requirements.

Thus, module licensing and memory requirement data are found under Resource Provisioning.

#### NEW QUESTION # 43

The Port Lockdown feature prevents unwanted connection attempts to a Self IP.

Which three types of connection attempts are unaffected by Port Lockdown settings?

- A. Centralized Management Infrastructure (CMI), Secure Shell (SSH), Internet Control Message Protocol (ICMP)
- **B. Defined virtual server traffic, Internet Control Message Protocol (ICMP), Centralized Management Infrastructure (CMI)**
- C. Defined virtual server traffic, Secure Shell (SSH), Centralized Management Infrastructure (CMI)

**Answer: B**

Explanation:

Port Lockdown controls which ports and protocols a Self IP will respond to.

However, certain traffic types bypass Port Lockdown for BIG-IP functionality and routing integrity.

The three types that are NOT affected by Port Lockdown are:

1. Defined Virtual Server Traffic

Traffic destined to a Self IP that matches a configured virtual server is always accepted by the BIG-IP, regardless of Port Lockdown settings.

This ensures that traffic processing does not break when administrators restrict Self-IP ports.

2. ICMP (Internet Control Message Protocol)

ICMP (such as ping, traceroute responses, etc.) always passes through a Self IP even when Port Lockdown is set to:

- \* Allow Default
- \* Allow None
- \* Allow Custom

F5 allows ICMP for reachability and diagnostic purposes independent of Port Lockdown rules.

### 3. Centralized Management Infrastructure (CMI)

CMI includes the internal HA services used for:

- \* Device Trust
- \* ConfigSync
- \* Failover
- \* Mirroring

These essential HA communications bypass Port Lockdown to prevent accidental cluster failure.

The well-known port for this traffic is TCP 4353, which is always permitted.

Why the other options are incorrect:

Option A: SSH is restricted by Port Lockdown unless explicitly allowed.

Option B: Same issue - SSH does not bypass Port Lockdown.

Only Defined VS Traffic, ICMP, and CMI bypass Port Lockdown.

### NEW QUESTION # 44

A BIG-IP Administrator needs to purchase new licenses for a BIG-IP appliance.

The administrator needs to know:

- \* Whether a module is licensed
- \* The memory requirement for that module

Where should the administrator view this information in the System menu?

- A. Configuration - Device
- B. Software Management
- **C. Resource Provisioning**
- D. Configuration - OVSDDB

**Answer: C**

### NEW QUESTION # 45

A BIG-IP Administrator plans to upgrade a BIG-IP device to the latest TMOS version.

Which two tools could the administrator leverage to verify known issues for the target versions? (Choose two.)

- A. F5 Downloads
- **B. F5 iHealth**
- C. F5 University
- **D. F5 Bug Tracker**
- E. F5 End User Diagnostics (EUD)

**Answer: B,D**

Explanation:

Comprehensive and Detailed Explanation (Paraphrased from F5 BIG-IP Administration Install, Initial Configuration, and Upgrade concepts) When performing a TMOS upgrade, F5 recommends validating the target software version to ensure that the release does not contain defects that may impact system behavior. The upgrade preparation process includes checking for known issues, validating compatibility, and reviewing advisory information for the intended version. Two primary F5 tools serve this purpose:

B). F5 iHealth

iHealth is a cloud-based diagnostic and analysis platform used to evaluate the operational state of a BIG-IP system.

Administrators upload a QKView file to iHealth to receive an automated assessment of the system. As part of upgrade planning, iHealth provides:

- \* Version-specific issue analysis, comparing the system's configuration and hardware against F5's internal catalog of published issues.
- \* Upgrade advisories, identifying potential risks such as deprecated features, module compatibility concerns, or changes in behavior between TMOS versions.
- \* Checks against known defects, allowing administrators to determine whether the target TMOS version contains issues relevant to their deployment.

This aligns with F5's recommended upgrade workflow, where iHealth is used before upgrading to confirm system readiness and detect software-level concerns.

#### D). F5 Bug Tracker

The Bug Tracker is F5's dedicated interface for reviewing software defects across TMOS releases.

It enables administrators to:

- \* Search for known bugs by TMOS version, module, severity, or defect ID.
- \* Review the status of defects (open, resolved, fixed in later releases).
- \* Identify whether high-impact or security-related issues are associated with the target upgrade version.

F5 documentation emphasizes reviewing known defects prior to installation of new software images, making the Bug Tracker a critical resource for upgrade validation.

Why the other options are not correct

#### A). F5 End User Diagnostics (EUD)

EUD is used exclusively for hardware diagnostics (ports, memory, fans). It does not provide software-related issue verification and is not used for upgrade planning.

#### C). F5 University

This is a training platform, not an operational tool. It does not provide defect listings or upgrade-specific warnings.

#### E). F5 Downloads

Although it provides access to software images and release notes, it is not a tool for identifying known bugs.

Release notes summarize general fixes and features, but systematic bug verification requires iHealth or the Bug Tracker.

### NEW QUESTION # 46

.....

We try our best to provide the most efficient and intuitive F5CAB1 learning materials to the learners and help them learn efficiently. Our F5CAB1 exam reference provides the instances, simulation and diagrams to the clients so as to they can understand them intuitively. Based on the consideration that there are some hard-to-understand contents we insert the instances to our F5CAB1 Test Guide to concretely demonstrate the knowledge points and the diagrams to let the clients understand the inner relationship and structure of the F5CAB1 knowledge points.
