27001-Foundation Test Torrent & ISO/IEC 27001 (2022) Foundation Exam Torrent Dumps

As is known to us, a suitable learning plan is very important for all people. For the sake of more competitive, it is very necessary for you to make a learning plan. We believe that the Software version of our ISO-IEC-27001-Foundation actual exam will help you make a good learning plan which is a model test in limited time simulating the Real ISO-IEC-27001-Foundation Exam, if you finish the model ISO-IEC-27001-Foundation test, our system will generate a report according to your performance.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q49-Q54):

NEW QUESTION # 49

Identify the missing word(s) in the following control relating to the Policies for information security control.

"Information security policy and topic-specific policies should be defined, approved by management, [?] and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur."

- A. established and maintained
- B. published
- C. communicated to
- **D. published, communicated to**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) states:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This confirms that the missing words are "published, communicated to." The control emphasizes not just defining and approving policies but ensuring they are actively distributed and communicated so that relevant stakeholders are aware of and acknowledge them. Options A, B, and D are partial but incomplete.

Thus, the correct answer is C.

NEW QUESTION # 50

Which output is a required result from risk analysis?

- A. Prioritized risks for treatment
- **B. Determined levels of risk**
- C. Risk treatment control options
- D. Risk acceptance criteria

Answer: B

Explanation:

Clause 6.1.2 (d) states that during risk analysis, the organization shall:

* "assess the potential consequences that would result if the risks identified... were to materialize;"

* "assess the realistic likelihood of the occurrence of the risks identified;"

* "determine the levels of risk."

This makes it clear that the required output of risk analysis is the determined levels of risk. Risk acceptance criteria (A) are set earlier in 6.1.2(a), treatment control options (C) belong to 6.1.3, and prioritization (D) is part of risk evaluation (6.1.2 e). Therefore, the verified correct output is B: Determined levels of risk.

NEW QUESTION # 51

Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?

* ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process

* ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC

27001

- A. Only 1 is true
- B. Only 2 is true
- C. Neither 1 or 2 is true
- D. Both 1 and 2 are true

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:

ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 provides detailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC

27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them.

However, ISO/IEC 27002 does not provide a process for risk management—that is covered by ISO/IEC

27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3).

Therefore, statement 1 is true, but statement 2 is false. Correct answer: A.

NEW QUESTION # 52

Identify the missing word(s) in the following sentence.

When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [?] these actions.

- A. apply competent resources to
- B. communicate
- C. evaluate the effectiveness of
- D. improve the effectiveness of

Answer: C

Explanation:

Clause 6.1.1 (Planning) states:

"The organization shall plan:

d) actions to address these risks and opportunities; and

e) how to:

* integrate and implement the actions into its ISMS processes; and

* evaluate the effectiveness of these actions."

This confirms the missing words are "evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

NEW QUESTION # 53

Which action is a required response to an identified residual risk?

- A. Top management shall delegate its treatment to risk owners
- B. The organization shall change practices to avoid the risk occurring
- C. By default, it shall be controlled by information security awareness and training
- D. It shall be reviewed by the risk owner to consider acceptance

Answer: D

Explanation:

Clause 6.1.3 (e) specifies:

"The organization shall obtain risk owners' approval of the information security risk treatment plan and acceptance of the residual information security risks." This confirms that residual risks - those remaining after risk treatment - must be reviewed and formally

accepted by the designated risk owner. Option A is incorrect; awareness training is not a default control for all residual risks. Option

B misrepresents leadership responsibility; top management ensures processes exist, but risk owners formally approve residual risk.

Option D (avoiding risk) is a treatment option, not the mandated requirement for residual risks.

Thus, the required response is C: Review and acceptance by the risk owner.
