

# Latest 2V0-13.25 Practice Questions - 2V0-13.25 Valid Exam Format

[Pass VMware 2V0-13.25 Exam | Latest 2V0-13.25 Dumps & Practice Exams - Cert007](#)

**Exam : 2V0-13.25**

**Title : VMware Cloud Foundation  
9.0 Architect**

**<https://www.cert007.com/exam/2v0-13-25/>**

1/8

P.S. Free 2026 VMware 2V0-13.25 dumps are available on Google Drive shared by ITExamDownload:  
<https://drive.google.com/open?id=1bBAw5dhJD09btXlrsyWviakQurAvUN9p>

Adapt to the network society, otherwise, we will take the risk of being obsoleted. Our 2V0-13.25 qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the 2V0-13.25 Study Tool. You can trust us and let us be your honest cooperators in your future development. Here are several advantages about our 2V0-13.25 exam for your reference.

## VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.</li> </ul>

## 2V0-13.25 Valid Exam Format - Exam 2V0-13.25 Passing Score

Some people are worrying about that they cannot operate the windows software and the online test engine of the 2V0-13.25 training engine smoothly. We ensure that you totally have no troubles in learning our 2V0-13.25 study materials. All small buttons are designed to be easy to understand. Also, the layout is beautiful and simple. Complex designs do not exist in our 2V0-13.25 Exam Guide. You can find that our content is easy to follow and practice.

## VMware Cloud Foundation 9.0 Architect Sample Questions (Q52-Q57):

### NEW QUESTION # 52

Which VMware Cloud Foundation tools help optimize cloud resource utilization?

- A. VMware vSphere
- B. VMware vRealize Automation
- C. VMware vSAN
- D. VMware vRealize Operations

**Answer: B,D**

Explanation:

VMware vRealize Operations and vRealize Automation are critical for optimizing cloud resource utilization in VMware Cloud Foundation.

### NEW QUESTION # 53

During a requirements gathering workshop, the customer has provided a list of business and technical requirements. Which requirement should be classified as a business requirement?

- A. The solution should reduce operational costs.
- B. The solution must consider security and resiliency to ensure continuity.
- C. The solution must provide no Single Point of Failure (SPOF).
- D. The solution needs to grow by 30% over the next three years.

**Answer: A**

Explanation:

VMware Cloud Foundation architecture uses the RACR framework (Requirements, Assumptions, Constraints, Risks) to classify inputs:

- \* Business requirements describe high-level outcomes the business wants to achieve, often focusing on cost, efficiency, or customer satisfaction.
- \* Technical requirements define how infrastructure should behave to meet performance, resiliency, or security needs.

Among the given options:

- \* A (growth by 30%) and C (no SPOF) are technical requirements.
- \* B (security and resiliency) is also a technical requirement.
- \* D (reduce operational costs) directly aligns with business goals, making it the correct business requirement.

Reference: VMware Cloud Foundation 9.0 - Conceptual Design and Requirements Classification (RACR Framework).

## NEW QUESTION # 54

An architect is evaluating a requirement for a Cloud Management self-service solution to offer its users the ability to migrate their own workloads using VMware vMotion.

Which component could the architect include in the solution design that will help satisfy the requirement?

- A. Aria Suite Lifecycle Manager
- B. Aria Automation Orchestrator
- C. Aria Automation Config
- D. Aria Operations

**Answer: B**

Explanation:

The requirement is for a self-service solution allowing users to migrate their own workloads using VMware vMotion within a VMware Cloud Foundation (VCF) 5.2 environment. vMotion is a vSphere feature that enables live migration of virtual machines (VMs) between ESXi hosts with no downtime, typically managed by administrators via vCenter. A self-service solution implies empowering end users (e.g., application owners) to initiate this process through a user-friendly interface or automation tool. Let's evaluate each component:

Option A: Aria Suite Lifecycle Manager

Aria Suite Lifecycle Manager (LCM) is responsible for deploying, upgrading, and managing the lifecycle of VMware Aria Suite components (e.g., Aria Automation, Aria Operations). It does not provide self-service capabilities or direct interaction with vMotion. The VMware Aria Suite Lifecycle Administration Guide confirms its role is administrative, not end-user-facing, making it unsuitable for this requirement.

Option B: Aria Automation Orchestrator

Aria Automation Orchestrator (formerly vRealize Orchestrator) is a workflow automation engine integrated with Aria Automation in VCF 5.2. It allows the creation of custom workflows, including vMotion operations, which can be exposed to users via the Aria Automation self-service portal. The VMware Aria Automation Orchestrator Administration Guide details how workflows can call vSphere APIs (e.g., RelocateVM\_Task) to initiate vMotion, enabling users to trigger migrations without direct vCenter access. In VCF, this integrates with SDDC Manager and vCenter, satisfying the self-service requirement by providing a customizable, user-accessible automation layer.

Option C: Aria Operations

Aria Operations (formerly vRealize Operations) is a monitoring and analytics tool for performance, capacity, and health of VCF components. It provides dashboards and insights but has no capability to execute vMotion or offer self-service workload management. The VMware Aria Operations Administration Guide confirms its focus is observability, not automation or user interaction, ruling it out.

Option D: Aria Automation Config

Aria Automation Config (formerly SaltStack Config) is a configuration management tool for automating infrastructure and application states (e.g., patching, compliance). It lacks native vMotion integration or a self-service portal for workload migration. The VMware Aria Automation Config User Guide focuses on configuration tasks, not VM migration, making it irrelevant here.

Conclusion:

Aria Automation Orchestrator (B) is the best fit. It enables the architect to design workflows for vMotion, integrated with Aria

Automation's self-service portal, meeting the requirement for user-driven workload migration in VCF 5.2.

Reference: VMware Cloud Foundation 5.2 Architectural Guide (docs.vmware.com): Section on Aria Suite Integration and Automation.

VMware Aria Automation Orchestrator Administration Guide (docs.vmware.com): Workflow Creation for vSphere Actions (vMotion).

VMware Aria Suite Lifecycle Administration Guide (docs.vmware.com): LCM Capabilities.

VMware Aria Operations Administration Guide (docs.vmware.com): Monitoring Scope.

#### NEW QUESTION # 55

Which Broadcom technologies are essential for optimizing VMware vSphere's network performance?

- A. Broadcom FastLinQ adapters
- B. Broadcom SmartNICs
- C. Broadcom 25G/50G Ethernet adapters
- D. Fibre Channel SAN

**Answer: A,B,C**

Explanation:

25G/50G Ethernet, FastLinQ adapters, and SmartNICs optimize VMware vSphere network performance with Broadcom technology.

#### NEW QUESTION # 56

As part of a design for a VMware Cloud Foundation (VCF) solution, an architect has documented the following dependencies and constraints:

\* CONSO01 - Internet access will not be permitted from anywhere within the VCF solution.

\* CONS002 - The password must not be stored in plain text anywhere within the VCF solution.

\* DEP001 - The customer must make the required VCF binaries accessible to the VCF Installer appliance during the deployment phase.

Which design decision should the architect include in the design for the download of the VCF binaries?

- A. The VCF Installer appliance will be configured to connect to an offline depot.
- B. The VCF Installer appliance will be configured to connect to an online depot.
- C. The VCF Download Tool will be used on the VCF Installer appliance.
- D. The Bundle Transfer Utility will be used on the VCF Installer appliance.

**Answer: A**

Explanation:

Due to the explicit constraint that no internet access is permitted, the VCF Installer cannot connect to an online depot. Instead, the architect must use the offline depot model, where binaries are downloaded externally and made accessible locally within the VCF environment (e.g., using a local web server).

This setup aligns with VMware's "air-gapped" deployment guidance for VCF environments with strict security postures.

Reference: VMware Cloud Foundation Deployment Guide - Offline Depot Configuration for Air-Gapped Environments

#### NEW QUESTION # 57

.....

Our team of experts updates actual VMware 2V0-13.25 questions regularly so you can prepare for the 2V0-13.25 exam according to the latest syllabus. Additionally, we also offer up to 1 year of free 2V0-13.25 exam questions updates. We have a 24/7 customer service team available for your assistance if you get stuck somewhere. Buy 2V0-13.25 Latest Questions of ITExamDownload now and get ready to crack the 2V0-13.25 certification exam in a single attempt.
