Test NCP-MCA Dump & Test NCP-MCA Dumps Pdf

Nutanix NCP-MCA certification exams are a great way to analyze and evaluate the skills of a candidate effectively. Big companies are always on the lookout for capable candidates. You need to pass the NCP-MCA Certification Exam to become a certified professional. This task is considerably tough for unprepared candidates however with the right NCP-MCA prep material there remains no chance of failure.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q60-Q65):

NEW QUESTION # 60

A developer created blueprints in a development environment, and everything worked as expected. The developer then moved the blueprints to the production environment but noticed that the deployment is noticeable slower in production compared to the development environment.

What is the most likely issue causing this behavior?

- A. The production Prism Central only has 26 RAM allocated.
- B. Prism Central is not able to reach the DNS server.
- C. The production Prism Central is not compatible with Calm.
- D. The production Prism Element Data service IP address is incorrect.

Answer: A

Explanation:

According to the Nutanix Calm Administration Guide¹, the minimum system requirements for Prism Central are 32 GB of RAM and 8 vCPUs. If the production Prism Central has less than the minimum RAM, it may affect the performance of Calm and other services running on Prism Cen

NEW QUESTION # 61

Which permission level grants access to Create, Update, Delete, and Duplicate Blueprints?

- A. Domain Admin
- B. Operator
- C. Consumer
- D. Developer

Answer: D

NEW QUESTION # 62

An administrator has been tasked with creating a multicloud, three-tier application using Calm. The application needs to consist of:
A MongoDB backend database

A NodeJS Javascript runtime environment

An NGINX webserver

The administrator has access to an AWS account, as well as a locally hosted Nutanix cluster. The three parts of the application should be fully redundant, and be able to tolerate either a cloud provider outage, or a local Nutanix cluster outage.

What is the most appropriate solution the administrator should choose in order to meet the requirements?

- A. Create a Calm blueprint with MongoDB, Node/S and NGINX VMs running on Nutanix, and a separate blueprint for MongoDB, NodeJS, and NGINX running in AWS on US-WEST-1 and US-EAST-1.
- B. Create a Calm blueprint with MongoDB, Node/S, and NGINX VMs running on Nutanix, then manually create three EC2 instances for MongoDB, NodeJS and NGINX in AWS running on US-WEST-1 and US-EAST-1.
- C. Create a Calm blueprint with MongoDB, Node/S, and NGINX VMs running on Nutanix, as well as MongoDB, NodeJS, and NGINX servers running in AWS on US-WEST-1 and US-EAST-1.
- D. Create a Calm blueprint with MongoDB, Node/S, and NGINX VMs running on Nutanix, as well as an NGINX server running in AWS on US-WEST-1 and US-EAST-1.

Answer: C

Explanation:

This solution meets the requirements of creating a multicloud, three-tier application using Calm. It ensures that each tier of the application has a redundant copy running on both Nutanix and AWS, and that the application can tolerate either a cloud provider outage or a local Nutanix cluster outage. The other options do not provide full redundancy for each tier, or require manual intervention to create the AWS instances. References: Nutanix Certified Professional - Multicloud Automation (NCP-MCA) Exam Blueprint Guide, page 10; Nutanix Multicloud Automation Administration (NMCAA) Course, Module 5: Blueprints.

NEW QUESTION # 63

Refer to the exhibit.

The screenshot shows the configuration for an alert in Nutanix. On the left, there are three sections: 'Trigger' (empty), 'Alert' (containing a bell icon and the word 'Alert'), and 'Actions' (containing three items: 'VM Snapshot' with a camera icon, 'VM Add Memory' with a server rack icon, and 'Email' with an envelope icon). On the right, the 'Alert' details are shown: 'Alert Policy' is 'VM {vm_name} Memory Constrained', 'Severity' is 'Info', and 'Target Entities' is empty. A large watermark 'testsimulate.com' is overlaid diagonally across the center of the image.

The VM appSAP01 dev is a SAP development environment application and it is common to have memory constrained alerts on this VM, but the administrator wants to avoid adding memory to development VMs like this one, since this is normally done for only production VMs.

Which two actions should the administrator take to avoid adding memory to the development VMs? (Choose two.)

- A. Modify the Alert by adding the correct category
- B. Disable the Alert in Prism Central
- C. Assign the category Environment:Development to development VMs
- D. Assign the category Environment:Production to the production VMs

Answer: A,C

NEW QUESTION # 64

A company has a business-critical VM. The VM Utilization of CPU and memory differs from time to time, but can never be allowed to run out of resources. The administrator also wants to make sure that the VM is not over provisioned when not needed. The administrator determines these requirements that have been validated and automated in a test environment should also apply for the production environment:

VCPU needs to be added when CPU Utilization been over 80% for 15 minutes.

Memory needs to be increased by 4 GB when utilization reaches 80%.

Return of over-allocated resources must not affect other business applications.

What can the administrator do with the least amount of effort to make sure the VM is always performant and returns resources when not required?

- A. Create a blueprint based on requirements
- B. Clone and adjust the system-created playbooks
- C. Create a task based on requirements
- D. Import the playbook and adjust the values

Answer: C

NEW QUESTION # 65

.....

As is known to us, getting the newest information is very important for all people to pass the exam and get the certification in the shortest time. In order to help all customers gain the newest information about the NCP-MCA exam, the experts and professors from our company designed the best NCP-MCA Study Materials. The IT experts will update the system every day. If there is new information about the exam, you will receive an email about the newest information about the NCP-MCA study materials.
