

New F5CAB4 Exam Vce, F5CAB4 Reliable Exam Pattern

What's more, part of that VCEngine F5CAB4 dumps now are free: <https://drive.google.com/open?id=1Ma1OCVddcakE1TVFNqGrQfxmHeiYR8Rd>

According to the survey of our company, we have known that a lot of people hope to try the F5CAB4 test training materials from our company before they buy the F5CAB4 study materials. So a lot of people long to know the F5CAB4 study questions in detail. In order to meet the demands of all people, our company has designed the trail version for all customers. We can promise that our company will provide the demo of the F5CAB4 learn prep for all people to help them make the better choice. It means you can try our demo and you do not need to spend any money.

Many clients may worry that if they buy our product they will fail in the exam but we guarantee to you that our F5CAB4 study questions are of high quality and can help you pass the exam easily and successfully. Our product boosts 99% passing rate and high hit rate so you needn't worry that you can't pass the exam. Our F5CAB4 exam torrent is compiled by experts and approved by experienced professionals and updated according to the development situation in the theory and the practice. Our BIG-IP Administration Control Plane Administration guide torrent can simulate the exam and boosts the timing function. The language is easy to be understood and makes the learners have no learning obstacles. So our F5CAB4 Exam Torrent can help you pass the exam with high possibility.

F5CAB4 Reliable Exam Pattern - Real F5CAB4 Exam

Opportunities are very important in this society. With the opportunity you can go further. However, it is difficult to seize the opportunity. Is your strength worthy of the opportunity before you? In any case, you really need to make yourself better by using our F5CAB4 training engine. With our F5CAB4 Exam Questions, you can equip yourself with the most specialized knowledge of the subject. What is more, our F5CAB4 study materials can help you get the certification. Imagine you're coming good future maybe you will make a better choice!

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q48-Q53):

NEW QUESTION # 48

A BIG-IP administrator is troubleshooting inconsistent configuration objects on devices in a device group.

The administrator uses the command:

```
tmsh run /cm watch-devicegroup-device
```

and observes the following output:

```
devices <devgroup> device clu_id cl_orig cl_time last_sync
20:21 sync_test bigip_a 3273 bigip_a 14:27:00
20:21 sync_test bigip_b 1745 bigip_b 13:52:34 13:42:04
20:21 sync_test bigip_c 1745 bigip_a 13:52:34 13:42:04
```

What two conclusions can be made about this output? (Choose two answers)

- A. bigip_a has the latest configuration.
- B. The config from bigip_c was synced to the other devices in the device group during the most recent ConfigSync.
- C. Two of the devices in the device group have a configuration that is out of date.
- D. The correct configuration exists on bigip_a and bigip_c because their cluster times match.
- E. The correct configuration exists on bigip_b and bigip_c because their cluster times match.

Answer: A,C

Explanation:

watch-devicegroup-device shows (among other columns) the commit ID (cid.id / shown here as clu_id), the originating device for that commit (cid-orig / shown here as cl_orig), and the time the configuration change was made (cid.time / shown here as cl_time). The highest/newest commit ID and its time represent the most recent configuration change seen among the devices.

(clouddocs.f5.com)

* bigip_a has the latest configuration (A) because it shows commit ID 3273 at 14:27:00, which is newer than commit ID 1745 at 13:52:34 on bigip_b and bigip_c. (clouddocs.f5.com)

* Two devices are out of date (B) because bigip_b and bigip_c are still on the older commit ID 1745, so they do not match the latest commit shown on bigip_a. (clouddocs.f5.com) Why the other options are not supported by this output:

* C is not supported: bigip_c is not showing a newer commit than the others; it's on the older commit (1745), so it's not the source of the most recent change. The output's cid-orig column is what tells you where the change was made. (clouddocs.f5.com)

* D/E are incorrect logic: matching cid.time between two devices only indicates they share the same change timestamp/commit, not that it is the correct or latest configuration. The "latest" is indicated by the newest commit ID/time (here, bigip_a).

(clouddocs.f5.com)

NEW QUESTION # 49

A BIG-IP Administrator is setting up a new BIG-IP device. The network administrator reports that the interface has an incompatible media speed. The BIG-IP Administrator needs to change this setting manually.

From which location should the BIG-IP Administrator perform this task?14

- A. On the Front Console15
- B. In the TMOS Shell Command line16
- C. In the Configuration Utility, System > Configuration18
- **D. In the Configuration Utility, Network > Interface17**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration20 Control Plane Administration documents: Connectivity management involves ensuring that the physical layer matches the networking environment. Interface properties, including media speed, duplex settings, and MTU, are managed at the Control Plane level under the Network menu. To resolve a mismatch with an upstream switch, the administrator must navigate to Network > Interfaces to manually override auto-negotiation settings.

NEW QUESTION # 50

A BIG-IP Administrator makes a configuration change to the BIG-IP device. Which file logs the message regarding the configuration change?

- A. /var/log/secure
- B. /var/log/user.log
- C. /var/log/messages
- **D. /var/log/audit**

Answer: D

Explanation:

Audit logging is a specialized feature within TMOS designed to track administrative actions. According to F5 documentation, whenever a system object (like a virtual server, pool, or profile) is created, modified, or deleted, the system records the event. These logs are stored specifically in /var/log/audit. This is essential for control plane administration to track "who did what and when" regarding the device configuration.

NEW QUESTION # 51

A BIG-IP Administrator needs to find which modules have been licensed for use on the BIG-IP system. In which section of the Configuration Utility can the BIG-IP Administrator find this information?

- A. System > Platform
- B. System > Services

- C. System > Resource Provisioning
- D. System > Support

Answer: C

Explanation:

Identifying the current device status includes knowing which software modules (such as LTM, ASM, or APM) are active and how much hardware resource (CPU/Memory) is allocated to them. The System > Resource Provisioning screen displays the licensing status and allows the administrator to set the provisioning level (Nominal, Dedicated, or Minimum) for each module.

NEW QUESTION # 52

A BIG-IP Administrator receives an RMA replacement for a failed F5 device. The Administrator tries to restore a UCS taken from the previous device, but the restore fails. The following error appears in the /var/log

/ltnr
insufficient pool members. 01070608:3: License is not operational
(expired, digital signature does not match contents)

What should the BIG-IP Administrator do to avoid this error? (Choose one answer)

- A. Reactivate the license on the new device using the manual activation method
- B. Remove the license information from the UCS archive
- C. Use the appropriate tmsh command with the no-license option
- D. Revoke the license prior to restoring

Answer: C

Explanation:

When restoring a UCS file to replacement hardware (RMA device), the license from the original device is not valid on the new system. If the UCS restore attempts to load the old license, BIG-IP reports license errors such as "License is not operational", which can prevent traffic objects (including pools and virtual servers) from loading correctly.

To avoid this issue, F5 documentation recommends restoring the UCS without the license, using the following command:

`tmsh load /sys ucs <ucs filename> no-license`

This approach:

* Restores all configuration objects (LTM, networking, certificates, keys, etc.)

* Excludes the invalid license tied to the old hardware

* Allows the administrator to activate a new license separately on the replacement device

Why the other options are incorrect:
* A. Remove the license information from the UCS archive Not supported or recommended; UCS files should not be manually modified.

* B. Revoke the license prior to restoring License revocation does not prevent the UCS from attempting to load license data.

* D. Reactivate the license on the new device using the manual activation method This must be done after restoring the UCS and does not prevent the restore failure itself.

Therefore, the correct and supported method to avoid this error is C.

NEW QUESTION # 53

.....

The world is a stage. We must seize all opportunities for career progression and to actualize our dream. So, you must seize VCEngine to undersell yourself in the future. VCEngine F5 F5CAB4 study guide will help you to overcome difficulties and to get the certification. We will help you to understand the laws of F5CAB4 Exam. VCEngine provides original questions and pdf real questions and answers. If you get the certification, you will rise to undreamed-of heights.
