

Free PDF Marvelous Google Associate-Cloud-Engineer Detail Explanation

Official Google Cloud Certified Associate Cloud Engineer Study Guide

Public Cloud Providers offer services that fall into four broad categories:

- {...}
- Storage
- Networking
- Specialized services (such as Machine Learning Services)

Compute Resources

Public Cloud Providers offer services that fall into four broad categories:

- Compute Resources
- {...}
- Networking
- Specialized services (such as Machine Learning Services)

Storage

Public Cloud Providers offer services that fall into four broad categories:

- Compute Resources
- Storage
- {...}
- Specialized services (such as Machine Learning Services)

Networking

Public Cloud Providers offer services that fall into four broad categories:

- Compute Resources
- Storage
- Networking
- {...} (such as Machine Learning Services)

Specialized services

Public clouds offer a few types of storage services that are useful for a wide range of application requirements. These types include the following:

- {...}
- File storage
- Block storage
- Caches

Object storage

Public clouds offer a few types of storage services that are useful for a wide range of application requirements. These types include the following:

- Object storage
- {...}
- Block storage
- Caches

File storage

Public clouds offer a few types of storage services that are useful for a wide range of application requirements. These types include the following:

- Object storage

Our company is professional brand. There are a lot of experts and professors in the field in our company. All the experts in our company are devoting all of their time to design the best Associate-Cloud-Engineer test question for all people. In order to ensure quality of the products, a lot of experts keep themselves working day and night. We can make sure that you cannot find the more suitable Associate-Cloud-Engineer certification guide than our study materials, so hurry to choose the study materials from our company as your study tool, it will be very useful for you to prepare for the Associate-Cloud-Engineer exam.

Google Associate-Cloud-Engineer Exam Syllabus Topics:

Section	Weight	Objectives
Planning and configuring a cloud solution	25%	- Configuring compute resources - Configuring storage and database solutions
Setting up a cloud solution environment	20%	- Setting up cloud projects and accounts - Managing billing and identity access
Deploying and implementing a cloud solution	20%	- Deploying applications and services - Implementing networking components
Ensuring successful operation of a cloud solution	20%	- Managing cloud resources - Monitoring and logging
Configuring access and security	15%	- Securing data and services - Managing IAM roles and permissions

100% Pass Associate-Cloud-Engineer Google Associate Cloud Engineer Exam Marvelous Detail Explanation

The pass rate is 98.95% for the Associate-Cloud-Engineer exam torrent, and you can pass the exam if you choose us. The Associate-Cloud-Engineer exam dumps we recommend to you are the latest information we have, with that you can know the information of the exam center timely. Furthermore, with skilled professionals to revise the Associate-Cloud-Engineer Questions and answers, the quality is high. And we offer you free update for 365 days, therefore you can get update version timely, and the update version will be sent to your email address automatically.

Google Associate Cloud Engineer Exam Sample Questions (Q248-Q253):

NEW QUESTION # 248

You want to send and consume Cloud Pub/Sub messages from your App Engine application. The Cloud Pub/Sub API is currently disabled. You will use a service account to authenticate your application to the API.

You want to make sure your application can use Cloud Pub/Sub. What should you do?

- A. Use Deployment Manager to deploy your application. Rely on the automatic enablement of all APIs used by the application being deployed.
- B. Rely on the automatic enablement of the Cloud Pub/Sub API when the Service Account accesses it.
- **C. Enable the Cloud Pub/Sub API in the API Library on the GCP Console.**
- D. Grant the App Engine Default service account the role of Cloud Pub/Sub Admin. Have your application enable the API on the first connection to Cloud Pub/Sub.

Answer: C

Explanation:

Explanation

Quickstart: using the Google Cloud Console

This page shows you how to perform basic tasks in Pub/Sub using the Google Cloud Console.

Note: If you are new to Pub/Sub, we recommend that you start with the interactive tutorial.

Before you begin

Set up a Cloud Console project.

Set up a project

Click to:

Create or select a project.

Enable the Pub/Sub API for that project.

You can view and manage these resources at any time in the Cloud Console.

Install and initialize the Cloud SDK.

Note: You can run the gcloud tool in the Cloud Console without installing the Cloud SDK. To run the gcloud tool in the Cloud Console, use Cloud Shell.

<https://cloud.google.com/pubsub/docs/quickstart-console>

NEW QUESTION # 249

You need to assign a Cloud Identity and Access Management (Cloud IAM) role to an external auditor. The auditor needs to have permissions to review your Google Cloud Platform (GCP) Audit Logs and also to review your Data Access logs. What should you do?

- A. Assign the auditor's IAM user to a custom role that has logging.privateLogEntries.list permission. Direct the auditor to also review the logs for changes to Cloud IAM policy.
- B. Assign the auditor the IAM role roles/logging.privateLogViewer. Perform the export of logs to Cloud Storage.
- C. Assign the auditor's IAM user to a custom role that has logging.privateLogEntries.list permission. Perform the export of logs to Cloud Storage.
- **D. Assign the auditor the IAM role roles/logging.privateLogViewer. Direct the auditor to also review the logs for changes to Cloud IAM policy.**

Answer: D

Explanation:

Google Cloud provides Cloud Audit Logs, which is an integral part of Cloud Logging. It consists of two log streams for each project: Admin Activity and Data Access, which are generated by Google Cloud services to help you answer the question of who did what, where, and when? within your Google Cloud projects.

Ref: https://cloud.google.com/iam/docs/job-functions/auditing#scenario_external_auditors

NEW QUESTION # 250

You've been asked to add a new IAM member and grant them access to run some queries on BigQuery. Considering the principle of least privilege, which role should you assign?

- A. roles/bigquery.admin
- B. Project Editor
- C. roles/bigquery.dataViewer and roles/bigquery.jobUser
- D. roles/bigquery.dataOwner

Answer: B,C

NEW QUESTION # 251

You have a Compute Engine instance hosting an application used between 9 AM and 6 PM on weekdays. You want to back up this instance daily for disaster recovery purposes. You want to keep the backups for 30 days.

You want the Google-recommended solution with the least management overhead and the least number of services. What should you do?

- A. 1. In the Cloud Console, go to the Compute Engine Disks page and select your instance's disk.
2. In the Snapshot Schedule section, select Create Schedule and configure the following parameters:
-Schedule frequency: Daily
-Start time: 1:00 AM - 2:00 AM
-Autodelete snapshots after 30 days
- B. 1. Update your instances' metadata to add the following value: snapshot-schedule: 0 1 * * *
- C. 1. Create a Cloud Function that creates a snapshot of your instance's disk.
2. Create a Cloud Function that deletes snapshots that are older than 30 days.
3. Use Cloud Scheduler to trigger both Cloud Functions daily at 1:00 AM.
- D. 1. Create a bash script in the instance that copies the content of the disk to Cloud Storage.
2. Create a bash script in the instance that deletes data older than 30 days in the backup Cloud Storage bucket.
3. Configure the instance's crontab to execute these scripts daily at 1:00 AM.

Answer: A

Explanation:

Explanation

Creating scheduled snapshots for persistent disk This document describes how to create a snapshot schedule to regularly and automatically back up your zonal and regional persistent disks. Use snapshot schedules as a best practice to back up your Compute Engine workloads. After creating a snapshot schedule, you can apply it to one or more persistent disks.

<https://cloud.google.com/compute/docs/disks/scheduled-snapshots>

NEW QUESTION # 252

Your company has a 3-tier solution running on Compute Engine. The configuration of the current infrastructure is shown below.

VPC

Subnet Tier#1 10.0.1.0/24

Instance Tier 1
Compute Engine

Subnet Tier#2 10.0.2.0/24

Instance Tier 2
Compute Engine

Subnet Tier#3 10.0.3.0/24

Instance Tier 3
Compute Engine

Each tier has a service account that is associated with all instances within it. You need to enable communication on TCP port 8080 between tiers as follows:

* Instances in tier #1 must communicate with tier #2.

* Instances in tier #2 must communicate with tier #3.

What should you do?

- A. 1. Create an egress firewall rule with the following settings:* Targets: all instances* Source filter: IP ranges (with the range set to 10.0.2.0/24)* Protocols: allow TCP: 8080. Create an egress firewall rule with the following settings:* Targets: all instances* Source filter: IP ranges (with the range set to 10.0.1.0/24)* Protocols: allow TCP: 8080
- B. 1. Create an ingress firewall rule with the following settings:* Targets: all instances with tier #2 service account* Source filter: all instances with tier #1 service account* Protocols: allow all. 2. Create an ingress firewall rule with the following settings:* Targets: all instances with tier #3 service account* Source filter: all instances with tier #2 service account* Protocols: allow all

- C. 1. Create an ingress firewall rule with the following settings:* Targets: all instances* Source filter: IP ranges (with the range set to 10.0.2.0/24)* Protocols: allow all 2. Create an ingress firewall rule with the following settings:* Targets: all instances* Source filter: IP ranges (with the range set to 10.0.1.0/24)* Protocols: allow all
- D. 1. Create an ingress firewall rule with the following settings:* Targets: all instances with tier #2 service account* Source filter: all instances with tier #1 service account* Protocols: allow TCP:8080 2. Create an ingress firewall rule with the following settings:* Targets: all instances with tier #3 service account* Source filter: all instances with tier #2 service account* Protocols: allow TCP: 8080

Answer: D

Explanation:

1. Create an ingress firewall rule with the following settings: "Targets: all instances with tier #2 service account " Source filter: all instances with tier #1 service account " Protocols: allow TCP:8080 2. Create an ingress firewall rule with the following settings: "Targets: all instances with tier #3 service account " Source filter: all instances with tier #2 service account " Protocols: allow TCP: 8080

NEW QUESTION # 253

.....

We are always on the way to be better for we can't be satisfied to be the best on the Associate-Cloud-Engineer exam questions. We are trying to apply the most latest technologies to the compiling and designing on the Associate-Cloud-Engineer learning guide. With these innovative content and displays, our company is justified in claiming for offering unique and unmatched Associate-Cloud-Engineer Study Material to certifications candidates. And you won't regret for your choice if you buy our Associate-Cloud-Engineer practice engine.
