ECCouncil 312-85 Certified Threat Intelligence Analyst 1

**HOT Simulations 312-85 Pdf - High Pass-Rate  
ECCouncil Actual 312-85 Test: Certified Threat  
Intelligence Analyst**

Our 312-85 study materials are simplified and compiled by many experts over many years according to the examination outline of the calendar year and industry trends. So our 312-85 learning materials are easy to be understood and grasped. There are also many people in life who want to change their industry. They often take the professional qualification exam as a stepping stone to enter an industry. If you are one of these people, [312-85 Exam Engine](#) will be your best choice.

To become certified, candidates must pass the 312-85 exam, which consists of 100 multiple-choice questions and has a time limit of three hours. 312-85 exam is challenging, and candidates are advised to have a solid understanding of the exam objectives and to prepare thoroughly using study materials and practice exams. Overall, the 312-85 certification is an excellent way for cybersecurity professionals to demonstrate their expertise in threat intelligence analysis and advance their career.

**UPDATED ECCouncil 312-85 PDF QUESTIONS [2023]-  
QUICK TIPS TO PASS**

Based on the credibility in this industry, our 312-85 study braindumps have occupied a relatively larger market share and stable sources of customers. Such a startling figure -99% pass rate is not common in this field, but we have made it with our endless efforts. As this new frontier of personalizing the online experience advances, our 312-85 exam guide is equipped with comprehensive after-sale online services. It's a convenient way to contact our staff, for we have customer service people 24 hours online to deal with your difficulties. If you have any question or request for further assistance about the [312-85](#) study braindumps, you can leave us a message on the web page or email us.

## 312-85日本語復習赤本、312-85対応問題集

Japancertの312-85問題集はあなたが信じられないほどの的中率を持っています。この問題集は実際試験に出る可能性があるすべての問題を含んでいます。したがって、この問題集をまじめに勉強する限り、試験に合格する

ことが朝飯前のことになることができます。ECCouncil試験の重要な一環として、312-85認定試験はあなたに大きな恩恵を与えることができます。ですから、あなたを楽に試験に合格させる機会を逃してはいけません。Japancertは試験に失敗した場合は全額返金を約束しますから、312-85試験に合格することができるように、はやくJapancertのウェブサイトに行ってもっと詳細な情報を読んでください。

## ECCouncil Certified Threat Intelligence Analyst 認定 312-85 試験問題 (Q33-Q38):

### 質問 # 33

Moses, a threat intelligence analyst at InfoTec Inc., wants to find crucial information about the potential threats the organization is facing by using advanced Google search operators. He wants to identify whether any fake websites are hosted at the similar to the organization's URL.

Which of the following Google search queries should Moses use?

- A. related: www.infothech.org
- B. link: www.infothech.org
- C. cache: www.infothech.org
- D. info: www.infothech.org

正解: A

### 質問 # 34

Tim is working as an analyst in an ABC organization. His organization had been facing many challenges in converting the raw threat intelligence data into meaningful contextual information. After inspection, he found that it was due to noise obtained from misrepresentation of data from huge data collections. Hence, it is important to clean the data before performing data analysis using techniques such as data reduction. He needs to choose an appropriate threat intelligence framework that automatically performs data collection, filtering, and analysis for his organization.

Which of the following threat intelligence frameworks should he choose to perform such task?

- A. Threat grid
- B. SIGVERIF
- C. HighCharts
- D. TC complete

正解: A

解説:

Threat Grid is a threat intelligence and analysis platform that offers advanced capabilities for automatic data collection, filtering, and analysis. It is designed to help organizations convert raw threat data into meaningful, actionable intelligence. By employing advanced analytics and machine learning, Threat Grid can reduce noise from large data sets, helping to eliminate misrepresentations and enhance the quality of the threat intelligence.

This makes it an ideal choice for Tim, who is looking to address the challenges of converting raw data into contextual information and managing the noise from massive data collections.

### 質問 # 35

H&P, Inc. is a small-scale organization that has decided to outsource the network security monitoring due to lack of resources in the organization. They are looking for the options where they can directly incorporate threat intelligence into their existing network defense solutions.

Which of the following is the most cost-effective methods the organization can employ?

- A. Look for an individual within the organization
- B. Recruit data management solution provider
- C. Recruit the right talent
- D. Recruit managed security service providers (MSSP)

**正解: D**

解説:

For H&P, Inc., a small-scale organization looking to outsource network security monitoring and incorporate threat intelligence into their network defenses cost-effectively, recruiting a Managed Security Service Provider (MSSP) would be the most suitable option. MSSPs offer a range of services including network security monitoring, threat intelligence, incident response, and compliance management, often at a lower cost than maintaining an in-house security team. This allows organizations to benefit from expert services and advanced security technologies without the need for significant resource investment.

### 質問 # 36

Steve is working as an analyst for Highlanders & Co. While performing data analysis, he used a method in which he included a list of all activities required to complete the project, time, dependencies, and logical endpoints such as milestones to acquire information about the relationship between various activities and the period of the activities obtained.

Which of the following data analysis methods was used by Steve?

- A. Timeline analysis
- B. Analogy analysis
- **C. Critical path analysis**
- D. Cone of plausibility

**正解: C**

解説:

The method described involves analyzing activities, timeframes, dependencies, and milestones to understand project flow and relationships. This is known as Critical Path Analysis (CPA).

Critical Path Analysis helps identify the sequence of crucial tasks that determine the overall project duration.

In the context of threat intelligence, it assists analysts in mapping adversary activities or operational timelines to determine key steps and dependencies in attack campaigns.

Why the Other Options Are Incorrect:

\* B. Timeline analysis: Focuses on chronological sequencing of events, not dependency or duration analysis.

\* C. Cone of plausibility: Used for scenario modeling and forecasting possible outcomes.

\* D. Analogy analysis: Compares new situations to historical cases, not time-dependent task mapping.

Conclusion:

Steve applied Critical Path Analysis to determine activity dependencies and durations.

Final Answer: A. Critical path analysis

Explanation Reference (Based on CTIA Study Concepts):

CTIA defines CPA as a structured approach for mapping and analyzing sequences of dependent activities or events.

### 質問 # 37

In which of the following attacks does the attacker exploit vulnerabilities in a computer application before the software developer can release a patch for them?

- A. Advanced persistent attack
- **B. Zero-day attack**
- C. Distributed network attack
- D. Active online attack

**正解: B**

解説:

A zero-day attack exploits vulnerabilities in software or hardware that are unknown to the vendor or for which a patch has not yet been released. These attacks are particularly dangerous because they take advantage of the window of time between the vulnerability's discovery and the availability of a fix, leaving systems exposed to potential exploitation. Zero-day attacks require a proactive and comprehensive approach to security, including the use of advanced threat detection systems and threat intelligence to identify and mitigate potential threats before they can be exploited.
