For a long time, high quality is our IDP exam questions constantly attract students to participate in the use of important factors, only the guarantee of high quality, to provide students with a better teaching method, and at the same time the IDP practice quiz brings more outstanding teaching effect. Our high-quality IDP learning guide help the students know how to choose suitable for their own learning method, our IDP study materials are a very good option.

Every working person knows that IDP is a dominant figure in the field and also helpful for their career. If IDP reliable exam bootcamp helps you pass IDP exams and get a qualification certificate you will obtain a better career even a better life. Our IDP Study Guide materials cover most of latest real IDP test questions and answers. If you are certainly determined to make something different in the field, a useful certification will be a stepping-stone for your career.

>> Braindumps IDP Torrent <<

IDP Latest Test Discount, IDP Real Exams

If you want to pass exam and get the related certification in the shortest time, the IDP IDP study materials from our company will be your best choice. Although there are a lot of same study materials in the market, we still can confidently tell you that our IDP Study Materials are most excellent in all aspects. With our experts and professors' hard work and persistent efforts, the IDP study materials from our company have won the customers' strong support in the past years.

CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q49-Q54):

NEW QUESTION # 49
How should an organization address the domain risk score found in the Domain Security Overview page?

- A. Prioritizing the risks by severity, addressing the Medium (Yellow) risks first
- B. Prioritizing the risks by severity, addressing the Low (Green) risks first
- C. Address the risks on the list from top to bottom as risks are presented in a descending order
- D. Prioritizing the detections by severity, addressing the High (Red) detections first

Answer: C

Explanation:
The Domain Security Overview page in Falcon Identity Protection presents domain risks in a prioritized, descending order, based on a

combination of severity, likelihood, and consequence. The CCIS curriculum emphasizes that organizations should address risks from top to bottom, as the list is already optimized to reflect the most impactful identity risks first.

This ordering allows security teams to focus remediation efforts where they will produce the greatest reduction in overall domain risk score. Addressing risks sequentially ensures alignment with Falcon's risk modeling and avoids misprioritization that could occur if teams focus only on color-based severity or individual detections.

The incorrect options reflect common misconceptions:

* Medium risks should not be prioritized over higher-impact risks.
* Detections are different from risks and should not be addressed independently of risk context.
* Low risks are intentionally deprioritized by the platform.

By following the descending order provided in the Domain Security Overview, organizations align remediation with Falcon'sZero Trust-driven identity risk scoring methodology, makingOption Athe correct answer.

NEW QUESTION # 50

What setting can be switched under the Domain Security Overview for each Active Directory domain and/or Azure tenant?

- A. Domains
- B. Goal
- C. Privileged Identities
- D. Scope

Answer: D

Explanation:

In the Domain Security Overview,Scopeis a configurable setting that allows administrators toswitch between Active Directory domains and Azure tenants. This capability is essential for organizations managing multiple identity environments, as it enables targeted risk assessment and comparison across different identity infrastructures.

The CCIS documentation explains that Scope determineswhich domain or tenant's identity data is displayedin the Overview dashboard, including risk scores, trends, and prioritized remediation guidance.

Changing the scope does not alter risk calculations; it simply refocuses the analysis on the selected identity environment.

Other options are incorrect because:

* Privileged Identities represent a subset of users, not a switchable setting.
* Domains are entities, not a dashboard control.
* Goal changes how risks are evaluated, not which environment is displayed.

By allowing granular control over which domain or tenant is analyzed, Scope supports accurate identity risk management in complex, hybrid environments. Therefore,Option Dis the correct answer.

NEW QUESTION # 51

What is the purpose behind creating Policy Rules?

- A. Policy Rules determine the scope in which the sensor collects information on the environment
- B. Policy Rules determine what actions to take in response to certain triggers/conditions observed within the environment
- C. Policy Rules determine what actions an admin in the console can take before making adjustments
- D. Policy Rules determine how the console tracks and learns behavior for users in the environment

Answer: B

Explanation:

Policy Rules in Falcon Identity Protection are designed to automate enforcement and response actions based on identity-related conditions observed in the environment. According to the CCIS curriculum, Policy Rules evaluate identity signals such as authentication behavior, risk levels, privilege status, and detection outcomes, then execute predefined actions when specific criteria are met.

These actions may include blocking authentication, enforcing MFA, generating alerts, or triggering Falcon Fusion workflows. This design supports Falcon's Zero Trust and continuous validation model, where trust decisions are dynamically enforced rather than statically assigned. Policy Rules therefore act as the operational bridge between identity analytics and enforcement.

The incorrect options confuse Policy Rules with other platform components. Administrative permissions are governed by RBAC, sensor data collection scope is controlled through configuration settings, and behavioral learning is handled by Falcon's analytics engine-not Policy Rules.

The CCIS documentation explicitly defines Policy Rules as logic-based enforcement mechanisms, making Option A the correct and verified answer.

NEW QUESTION # 52
How does Identity Protection extend the capabilities of existing multi-factor authentication (MFA)?

- A. Identity Protection does not support on-premises MFA connectors
- B. Identity Protection will replace third-party MFA and trigger as it detects risky or abnormal behaviors
- C. Identity Protection is not going to detect risky user behavior
- D. Implementation of a second-layer security control using policy rules as it detects risky or abnormal behaviors

Answer: D

Explanation:
Falcon Identity Protection is designed to extend-not replace-existing MFA solutions. According to the CCIS curriculum, Identity Protection enhances MFA by adding a risk-driven, policy-based enforcement layer that dynamically triggers MFA challenges when risky or abnormal identity behavior is detected.
Rather than applying MFA uniformly, Falcon evaluates authentication context such as behavioral deviation, privilege usage, and anomaly detection. When risk thresholds are exceeded, Policy Rules can enforce MFA through integrated connectors, providing adaptive, Zero Trust-aligned authentication.
The incorrect options misunderstand Falcon's role. Identity Protection does detect risky behavior, does not replace MFA providers, and fully supports both cloud and on-premises MFA connectors.
Because Falcon adds intelligence-driven enforcement on top of MFA, Option A is the correct and verified answer.

NEW QUESTION # 53
What is the recommended action for the "Guest Account Enabled" risk?

- A. Apply a policy rule with an "Access" trigger and "Block" action on the Guest account
- B. Disable the endpoint in Active Directory
- C. Add related endpoints to a watchlist
- D. Disable Guest accounts on all endpoints

Answer: D

Explanation:
In Falcon Identity Protection, the "Guest Account Enabled" risk highlights the presence of local or domain guest accounts that remain active across endpoints. Guest accounts are inherently high-risk because they typically lack strong authentication controls, are rarely monitored, and are frequently abused by attackers for lateral movement and persistence.
The CCIS curriculum explicitly recommends disabling Guest accounts on all endpoints as the primary remediation action. This is because guest accounts often bypass standard identity governance processes and violate the principles of least privilege and Zero Trust, both of which are foundational to Falcon Identity Protection's security model. Disabling these accounts removes an unnecessary and dangerous authentication path from the environment.
Other options are incorrect because:
* Adding endpoints to a watchlist does not remediate the risk.
* Blocking access via a policy rule is less effective than eliminating the account entirely.
* Disabling endpoints in Active Directory does not directly address the guest account exposure.
Falcon Identity Protection prioritize selimination of weak identity configurations, and disabling guest accounts is a direct, effective action that immediately lowers identity risk scores and reduces attack surface.
Therefore, Option C is the correct and verified answer.

NEW QUESTION # 54
......

Pass4sures addresses this issue by offering real CrowdStrike IDP Questions. Pass4sures's team of professionals worked tirelessly to create the IDP questions, ensuring that applicants have access to the most recent and genuine IDP Exam Questions. With Pass4sures's help, you can pass the IDP exam on your first attempt or claim a refund according to certain terms and conditions.

IDP Latest Test Discount: https://www.pass4sures.top/CrowdStrike-CCIS/IDP-testking-braindumps.html

CrowdStrike Braindumps IDP Torrent It is a simulation of formal test and you can feel the atmosphere of real test, CrowdStrike Braindumps IDP Torrent We are legal authorized company which has good reputation because of our high-quality and high passing

rate, CrowdStrike Braindumps IDP Torrent This is a special IT exam dumps for all candidates, In Pass4sures IDP Latest Test Discount, you will find the best exam preparation material.

not true, I'm afraid, When I talk to new clients in the UK, they IDP think that I'm just down the road a bit, It is a simulation of formal test and you can feel the atmosphere of real test.

We are legal authorized company which has good reputation because of our high-quality Braindumps IDP Torrent and high passing rate, This is a special IT exam dumps for all candidates, In Pass4sures, you will find the best exam preparation material.
