NCCER Module 46101 Fundamentals of Crew Leadership Sample Questions (Q22-Q27):

NEW QUESTION # 22

What type of written or visual communication is NOT appropriate on the work site?

- A. a clear, simple sketch
- **B. acronyms and textspeak in a written message**
- C. legible handwriting
- D. a hand-drawn map for presenting directions

Answer: B

Explanation:

Effective communication on a work site needs to be clear and unambiguous for all workers. Therefore, acronyms and textspeak in a written message (D) are generally not appropriate as they can be easily misunderstood or not understood by all individuals, potentially leading to errors or safety issues. Legible handwriting (A), clear sketches (B), and simple hand-drawn maps (C) can be effective communication tools.

(Fundamentals of Crew Leadership, Fourth Edition, NCCER, Section 6.1.3 Choosing Appropriate Communication Methods)

NEW QUESTION # 23

What is the control method that a crew leader uses to plan a few weeks in advance?

- A. daily diary
- **B. look-ahead schedule**
- C. network schedule
- D. bar chart schedule

Answer: B

Explanation:

A look-ahead schedule (D) is a short-term planning tool, typically covering a few weeks, that crew leaders use to detail upcoming tasks, resource needs, and potential issues. The daily diary (A) records daily activities, the network schedule (B) is a comprehensive project schedule showing dependencies, and the bar chart schedule (C) provides a visual representation of the project timeline.

(Fundamentals of Crew Leadership, Fourth Edition, NCCER, Section 4.2.3 Scheduling Tools)

NEW QUESTION # 24

Who does the crew leader typically report directly to on a construction site?

- A. owner
- B. architect
- C. safety manager
- **D. superintendent**

Answer: D

Explanation:

The crew leader, as a first-line supervisor, is directly responsible for the activities of the work crew and typically reports to the superintendent or general foreman on the construction site. This individual oversees multiple crews and is responsible for the overall progress and coordination of the work. (Fundamentals of Crew Leadership, Fourth Edition, NCCER, Section 1.2.1 Reporting Structure)

NEW QUESTION # 25

Prohibitions on the abuse of drugs apply

- A. only to illegal and prescription drugs, but no other substances.
- **B. to any inappropriate use of drugs or other substances that cause impairment.**
- C. only to using someone else's prescription or overmedicating with prescription drugs.
- D. only to illegal drugs, such as cocaine, crystal meth, and many others like them.

Answer: B

Explanation:

Workplace drug and alcohol policies typically prohibit any inappropriate use of drugs or other substances that cause impairment (B), which can include illegal drugs, prescription drugs taken other than as prescribed, over-the-counter medications, alcohol, and even inhalants if they lead to impairment on the job. The prohibition is not limited to illegal and prescription drugs alone (A), only illegal drugs (C), or only misuse of prescription drugs (D), as impairment from any substance can create safety hazards. (Fundamentals of Crew Leadership, Fourth Edition, NCCER, Section 3.4.1 Understanding Substance Abuse in the Workplace)

NEW QUESTION # 26

A crew of electricians is needed to run 1,000 feet of conduit, and the estimator determined that two electricians could complete the job in an eight-hour day. What is the required productivity rate per person for the conduit install?

- A. 130 feet per hour
- B. 31.25 feet per hour
- **C. 62.5 feet per hour**
- D. 150 feet per hour

Answer: C

Explanation:

Productivity rate is calculated by dividing the total output by the total input (in this case, labor hours).

Total labor hours = 2 electricians * 8 hours/day = 16 labor hours

Productivity rate = Total conduit / Total labor hours = 1000 feet / 16 hours = 62.5 feet per hour per person.

(Fundamentals of Crew Leadership, Fourth Edition, NCCER, Section 4.4.1 Understanding Productivity Rates)

NEW QUESTION # 27

.....
