NEW QUESTION # 168

What are two benefits of using Cisco Duo as an MFA solution? (Choose two.)

- A. allows for centralized management of endpoint device applications and configurations
- B. grants administrators a way to remotely wipe a lost or stolen device
- **C. native integration that helps secure applications across multiple cloud platforms or on-premises environments**
- D. encrypts data that is stored on endpoints
- **E. provides simple and streamlined login experience for multiple applications and users**

Answer: C,E

Explanation:

Cisco Duo is a multi-factor authentication (MFA) solution that verifies the identity of all users with Duo's easy, one-tap-approval MFA app. It also provides device visibility and adaptive policies to ensure that only trusted devices can access corporate applications and networks. Some of the benefits of using Cisco Duo as an MFA solution are:

* It provides a simple and streamlined login experience for multiple applications and users. Users can access all their applications from a single dashboard, and authenticate with a simple push notification or other convenient methods. Duo also supports single sign-on (SSO) for integrated applications, reducing the need for multiple passwords and logins¹².

* It offers native integration that helps secure applications across multiple cloud platforms or on-premises environments. Duo can be easily integrated with most major apps and custom applications, enabling a secure access solution that can be implemented with minimal IT involvement. Duo also supports various protocols and standards, such as SAML, RADIUS, LDAP, and WebAuthn, to enable seamless integration with different environments¹³.
