It is known that our SC-401 valid study guide materials have dominated the leading position in the global market with the decades of painstaking efforts of our experts and professors. There are many special functions about SC-401 study materials to help a lot of people to reduce the heavy burdens when they are preparing for the SC-401 Exams for the SC-401 study practice question from our company can help all customers to make full use of their sporadic time. Must buy our SC-401 exam questions, you will be able to pass the SC-401 exam easily.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.

Topic 2	<ul style="list-style-type: none"> • Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 3	<ul style="list-style-type: none"> • Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 4	<ul style="list-style-type: none"> • Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

Latest updated SC-401 Exam Quiz & Excellent Pass SC-401 Test Guide Ensure You a High Passing Rate

Just the same as the free demo, we have provided three kinds of versions of our SC-401 preparation exam, among which the PDF version is the most popular one. It is understandable that many people give their priority to use paper-based SC-401 Materials rather than learning on computers, and it is quite clear that the PDF version is convenient for our customers to read and print the contents in our SC-401 study guide.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q216-Q221):

NEW QUESTION # 216

You have a Microsoft 365 E5 subscription. The subscription contains a user named User1 and the sensitivity labels shown in the following table.

Name	Authenticated users: View content(VIEW)	Authenticated users: Copy and extract content(EXTRACT)	Authenticated users: Export content(EXPORT)
Label1	Granted	Not granted	Not granted
Label2	Granted	Granted	Not granted
Label3	Granted	Not granted	Granted

You publish the labels to User1.

The subscription contains the files shown in the following table.

Name	Label
File1	Label1
File2	Label2
File3	Label3

Which files can Microsoft 365 Copilot summarize for User1?

- A. File2only
- B. File1, File2, and File3
- C. File2 and File3 only
- D. File3 only

Answer: A

NEW QUESTION # 217

Hotspot Question

You have a Microsoft SharePoint Online site that contains the following files.

Name	Modified by	Data loss prevention (DLP) status
File1.docx	Manager1	None
File2.docx	Manager1	Matched by DLP
File3.docx	Manager1	Blocked by DLP

Users are assigned roles for the site as shown in the following table.

Name	Role
User1	Site owner
User2	Site member

Which files can User1 and User2 open? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

User1:

- File1.docx only
- File1.docx and File2.docx only
- File1.docx, File2.docx, and File3.docx

User2:

- File1.docx only
- File1.docx and File2.docx only
- File1.docx, File2.docx, and File3.docx

Answer:

Explanation:

Answer Area

User1:

- File1.docx only
- File1.docx and File2.docx only
- File1.docx, File2.docx, and File3.docx

User2:

- File1.docx only
- File1.docx and File2.docx only
- File1.docx, File2.docx, and File3.docx

Explanation:

User1: User1 is a Site Owner, meaning they have full control over all files in the site. Even though File3.docx is blocked by DLP, a Site Owner can override or manage DLP restrictions and still access all files.

User2: User2 is a Site Member, meaning they have standard permissions to view and edit files unless blocked. File1.docx has no DLP action, so User2 can access it. File2.docx is matched by DLP, but it is not blocked, so User2 can still access it. File3.docx is

blocked by DLP, which means User2 cannot access it.

NEW QUESTION # 218

You need to meet the technical requirements for the Site1 documents.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create a sensitivity label.	
Wait 24 hours and then turn on the policy.	
Create a sensitive info type.	
Create a retention label.	
Create an auto-labeling policy.	

Answer:

Explanation:

Actions	Answer Area
Create a sensitivity label.	Create a sensitive info type.
Wait 24 hours and then turn on the policy.	Create a retention label.
Create a sensitive info type.	Create an auto-labeling policy.
Create a retention label.	
Create an auto-labeling policy.	

Explanation:

Actions	Answer Area
	Create a sensitive info type.
Wait 24 hours and then turn on the policy.	Create a sensitivity label.
	Create an auto-labeling policy.
Create a retention label.	

The goal is to automatically label documents in Site1 that contain credit card numbers. To achieve this, we need a sensitivity label with an auto-labeling policy based on a sensitive info type that detects credit card numbers.

Step 1: Create a Sensitive Info Type

A sensitive info type is needed to detect credit card numbers in documents.

Microsoft Purview includes built-in sensitive info types for credit card numbers, but we can also create a custom one if necessary.

Step 2: Create a Sensitivity Label

A sensitivity label is required to classify and protect documents containing sensitive information.

This label can apply encryption, watermarking, or access controls to credit card data.

Step 3: Create an Auto-Labeling Policy

An auto-labeling policy ensures that the sensitivity label is applied automatically when credit card numbers are detected in Site1.
This policy is configured to scan files and automatically apply the correct sensitivity label.

NEW QUESTION # 219

HOTSPOT

You have a Microsoft 365 E5 subscription.

You need to implement a compliance solution that meets the following requirements:

Captures clips of key security-related user activities, such as the exfiltration of sensitive company data.

Integrates data loss prevention (DLP) capabilities with insider risk management.

What should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

 Microsoft

Captures clips of key security-related user activities:

- Adaptive scopes
- Classifiers
- Forensic evidence
- Search

Integrates DLP capabilities with insider risk management:

- Adaptive Protection
- eDiscovery (Premium)
- Records management
- Trainable classifiers

Answer:

Explanation:

Answer Area

Captures clips of key security-related user activities:

- Adaptive scopes
- Classifiers
- Forensic evidence
- Search

Integrates DLP capabilities with insider risk management:

- Adaptive Protection
- eDiscovery (Premium)
- Records management
- Trainable classifiers

Explanation:

Answer Area

Captures clips of key security-related user activities:

Integrates DLP capabilities with insider risk management:

Captures clips of key security-related user activities

This requirement refers to recording and surfacing evidence of risky user behavior (e.g., copying sensitive files to USB, uploading to cloud storage, or exfiltrating data).

In Microsoft Purview Insider Risk Management, this is achieved through Forensic evidence, which allows capturing screenshots/clips of user activities on endpoints when a policy is triggered.

Ref: Microsoft Learn - Insider risk forensic evidence

Integrates DLP capabilities with insider risk management

Microsoft introduced Adaptive Protection as part of Purview Insider Risk.

Adaptive Protection uses insider risk signals and DLP together, dynamically adjusting DLP controls (block, restrict, monitor) based on the user's risk level.

This integration reduces false positives and ensures risky users are monitored more strictly while low-risk users are less impacted.

Ref: Microsoft Learn - Adaptive Protection in Microsoft Purview

Other options ruled out:

Adaptive scopes: Used for defining policy targeting groups dynamically, not capturing activities.

Classifiers/Trainable classifiers: Used for content classification, not exfiltration capture or DLP integration.

eDiscovery (Premium): For legal investigations, not insider risk + DLP integration.

Records management: Lifecycle retention, not related to insider risk.

NEW QUESTION # 220

At the end of a project, you upload project documents to a Microsoft SharePoint Online library that contains many files. The following is a sample of the project document file names:

- aei_AA989.docx
- bci_WS098.docx
- cei_DF112.docx
- ebc_QQ454.docx
- ecc_BB565.docx

All documents that use this naming format must be labeled as Project Documents:

You need to create an auto-apply retention label policy.

What should you use to identify the files?

- A. A retention label
- **B. A sensitive info type**
- C. A trainable classifier

Answer: B

NEW QUESTION # 221

.....

Purchasing our SC-401 training test is not complicated, there are mainly four steps: first, you can choose corresponding version according to the needs you like. Next, you need to fill in the correct email address. And if the user changes the email during the subsequent release, you need to update the email. Then, the user needs to enter the payment page of the SC-401 Learning Materials to buy it. Finally, within ten minutes of payment, the system automatically sends the SC-401 study materials to the user's email address. And then you can quickly study and pass the SC-401 exam.
