Our customer service is available all day, and your problems can be solved efficiently at any time. Last but not least, we can guarantee the security of the purchase process of C_ACDET_2506 Test Questions and the absolute confidentiality of customer information. You do not have to worry about these issues, because we know that this is a basic condition for us to establish a good business model. If you have any questions, you can always contact us online or email us. We will reply as soon as possible.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

SAP C_ACDET_2506 Boot Camp, Exam C_ACDET_2506 Papers

We are doing our utmost to provide services with high speed and efficiency to save your valuable time for the majority of candidates. The SAP C_ACDET_2506 materials of DumpExam offer a lot of information for your exam guide, including the questions and answers. DumpExam is best website that providing SAP C_ACDET_2506 Exam Training materials with high quality on the Internet. With the learning information and guidance of DumpExam, you can through SAP C_ACDET_2506 exam the first time.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q16-Q21):

NEW QUESTION # 16

The full SAP Ariba Strategic Sourcing suite baseline (Greenfield baseline scenario) has been applied to the customer Test site. The customer and project team will configure SAP Ariba Sourcing and deploy that to the Production site, then configure and deploy the remaining solutions in stages. What does this mean for subsequent migration activities?

- A. Both SAP Ariba Sourcing as well as subsequent migration activities would be Brownfield deployments.
- B. If the baseline applied the full suite, the full suite must be configured and migrated to production at the same time.
- C. Subsequent migration activities will require a complete reconfiguration of existing solutions.
- D. Subsequent migration activities follow Bluefield deployment scenario.

Answer: A

NEW QUESTION # 17

What system is provided by SAP free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP Cloud Project Studio
- B. SAP for Me
- C. SAP Cloud Application Lifecycle Management
- D. SAP Ariba Enablement Workbook

Answer: D

Explanation:

The SAP Ariba Enablement Workbook is an Excel-based project management tool provided free by SAP to assist customers and implementation partners in deploying SAP Ariba solutions. It contains detailed task lists, timelines, and activities aligned to the SAP Activate methodology and is designed to guide project teams through deployment steps such as data collection, configuration, and testing. Other options like SAP for Me are customer portals, not deployment tools, and SAP Cloud Application Lifecycle Management is a broader lifecycle tool not focused specifically on Ariba deployments.

NEW QUESTION # 18

When preparing to load legacy contracts during a Bluefield deployment in SAP Ariba Contracts, which of the following actions are required to ensure a successful migration?

- A. Use the exact same process and tools as used in the Greenfield migration scenario to upload legacy contracts.

- B. Manually enter legacy contract data into SAP Ariba Contracts using the application's UI instead of using import tools.
- C. Create a new customized contract upload process specifically for Bluefield deployments to accommodate differences in site structure.
- D. Skip the legacy contract upload step if the Production site already contains migrated Flex Master Data Templates.

Answer: A

NEW QUESTION # 19

When you have created a new custom field and marked it as reportable, saved and published your changes, but the field does not show up in reports. How can you resolve the issue?

- A. Run the "Retrieve flexible fields metadata for reporting" task under Reporting Manager.
- B. Wait 2 hours for the schema to refresh automatically.
- C. You did not assign the custom field to the appropriate report category.
- D. Custom fields must be created in the same module where reports are generated.

Answer: A

Explanation:

After publishing a custom reportable field, the "Retrieve flexible fields metadata for reporting" task must be run to update the reporting schema with the new field metadata. Without this manual step, the reports do not recognize the new field despite it being published. The system does not perform automatic timed refreshes of the schema. Module location or report category assignment is not a prerequisite for report visibility in SAP Ariba's analytics.

NEW QUESTION # 20

During which SAP Activate Methodology phase do you migrate the configuration to Production?

- A. Push
- B. Move
- C. Migrate
- D. Deploy

Answer: D

NEW QUESTION # 21

.....

If you buy our C_ACDET_2506 exam questions, we will offer you high quality products and perfect after service just as in the past. We believe our consummate after-sale service system will make our customers feel the most satisfactory. Our company has designed the perfect after sale service system for these people who buy our C_ACDET_2506 practice materials.
