These features are inclusively designed to ace the SAP C_C4H56_2411 exam preparation.

SAP Certified Associate - Implementation Consultant - SAP Service Cloud Version 2 Sample Questions (Q79-Q84):

NEW QUESTION # 79

Service agents working on a specific case type in SAP Service Cloud Version 2 need to access and perform defined actions in an external solution. What steps must an administrator perform to make this possible? Note: There are 3 correct answers to this question.

- **A. Create a mashup to embed the web page of the external solution.**
- B. Define a custom screen for the mashup.
- C. Develop a custom business object.
- **D. Use the web page URL of the external solution for extracting input parameters in the mashup.**
- **E. Include a dedicated step pointing to the mashup in one of the phases of the case type.**

Answer: A,D,E

Explanation:

To enable service agents to access and perform actions in an external solution for a specific case type, administrators must create a mashup to embed the web page of the external solution to integrate it into the Agent Desktop. They should use the web page URL of the external solution for extracting input parameters in the mashup to pass case-specific data. Additionally, including a dedicated step pointing to the mashup in one of the phases of the case type ensures agents can access the external solution during case processing. According to SAP documentation, "Creating a mashup, configuring its URL parameters, and integrating it into the case type via a dedicated step are required for external solution access." Developing a custom business object (A) is unnecessary for this scenario. Defining a custom screen for the mashup (D) is not a standard requirement.

SAP Community: External Solution Integration

NEW QUESTION # 80

What are the prerequisites for integrating external systems into Agent Desktop? Note: There are 2 correct answers to this question.

- A. SAP Cloud Integration
- B. Machine learning
- C. SAP Event Mesh
- D. SAP Build Apps

Answer: A,C

NEW QUESTION # 81

Which of the following objects can be replicated between SAP Service Cloud Version 2 and SAP S/4HANA? Note: There are 2 correct answers to this question.

- A. Registered products
- B. Contacts
- C. Maintenance plans
- D. Service contracts

Answer: A,B

Explanation:

In SAP Service Cloud Version 2, integration with SAP S/4HANA supports the replication of specific objects to ensure seamless service processes. Contacts are replicated to synchronize customer contact information, enabling consistent communication across systems. Registered products are also replicated to manage customer assets and link them to service cases. According to SAP documentation, "Standard integration between SAP Service Cloud V2 and SAP S/4HANA includes replication of master data such as Contacts and Registered Products." Maintenance plans (A) and Service contracts (D) are managed in SAP S/4HANA but are not part of the standard out-of-the-box replication for SAP Service Cloud V2.

SAP Community: Master Data Replication for Service Cloud

NEW QUESTION # 82

To which objects can you assign employees in SAP Service Cloud Version 2? Note: There are 2 correct answers to this question.

- A. Registered products
- B. Response templates
- C. Service levels
- D. Accounts

Answer: A,D

NEW QUESTION # 83

Which configuration steps are mandatory to link customer emails with cases? Note: There are 2 correct answers to this question.

- A. Assign the team responsible for handling cases.
- B. Create a case routing rule.
- C. Maintain and activate at least one email channel.
- D. Set up a rule to route the email to the tenant's technical email address.

Answer: C,D

NEW QUESTION # 84
