The Exam4PDF web-based ServiceNow CIS-Discovery Practice Test requires an active internet and it is compatible with all operating systems.

ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q36-Q41):

NEW QUESTION # 36

Based on this image, which of the following statements are true? (Choose three.)

- A. If a value is unmatched, it is still merged into the Target Table.
- B. This operation is more than likely a part of a step on a pattern set to Application Pattern Type.
- C. This is a horizontal pattern of type "infrastructure."
- D. Attributes from two tables populate a table with the same name as a ServiceNow CMDB table.
- E. For this operation to run, there must be some data in the process.executablePath variable.

Answer: B,C,E

NEW QUESTION # 37

For a pattern operation, which of the below choices could be a valid replacement for <_>? (Choose three.)

\$IfTable<_>.InstanceID

- A. []
- B. [3]
- C. [*]
- D. [&]
- E. [.]
- F. [X]

Answer: B,C,E

Explanation:

For a pattern operation, the <_> placeholder can be replaced by any valid index or wildcard character that can be used to access an element of an array or a table. The \$IfTable variable is a table that contains information about the network interfaces of a device1. The InstanceID attribute is a unique identifier for each interface2.

To access the InstanceID of a specific interface, the pattern operation can use the following syntax:

\$IfTable[<index>].InstanceID

where <index> is either:

- * A numeric index that corresponds to the position of the interface in the table, such as 3 for the third interface.
- * A dot (.) followed by a key-value pair that matches a specific attribute and value of the interface, such as [.Name=eth0] for the interface with the name eth0.
- * An asterisk (*) that represents a wildcard that matches any interface in the table, such as [] for all interfaces.

:

1: IfTable - Product Documentation: San Diego - ServiceNow

2: InstanceID - Product Documentation: San Diego - ServiceNow

NEW QUESTION # 38

Why should we use discovery process handler?

Response:

- A. It can overwrite the data gathered from process on the running process list for the discovered host.
- B. All of them
- C. Process handler can be configured to help with the situations where the parameter might contain changeable port.
- D. It can make sure that the data is same after restart by running a script and therefore eliminating duplicate Clis.

Answer: B

NEW QUESTION # 39

After navigating to an Automaton Error Messages list from Discovery > Home, how are the options on the right navigation pane categorized? (Choose two.)

- A. SELECT ALL
- B. SELECT ONE
- C. ACTION ON ALL
- D. ACTION ON SELECTED

Answer: A,D

Explanation:

The Automation Error Messages list displays the errors that occurred during the execution of Discovery automation scripts. From this list, you can view the details of each error, such as the script name, the error message, the device, and the time. You can also perform actions on the errors, such as retrying the script, ignoring the error, or creating an incident. To do so, you can use the options on the right navigation pane, which are categorized as follows:

* SELECT ALL: This option allows you to select all the errors in the list.

* SELECT ONE: This option allows you to select one error in the list by clicking on the checkbox next to it.

* ACTION ON SELECTED: This option allows you to perform an action on the selected errors, such as Retry, Ignore, or Create Incident. You can also choose to perform the action on all the errors in the list by selecting the All option from the drop-down menu.

* ACTION ON ALL: This option allows you to perform an action on all the errors in the list, regardless of the selection. You can choose from the same actions as the ACTION ON SELECTED option.

References:

* Discovery error messages: This article explains the different types of error messages and warnings in Discovery, and how to access and manage them.

NEW QUESTION # 40

Installed Software on a CI, Processes running on a CI are gathered during which discovery phase?

Response:

- A. Exploration
- B. Identification
- C. Port Scan
- D. Classification

Answer: A

NEW QUESTION # 41

.....
