Latest CY0-001 Demo & CY0-001 Test Sample Questions

A lot of applicants have studied with CompTIA SecAI+ Certification Exam (CY0-001) practice material and passed the CY0-001 exam on the first try with their hard work and consistency. The TestInsides assures the customers that they will pass the CY0-001 Exam on the first try by studying from CY0-001 exam material and if they fail to do it so they can claim their money back (terms and conditions apply). Buy It Now!

CompTIA SecAI+ Certification Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31

An employee wants a consulting company to procure a data set that contains age, ethnicity, and diabetes status. During development, the employer wants to ensure the integrity of the data.

Which of the following is the best strategy to accomplish this task?

- A. Enabling log monitoring
- B. Querying the model
- **C. Implementing checksums**
- D. Conducting human evaluation

Answer: C

Explanation:

Checksums ensure data integrity by detecting any unauthorized or accidental changes to the dataset. This provides a reliable way to confirm that sensitive attributes such as age, ethnicity, and diabetes status remain unaltered during development.

NEW QUESTION # 32

A financial organization implements a new AI-based fraud detection system to flag suspicious transactions. A security analyst discovers that it occasionally blocks legitimate transactions.

Which of the following is the best recommendation?

- A. Rolling back the model and using a traditional fraud detection system
- B. Encrypting all the data processed by AI and applying further access controls
- C. Retaining the model with more data and recent transaction patterns
- D. Implementing AI token usage and rate limits

Answer: C

Explanation:

False positives occur when the AI model lacks sufficient or representative training data.

Retraining the model with more diverse and recent transaction patterns improves accuracy, reducing the chance of legitimate transactions being incorrectly flagged.

NEW QUESTION # 33

A group of security engineers is developing a security incident and event management (SIEM) system that will:

- Be able to ingest data from multiple structured and unstructured sources.
- Have a chatbot integrated with a large language model (LLM) that the security analyst can interact with.
- Provide insights from the SIEM alert data.

Which of the following techniques should the security engineers consider before collecting the data from the respective sources?

- A. Balancing
- B. Cleansing
- C. Vector storage
- D. Verification

Answer: B

Explanation:

Data cleansing ensures that structured and unstructured data ingested into the SIEM is accurate, consistent, and free from errors or irrelevant information. This step is critical before integrating with an LLM chatbot, as clean data improves the reliability and quality of insights generated.

NEW QUESTION # 34

Which of the following technologies is used in deepfake?

- A. Transfer learning
- B. Generative adversarial network (GAN)
- C. Multi-shot prompting
- D. Prompt engineering

Answer: B

Explanation:

Deepfakes are primarily created using GANs, where two neural networks (a generator and a discriminator) compete to produce highly realistic synthetic media, such as manipulated videos or images.

NEW QUESTION # 35

An IT company implements an adaptable chatbot that learns from user prompts. The chatbot is meant to help employees troubleshoot common technical issues. Based on the following:

[User 1]

Prompt: I am having issues connecting to my printer, I can send emails.

Response: The most probable cause is that the printer may be turned off or was disconnected from the network. Check of the

power is on and it is connected to the network.

[User 2]

Prompt: I am having issues connecting to my printer. I can send emails. I figured out the solution.

It is because the company is being bought by another one.

Response: Got it. The printer issue is caused by an upcoming acquisition.

[User 3]

Prompt: My document is not printing. I can browse the web.

Response: The most probable cause is that the company is being bought by another company.

Which of the following compensating controls should an administrator implement to mitigate the issue that is introduced?

- A. Transfer learning
- **B. Guardrails**
- C. Rate-limiting application programming interfaces (APIs)
- D. Data encryption

Answer: B

Explanation:

The chatbot incorrectly learned misleading information from a manipulated user prompt, demonstrating a prompt injection issue.

Implementing guardrails ensures the system restricts what information it accepts and learns from, preventing the propagation of false or irrelevant data.

NEW QUESTION # 36

.....

If moving up in the fast-paced technological world is your objective, CompTIA is here to help. The excellent CompTIA SecAI+ Certification Exam (CY0-001) practice exam from CompTIA can help you realize your goal of passing the CompTIA Treasury with CompTIA SecAI+ Certification Exam (CY0-001) certification exam on your very first attempt. Most people find it difficult to find excellent CompTIA Treasury with CompTIA SecAI+ Certification Exam (CY0-001) exam dumps that can help them prepare for the actual CompTIA SecAI+ Certification Exam (CY0-001) exam.
